The
International
Code for Fire
Safety
Systems (FSS
Code) was
adopted by
the Maritime
Safety
Committee
(MSC) at its
seventy-third
session
(December

2000) by resolution MSC.98(73) in order to provide international standards for the fire safety systems and equipment required by chapter II-2 of the 1974 SOLAS Convention. The Code is made mandatory under SOLAS by amendments to the Convention adopted by the MSC at the same session (resolution MSC.99(73)) and entered into force on 1 July 2002. The MSC adopted amendments to chapters 4, 5, 6, 7 and 9 of the Code by resolutions MSC.206(81) and MSC.217(82). These new amendments are expected to be accepted on 1 January 2008 and 1 January 2010, as applicable, and enter into force on 1 July 2008 and 1 July 2010, as applicable. The amendments to the aforementioned chapters, as adopted by resolutions MSC.206(81) and MSC.217(82), are contained in pages 351-365 for information purposes only. In order to make this publication as comprehensive as possible for use by equipment and systems manufacturers, shipowners and operators, shipyards, classification societies and Administrations, all related fire safety standards and guidelines adopted by either the Assembly or the MSC and referred to in the FSS Code have been incorporated,

as appropriate, in this publication for the guidance and convenience of users.

Proficiency in Personal Survival Techniques

Oways Visit - www.owaysonline.com for cheapest notes ASM MASTERS Orals - Nitin Mahajan *Dry Docking and Shipboard Maintenance* IMO Publishing Special edition of the Federal Register, containing a codification of documents of general

applicability and future effect ... with ancillaries.

FSS Code Office of the Federal Register This present Code has been developed for the design, construction and operation of offshore support vessels (OSVs) which transport hazardous and noxious liquid substances in bulk for the servicing and resupplying of offshore platforms, mobile offshore drilling units and other

offshore installations, including those employed in the search for and recovery of hydrocarbons from the seabed. The basic philosophy of the present Code is to apply standards contained in the Code and the International Code or the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk (IBC Code) and in the International

Code for the Construction and Equipment of Ships Carrying Liquefied Gases in Bulk (IGC Code) to the extent that is practicable and reasonable taking into account the unique design features and service characteristics of OSVs.

Of all the international conventions dealing with maritime safety, the most important is the International Convention for the Safety of Life at Sea, 1974, as amended, better known as SOLAS, which covers a wide range

of measures designed to improve the safety of shipping. The Convention is also one of the oldest of its kind: the first version was adopted in 1914 following the sinking of the Titanic with the loss of more than 1,500 lives. Since then there have been four more versions of SOLAS. The present version was adopted in 1974 and entered into force in 1980. In order to provide an easy reference to

all SOLAS requirements applicable from 1 July 2014, this edition presents a consolidated text of the SOLAS Convention, its Protocols of 1978 and 1988 and all amendments in effect from that date. The SOLAS Consolidated Edition 2014 is an essential reference for maritime administration s, ship manufacturers , owners and operators, shipping companies, education institutes and

all others concerned with requirements of the International Convention for the Safety of Life at Sea. **Code of Safe Working Practices for Merchant Seafarers** Iver C Weilbach This course should be taken by every prospective seafarer. It covers training in personal survival techniques and is based on the provisions of table A-VI/1-1 of the STCW

<p>Code.</p> <p>International Code for the Construction and Equipment of Ships Carrying Liquefied Gases in Bulk Iver C Weilbach Core Principles of Maritime Navigation introduces the main navigation concepts required by trainees and professionals involved in maritime operations. The purpose of this manual is to provide all members of the crew with information about purpose and use of all life-saving appliances on

board, the meaning of the ship's alarms, the procedures for abandonment and survival techniques. *Procedures for Port State Control 2011* IMO Publishing The Safety of Navigation, implementing SOLAS - Chapter V has been prepared to help ship-owners, masters, crews and industry to understand and comply with the SOLAS Regulations and offers practical guidance on how they

should be implemented. It is important that all parties fully understand the requirements of Chapter V and the associated documents and recognise their own specific responsibilities under each Regulation. Of all the international conventions dealing with maritime safety, the most important is the International Convention for the Safety of Life at Sea (SOLAS),

