Public Speaking for College and Career Rowman & Littlefield
 Focused on fully discussing what is considered to be "good" research, *Research and Evaluation in Education and Psychology* explains quantitative, qualitative, and mixed methods, and incorporates the viewpoints of various research paradigms into its descriptions of these methods. The work covers four major paradigms: postpositivist, constructivist, transformative, and pragmatic. Special emphasis is provided on conducting research in culturally complex communities, based on the perspectives of feminists, ethnic/racial minorities, and people with disabilities. In each chapter, Donna M. Mertens carefully explains a step of the research process, from the literature review to analysis and reporting. Additionally, she includes a sample study and abstract in each chapter to illustrate the concepts discussed in that section of the book. Now in its third edition, *Research and Evaluation in Education and Psychology* is perfect as a core text for research courses in departments of education, psychology, and sociology, as well as social work and other human services disciplines. It can be used by itself or in conjunction with other texts focusing on specific methodologies. Key Features Explains quantitative, qualitative, and mixed methods in detail Covers four major paradigms: Postpositivist, constructivist, transformative, and pragmatic Emphasizes conducting research in culturally complex communities, based on the perspectives of feminist, ethnic/racial minorities, and people with disabilities Offers a step-by-step overview of the research process from literature review to analysis and reporting Presents sample studies and abstracts in each chapter to illustrate concepts New to this Edition Accompanied with a Student Web site with links to flashcards, mini-cases, and SAGE journal articles Produced in an attractive 2-color format Includes thoroughly updated examples and references to current developments in research methods, evaluation and cultural issues throughout the text Presents more details on mixed methods design Incorporates the third edition of the Program Evaluation Standards Presents universal design principles in data collection Offers more examples throughout the text Provides more ideas on how to write a literature review and to plan a dissertation Contains more pedagogy including "Extending Your Thinking" added throughout Gives additional depth to the pragmatic paradigm presented in Chapter 1

Serious degradation mechanisms can severely reduce the service life of concrete structures: steel reinforcement can corrode, cement matrix can be attacked, and even aggregates can show detrimental processes. Therefore, it is important to understand how damage can occur to concrete structures and to appreciate the timing of the actions leading to damage. Damage to Concrete Structures summarizes the state-of-the-art information on the degradation of concrete structures, and gives a clear and comprehensive overview of what can go wrong. Offering a logical flow, the chapters are ordered according to the chronological timing of the actions leading to concrete damage. The author explains the different actions or mechanisms in a fundamental manner, without too many physical or chemical details, to provide greater clarity and readability. The book describes the different causes of damage to concrete, including inappropriate design, errors during execution, mechanisms occurring during hardening of concrete, and actions or degradation mechanisms during service life (hardened concrete). The degradation mechanisms are illustrated with numerous real-world examples and many drawings and photographs taken of actual structures. Written as a textbook for students as well as a reference for professionals, this easy-to-comprehend book gives readers a deeper understanding

of the damage that can occur to concrete during the construction process and service.
