Owners Edition - Workshop Manual
covers the following Mercedes-Benz Vito
and V-Class petrol and diesel powered
vehicles spanning model years 2000 to
2003. The petrol model 113 with 130
b.h.p. engine (type 111) and the three
diesel models 108 CDI, 110 CDI and 112
CDI, all fitted with the latest common rail
2.2 litre diesel engines. Depending on
the version, the power units have

outputs of 82 b.h.p., 102 b.h.p. and 122
b.h.p. respectively. In Sections 0 and 1
can be found further details of the
various models and engines dealt with
here. This manual has been written for
the practical owner who wants to
maintain their vehicle in first-class
condition and carry out the bulk of their
own servicing and repairs.

Comprehensive step-by-step instructions
are provided for service and overhaul
operations to guide the reader through
what might otherwise be unfamiliar and
complicated tasks and hundreds of
illustrations are included to amplify the
text. With the aid of this manual, many
aspects of service, overhaul and repair
are within the scope of an owner with a
reasonable degree of mechanical
aptitude. Some operations however

demand more skill. Other jobs require the use of special tools and in some cases, testing facilities and techniques that are not generally available. Only you can judge whether a job is within your capabilities. We do however try to assist the reader to come to an informed decision. Whilst every effort has been made to ensure that the information provided is correct, it is obviously not possible to guarantee complete freedom from errors or omissions. Information to be found in the driver's handbook is not necessarily duplicated here and it is not possible within this volume to cover every aspect to be found in the manufacturer's own workshop manual which is of much greater size and complexity. However, it should be consulted if more detailed information is

needed. Always remember that you are responsible for your own safety and that of others when working with you on a vehicle. Take particular care with safety-related systems like the brakes and steering and seek professional advice if in any doubt. Never work under a vehicle unless it is properly supported (a single jack is not enough). Take care with power tools, also regard as potentially harmful fuel, lubricants, solvents and sealers which should always be stored in labelled, sealed containers. Always obtain your spare parts from an officially appointed Mercedes-Benz dealer. With care and common sense, the practical owner can make an excellent job of maintenance and overhaul. The benefits include money saved and the satisfaction of work well done. You will

be adding to your knowledge too, knowing more about the vehicle you own will help you to make logical decisions about what needs to be done, even if it does in some instances have to go into a professional repair shop. The Mercedes-Benz Vito and V-Class vehicles are built with care and precision. With regular care and maintenance they will provide long, reliable and faithful service.