<p>which covers a wide range of measures designed to improve the safety of shipping. Substantial revisions to the fifth version of SOLAS came into force on 1 July 2002, with the new Regulations implemented under UK legislation by the Merchant Shipping (Safety of Navigation) Regulations 2002</p> <p><i>Navigation and Vessel Inspection Circular</i></p> <p>Skyhorse Publishing Inc. The</p>	<p>International Convention for the Safety of Life at Sea (SOLAS) covers a wide range of measures designed to improve the safety of shipping. This publication contains amendments to the 1974 SOLAS Convention and the 1988 Protocol adopted by the IMO Maritime Safety Committee during 2003-05, relating to: access to space in cargo areas of oil tankers,</p>	<p>testing of watertight doors, emergency towing arrangements; emergency drills, maintenance of life-saving appliances, carriage of immersion suits, survival craft and rescue boats; emergency position indicating radio beacons (EPIRBs); place of safety for rescued persons, shipboard navigational equipment and voyage data recorders; and additional safety</p>

measures for bulk carriers. Code of Federal Regulations, Title 46, Shipping, PT. 156-165, Revised as of October 1, 2012 IMO Publishing The Marine Environment Protection Committee (MEPC) of IMO, at its sixty-second session in July 2011, adopted the Revised MARPOL Annex V, concerning Regulations for the prevention of pollution by garbage from ships, which enters into

force on 1 January 2013. The associated guidelines which assist States and industry in the implementation of MARPOL Annex V have been reviewed and updated and two Guidelines were adopted in March 2012 at MEPC's sixty-third session. The 2012 edition of this publication contains: the 2012 Guidelines for the implementation of MARPOL Annex V (resolution MEPC.219(63)

); the 2012 Guidelines for the development of garbage management plans (resolution MEPC.220(63)); and the Revised MARPOL Annex V (resolution MEPC.201(62)). *Life-Saving Appliances Training Manual* IMO Publishing The International Code of Safety for High-Speed Craft, 2000 (2000 HSC Code) applies to craft for which the keels are laid, or which

are at a similar stage of construction, on or after 1 July 2002. The application of the both HSC Codes is mandatory under chapter X of the SOLAS Convention. This edition incorporates amendments that were adopted in 2004 and 2006.--

 The purpose of the IGC Code is to provide an international standard for the safe carriage by sea of liquefied gases (and other substances listed in the Code) in bulk. To minimize risks to the

ships, their crews and the environment, prescribes the design and constructional standards of such ships and the equipment they should carry. The 1993 edition incorporates amendments adopted in 1992 by resolution MSC.30(61). Safety of Navigation IMO Publishing Port state control (PSC) involves the inspection of foreign ships in national port areas to verify that the condition and operation of a ship and its

equipment comply with the requirements of international regulations. While IMO has always acknowledged that enforcement of global maritime standards is the responsibility of flag states, the organisation nevertheless recognises that exercising the right to carry out Psc makes an important contribution to ensuring those standards are implemented

consistently on ships of different nationalities. The sub-committee on flag state implementation has developed and maintained a framework to promote the global harmonisation and co-ordination of Psc activities resulting in the adoption of resolution A.1052(27) by the assembly of November 2011. This resolution contains the Procedures for port state control, 2011, and revokes resolutions

A.787(19) and A.882(21).	provisions of other IMO conventions, codes and recommendations, its requirements stipulate more stringent and transparent verification of the reported structural condition of the ship and that documentary and survey procedures have been properly carried out and	completed. The Scheme requires that compliance with the CAS is assessed during the Enhanced Survey Program of Inspections concurrent with intermediate or renewal surveys currently required by resolution A.744(18), as amended.-- Publisher's description.
