";Several recent studies show that police chiefs think that new recruits who come out of college programs do not have the

critical thinking skills that they reasonably should have as a result of their college experience. College students should be able to think, and think critically, about important issues and problems in criminal justice and, in particular, criminal investigation. Police work and criminal investigations are more complicated now than ever. The work requires that individuals have a solid understanding of what it is that they are expected to do, and the problems and pitfalls with this work. In particular, individuals who enter police work should have a critical understanding of evidence, the strengths and weaknesses of different forms of evidence, and how different types of evidence can be used to establish proof. This knowledge represents a necessary foundation for the study of criminal evidence and investigation, and they can get this knowledge from my book."; -Steven G. Brandl
