Unleash powerful teaching and the science of learning in your classroom Powerful Teaching: Unleash the Science of Learning empowers educators to

harness rigorous research on how students learn and unleash it in their classrooms. In this book, cognitive scientist Pooja K. Agarwal, Ph.D., and veteran K-12 teacher Patrice M. Bain, Ed.S., decipher cognitive science research and illustrate ways to successfully apply the science of learning in classrooms settings. This practical resource is filled with evidence-based strategies that are easily implemented in less than a minute—without additional prepping, grading, or funding! Research demonstrates that these powerful strategies raise student achievement by a letter grade or more; boost learning for diverse students, grade levels, and subject areas; and enhance students' higher order learning and transfer of knowledge beyond the classroom. Drawing on a fifteen-year scientist-teacher collaboration, more than 100 years of research on learning, and rich experiences from educators in K-12 and higher education, the authors present highly accessible step-by-step guidance on how to transform teaching with four essential strategies: Retrieval practice, spacing, interleaving, and feedback-driven metacognition. With *Powerful Teaching*, you will: Develop a deep understanding of powerful teaching strategies based on the science of learning Gain insight from real-world examples of how evidence-based strategies are being implemented in a variety of academic settings Think critically about your current teaching practices from a research-based perspective Develop tools to share the science of learning with students and parents, ensuring success inside and outside the classroom *Powerful Teaching: Unleash the Science of Learning* is an indispensable resource for educators who want to take their instruction to the next level. Equipped with scientific knowledge and evidence-based tools, turn your teaching into powerful teaching and unleash student learning in your classroom.

The Little White Owl HMH Books For Young Readers

Generous Mr. Panda is giving away presents to all his animal friends, including a mouse, an octopus, an elephant, and a lemur, but they aren't being very grateful about the gifts they receive. It may be because the presents aren't quite right. Mouse receives a sweater that's too big, and Octopus gets six colorful socks even though he has eight legs. Fortunately, thoughtful little Lemur knows that even if the present isn't perfect, it's the thought that counts most of all. Just as Mr. Panda introduced good manners in *Please, Mr. Panda* and the importance of being patient in *I'll Wait, Mr. Panda*, *Thank You, Mr. Panda* is a graphic, kid-friendly way of teaching little ones the importance of saying "thank you" and recognizing that it's the thought that counts most of all behind every gift.

Education is not only about being able to read, write, and count. Creativity is a huge part of the educational process and of our lives. Children are naturally creative and they like to be busy, especially if this is fun and something comes out from their hands. Adults often do not recognize the value of this important activity. We can not only spend a great time together, but we can help our kids develop many skills and abilities. It also provides an excellent opportunity for trying new ideas. Creativity is what makes a difference in developing creative ways of thinking and problem solving.

Creativity is much more than product: it is a process. It is a specific form of self-expression. It is to learn with inspiration from personal experience.

The importance of a child's creative process is also in the opportunity to experience and explore materials. Cooperation is an important component in the creative process, which is directed by the adult, but should be a result of the child's preference. This kind of activity can help us learn more about our kids, about their feelings, their way of thinking, their uniqueness and their mental and emotional health. Childhood development of creativity is not about telling them, but showing them, and doing it with them.

This book has Paper Panda's very distinctive stamp on it and begins with a design section which takes the reader through a very personal account of what inspires her, how she works, and how Paper Panda came about. The techniques involved in papercutting are fairly simple and easy to explain, and this is covered through step-by-step demos. There is a design section, taking readers through the design process itself and including numerous examples of Louise's papercut designs. Starting with the themes and subjects that inspire her, it explains how she creates finished artwork suitable for papercutting, followed by how to make the template itself, and how to use the papercut to make cards, framed pictures, and so on. The aim of this section will be not only to provide readers with an insight into Paper Panda's creative world, but also to inform and inspire people to design papercuts for themselves. There are 20 papercut projects in the book; five from Paper Panda herself and five each from three of Paper Panda's design colleagues (Sarah Trumbauer, Louise Dyer and Suzy Taylor - all accomplished papercutters with online presences). Each project will consist of a template, which will be reproduced full-size at the back of the book, and a finished paper cut, together with some step-by-step instructions. The designs will be simple enough for beginners, though attractive and interesting enough to inspire more advanced paper cutters. The projects themselves will include cards, decorations, and mounted and framed pictures to hang on the wall, all using a variety of colored and patterned papers to show off Paper Panda and friends' distinctive and beautiful designs to their best advantage.
