CUNNINGHAM OLSON

The Education of Citizens Springer Science & Business Media

Working with educators at all academic levels involved in WAC partnerships, the authors and editors of this collection demonstrate successful models of collaboration between schools and institutions so others can emulate and promote this type of collaboration.

The Case for Civic Education John Wiley & Sons

Numerous studies have chronicled students lack of trust in large social institutions, declining interest in politics, and decreasing civic skills. This book is a comprehensive guide to developing high-quality civic engagement experiences for college students. The book defines civic engagement and explains why it is central to a college education. It describes the state of the art of education for civic engagement and provides guidelines for designing programs that encourage desired learning outcomes. In addition, the book guides leaders in organizing their institutions to create a campus-wide culture of civic engagement.

Twenty-four National Case Studies from the IEA Civic Education Project Routledge

Provides practical applications of democratic teaching for classes in history/social studies education, multicultural and social justice education,

community service and civic engagement, and education and public policy. *We, the Students and Teachers* shows history and social studies educators how to make school classrooms into democratic spaces for teaching and learning. The book offers practical strategies and lesson ideas for transforming democratic theory into instructional practice. It stresses the importance of students and teachers working together to create community and change. The book serves as an essential text for history and social studies teaching methods courses as well as professional development and inservice programs for history and social studies teachers at all grade levels. "The key to the excellent potential of this book is its assertion that democratic teaching can be linked to content, especially historical content, not just to a generic notion of 'student-centered instruction.' The theory-to-practice emphasis is very explicit, as is the emphasis on the voices of the teachers and students who participated in the research. The book also takes a highly creative approach to its topic that I find very refreshing." — Elizabeth Washington, University of Florida "This is an important book. Maloy and LaRoche reveal the challenges that face historians as we grapple with increasingly fraught public and political perceptions of our discipline. Their strategies for reconstituting the classroom as a laboratory for instilling democratic values and practices are both ingenious and practical." — Dane Morrison, author of *True Yankees: Sea Captains, the South Seas, and the Discovery of American Identity* *Citizenship Education in the United States* Foundations of Multicultural E For too long we've lacked a compact, inexpensive, authoritative, and compulsively readable book that offers American readers a clear, informative, and inspiring narrative account of their country. Such a fresh retelling of the American story is especially needed today, to shape and deepen young

Americans' sense of the land they inhabit, help them to understand its roots and share in its memories, all the while equipping them for the privileges and responsibilities of citizenship in American society. The existing texts simply fail to tell that story with energy and conviction. Too often they reflect a fragmented outlook that fails to convey to American readers the grand trajectory of their own history. This state of affairs cannot continue for long without producing serious consequences. A great nation needs and deserves a great and coherent narrative, as an expression of its own self-understanding and its aspirations; and it needs to be able to convey that narrative to its young effectively. Of course, it goes without saying that such a narrative cannot be a fairy tale of the past. It will not be convincing if it is not truthful. But as *Land of Hope* brilliantly shows, there is no contradiction between a truthful account of the American past and an inspiring one. Readers of *Land of Hope* will find both in its pages.

How can schools and the school curriculum contribute to building democratic citizens? This is a major question posed by governments, educational systems, schools, teachers and researchers around the world. One important way is to identify the competences needed for preparing democratic citizens and incorporate these within both the formal and informal school curriculum. Another question must then be posed- what competences do young citizens need to be considered as active and engaged in modern democracies? In 2011 an invited research symposium of leading civic and political educators, and social scientists from across Europe met in Hannover, Germany to consider this key concern facing Europe today. In examining the above questions the symposium addressed two significant issues: 1. Identify key competencies required for active citizenship of young people in Europe of the future. 2. Translate those competencies to school-based activities in the form of curricular and pedagogical strategies. The publication *Civic Education and Competences for Engaging Citizens in Democracies* addressed the first issue and this volume addresses the second issue. Through discussion in the invited symposium, previously prepared papers, and participation in a modified Delphi Technique the participants have prepared chapters for this book. The chapters of this book represent the contribution of the participants before, during and after the symposium with opportunities for review and reflection about competences for democratic citizenship and the role of schools and the curriculum. Murray Print and Dirk Lange are professors from the University of Sydney and Leibniz University of Hannover respectively and are national leaders in civics and citizenship education in their respective countries. They have brought together a group of leading European civic and citizenship educators from different academic fields to explore the key issue and to identify the competences for young people to become active and engaged European citizens. *Practice, Policy, and Research Across Countries and Regions* CreateSpace

This book engages readers in thirteen conversations presented by authors from around the world regarding the role that textbooks play in helping readers imagine membership in the nation. Authors' voices come from a variety of contexts - some historical, some contemporary, some providing analyses over time. But they all consider the changing portrayal of diversity, belonging and exclusion in multiethnic and diverse societies where silenced, invisible, marginalized members have struggled to make their voices heard and to have their identities incorporated into the national narrative. The authors discuss portrayals of past exclusions around religion, ethnicity, sexual orientation, as they look at the shifting boundaries of insider and outsider. This book is thus about "who we are" not only demographically, but also in terms of the past, especially how and whether we teach discredited pasts through textbooks. The concluding chapters provides ways forward in thinking about what can be done to promote curricula that are more inclusive, critical and positively bonding, in increasingly larger and more inclusive contexts.

This open access book identifies the multiple ways that IEA's studies of civic and citizenship education have contributed to national and international educational discourse, research, policymaking, and practice. The IEA International Civic and Citizenship Education Study (ICCS), first conducted in 2009, was followed by a second cycle in 2016. The project was linked to the earlier IEA Civic Education Study (CIVED 1999, 2000). IEA's ICCS remains the only large-scale international study dedicated to formal and informal civic and citizenship education in school. It continues to make substantial contributions to understanding the nature of the acquired civic knowledge, attitudes, and participatory skills. It also discusses in-depth how a wide range of countries prepare their young people for citizenship in changing political, social, and economic circumstances. The next cycle of ICCS is planned for 2022. In this book, more than 20 national representatives and international scholars from Europe, Latin America, Asia, and North America assess how the processes and findings of the 2009 and 2016 cycles of ICCS and CIVED 1999/2000 have been used to improve nations' understanding of their students' civic knowledge, beliefs, attitudes, current civic-related behaviors, and intentions for future participation in a comparative context. There are also chapters summarizing the secondary analysis of those studies' results indicating their usefulness for educational improvement and reflecting on policy issues. The analyses and reflections in this book provide timely insight into international educational discourse, policy, practice, and research in an area of education that is becoming increasingly important for many societies.

[Engaging Young People in Civic Life](#) Brooks/Cole Publishing Company

This book taps the best American thinkers to answer the essential American question: How do we sustain our experiment in government of, by, and for the people? To remain America, our country has to give its kids a civic identity, an understanding of our constitutional system, and some appreciation of the amazing achievement of American self-government. Yet schools often do no such thing. Young Americans know little about the founding fathers, the Bill of Rights, the structure of government, or the civilrights movement. Three of every four high-school seniors aren't proficient in civics, and the problem is aggravated by universities' disregard for civic education. This undermines healthy citizenship. It disenfranchises would-be voters-especially the poor and minorities-it weakens America's common culture, and it poisons political discourse. That is the subject of this book, authored by an extraordinary and politically diverse roster of public officials, scholars, and educators. In these pages, they describe our nation's civic education problem, assess its causes, offer an agenda for reform, and explain the high stakes at risk if we fail.

Civic Education for Junior Secondary Schools is an exceptional course in Civic Education for Junior Secondary School Students. The course has been written in full compliance with the Basic Education curriculum provided by the Nigerian Educational Research and Development Council, and should fully equip the students for the Junior Secondary School Examination. Every book in the course has been written in simple language to make it easy for the JS Students to understand. Each topic in every book has been fully developed, with examples the students can easily grasp and identify with. Very clear apt pictures have also been used to illustrate the lessons in the books. The authors are highly experienced teachers and WAEC/NECO examiners, who have also authored several highly successful Secondary School textbooks.

Educating Citizens reports on how some American colleges and universities are preparing thoughtful, committed, and socially responsible graduates. Many institutions assert these ambitions, but too few act on them. The authors demonstrate the fundamental importance of moral and civic education, describe how the historical and contemporary landscapes of higher education have shaped it, and explain the educational and developmental goals and processes involved in educating citizens. They examine the challenges colleges and universities face when they dedicate themselves to this vital task and present concrete ways to overcome those challenges.

[Civic Responsibility and Higher Education](#) John Wiley & Sons

This book focuses on multicultural curriculum transformation in social studies and civic education subject areas. The discussion of each area outlines critical considerations for multicultural curriculum transformation for the area by grade level and then by eight organizing tools, including content standards, relationships with and among students and their families, and evaluation of student learning and teaching effectiveness. The volume is designed to speak with PK-12 teachers as colleagues in the multicultural curriculum transformation work. Readers are exposed to "things to think about," but also given curricular examples to work with or from in going about the actual, concrete work of curriculum change. This work supports PK-12 teachers to independently multiculturally adapt existing curriculum, to create new multicultural curriculum differentiated by content areas and grade levels, and by providing ample examples of what such multicultural transformed social studies and civic education curricula looks like in practice.

[Study](#) Amer. Assn. of Community Col

Sound democratic decisions rely on a citizenry with at least a partial mastery of the rules and workings of democratic government. American high schools, where students learn the basics of citizenship, thus ought to play a critical role in the success of democracy. Yet studies examining the impact of high school government and civics courses on political knowledge over the past quarter-century have generally shown that these courses have little or no effect. In this important book, Richard G. Niemi and Jane Junn take a fresh look at what America's high school seniors know about government and politics and how they learn it. The authors argue convincingly that secondary school civics courses do indeed enhance students' civic knowledge. This book is based on the most extensive assessment to date of civic knowledge among American youth--the 1988 National Assessment of Education Progress (NAEP) Civics Assessment. The authors develop and test a theoretical model to explain the cognitive process by which students learn about politics and they conclude by suggesting specific changes in the style and emphasis of civics teaching.

[Readings in Campus Violence](#) Routledge

Originally published in 1974, a comprehensive history of Nigerian Education, from early times right through to the time of publication, had long been

needed by all concerned with Education in Nigeria, students, teachers and educational administrators. No one was better qualified than Professor Fafunwa to provide such a book, and in doing so he gave due emphasis to the beginnings of Education in its three main stages of indigenous, Muslim and Christian Education. Nigerian Education had been considered all too often as a comparatively recent phenomenon, but this book points out from the start that 'Education is as old as Man himself in Africa' and that both Islam and Christianity were comparative newcomers in the field. A historical treatment of these three strands which have combined to make up the modern Educational system was vital to a clear understanding of what was needed for the future, and most of the first half of the book is concerned with these Educational beginnings. The imposing of a foreign colonial system

on this framework did not always lead to a happy fusion of the systems, and the successes and the failures are examined in detail. There was no shortage of documentary evidence in the form of reports and statistics during the decades prior to publication, but this evidence was frequently scattered and inaccessible to the student, so that the author's careful selection of key evidence and reports, often drawn from his own personal experience, will be invaluable for those wishing to trace the development of Education in Nigeria up to the early 1970s. A knowledge of the history and development of the Nigerian Education system, of the numerous and intensely varied personalities and beliefs which have combined and often conflicted to shape it, is indispensable to all students in colleges and universities studying to become teachers. It is this knowledge that Professor Fafunwa set out to provide, drawing on his wide experience as teacher writer and educationalist.
