This book is a genre-breaking response to the literature on study abroad. It stakes claim to an uncharted space between reflective pedagogy, public history studies, and investigations into dark tourism. Drawing on the author's experience of teaching short-term summer programs and courses

in London between 2011 and 2018 that focused wholly or in part on the Whitechapel murders of 1888, the book analyzes experiential learning in the study abroad context. The book is informed by the instructor's reflections; students' informal essays and anonymous evaluations; and the scholarship of teaching and learning. It begins by situating programs and courses on the Whitechapel murders in the context of debates about overseas and experiential learning. It then proceeds to discuss the constraints to and possibilities for devising study abroad programs to include graduate students in humanistic disciplines; assignments and classroom activities

utilized, including those with a reenactment component; the ethical complexities of teaching at dark sites; and the pedagogical implications of learning about Jack the Ripper in an age of terror. It concludes with reflections on the differences between study abroad programs and courses in cultivating students' global-mindedness. Expectations, Experiences and Development Springer Nature Identity and Internationalization in Catholic Universities explores the relationship between Catholic identity, mission (with special emphasis on Jesuit and La Salle universities), and internationalization in

Catholic universities of different types and located in different contexts: Latin America, Asia-Pacific and Europe.

This book marries

social work and artificial intelligence to provide an introductory guide for using AI for social good. Following an introductory chapter laying out approaches and ethical principles of using AI for social work interventions, the book describes in detail an intervention to increase the spread of HIV information by using algorithms to determine the key individuals in a social network of homeless youth. Other chapters present interdisciplinary collaborations between AI and social work students, including a chatbot for sexual health information and algorithms to determine who is at higher stress among persons with Type 2 Diabetes. For students, academic researchers,

industry leaders, and practitioners, these real-life examples from the USC Center for Artificial Intelligence in Society demonstrate how social work and artificial intelligence can be used in tandem for the greater good. [Social Justice and Parent Partnerships in Multicultural Education Contexts](#) IGI Global This book shares the perspectives of community college CEOs and examines the role of leadership in adopting institutional-wide strategies and allocating resources that have advanced immigrant and refugee integration on campus and in the community. IGI Global This book focuses on English teacher educators' experiences concerning

sector. It offers

theoretical frameworks

and empirical data to

relating to teacher

activities. Some of

these areas include the

education of teachers

in vocational

professionalization of

teacher educators in a neoliberal education system, and teacher educators' perspectives of a training programme for vocational education and training. Additionally, the areas cover the relevance of coherence in vocational teacher education for teacher educators, the use of questioning strategies for teacher educators, teacher educators and their initial disciplines, journeys and job titles, the relevance of craft and reflectivity of teacher educators, and the importance of teacher education and mentoring scheme. The rationale for this book is that there is a comparative lack of research and related publications on teacher educators and the delivery and design of

teacher education facilitation in the sector internationally. Also, the FE sector is viewed as a backwater of educational research compared to the other sectors.

Case Studies and Considerations for Policy Implementation

Rowman & Littlefield

The need for more empathetic and community-focused students must begin with educators, as service-learning has begun to grow in popularity throughout the years. By implementing service and community aspects into the classroom at an early age, educators have a greater chance of influencing students and creating a new generation of service-minded individuals who care about their

communities. Teachers must have the necessary skills and current information available to them to provide students with quality service learning and community engagement curricula. The Research Anthology on Service Learning and Community Engagement Teaching Practices provides a thorough investigation of the current trends, best practices, and challenges of teaching practices for service learning and community engagement. Using innovative research, it outlines the struggles, frameworks, and recommendations necessary for educators to engage students and provide them with a comprehensive

education in service learning. Covering topics such as lesson planning, teacher education, and cultural humility, it is a crucial reference for educators, administrators, universities, lesson planners, researchers, academicians, and students.

Teacher education programs serve traditional and non-traditional students and develop teachers to enter a range of teaching environments.

Approaching teacher education through

community involvement and learning objectives helps to effectively prepare teachers to serve local and community needs. The Handbook of Research on Service-Learning Initiatives in Teacher Education Programs provides emerging research on the methods and techniques for educators to strengthen their knowledge regarding the intersection of service learning and field placements. While highlighting topics, such as cultural competency, teacher development, and multicultural education, this book explores the benefits, challenges, and opportunities for employing community service as the driving

framework for field experiences. This publication is a vital resource for practitioners, educators, faculty, and administrators seeking current research on the opportunity of field involvement to enhance teacher candidates' experiences and provide a channel for meaningful learning.

Volume 15 #1 Springer Nature

This edited volume examines the Seal of Biliteracy (SoBL), a relatively new policy initiative that has received little attention in scholarly and practical literature. The contributions seek to expand the literature by presenting case studies of policy implementation in diverse contexts across the United States. This

book is organized into four sections: (1) introduction to the SoBL, including history of the policy initiative and national trends in policy design and implementation, (2) case studies of macro-level policy implementation, including a diverse array of contexts across the country that have approached the SoBL in unique ways (e.g., legislation v. educational code, prioritizing world v. home languages), (3) case studies of micro-level implementation, including schools and districts that award the SoBL to diverse student populations through various language programs (e.g., English-dominant v. linguistically diverse; world language v. dual-language programs),

and (4) conclusions and future directions, including actionable next steps for policy makers, administrators, educators, and researchers. Members of various professional organizations will benefit from this text, including the National Association for Bilingual Education (NABE), Teachers of English to Speakers of Other Languages (TESOL), the American Council for Teaching of Foreign Languages (ACTFL), as well as participants in local affiliates for bilingual, English as a second language (ESL), and world language education.

Chapter topics are grounded in both research and practice, addressing a range of timely topics including the current state of ELL education in the secondary mathematics classroom, approaches to leveraging the talents and strengths of bilingual students in heterogeneous classrooms, best practices in teaching mathematics to multilingual students, and ways to infuse the secondary mathematics teacher preparation curriculum with ELL pedagogy.

This book will appeal to all teachers of ELLs, teacher educators and researchers of language acquisition more broadly. This volume is part of a set of four edited books focused on teaching the key content areas to English language learners. The other books in the set focus on teaching History and Social Studies, English Language Arts, and Science to ELLs. **Building Courage, Confidence, and Capacity in Learning and Teaching Through Student-faculty Partnership** Czech Institute of Academic Education Children at the Center provides a closely observed account of a decade-long effort to reshape the scope, direction, and quality of the Boston Public

Schools' early childhood programs. Drawing on multiple perspectives and voices from the field, the authors highlight the reflective, collaborative, inquiry-driven approach undertaken by the program and share lessons learned. Boston Public Schools are recognized for embedding high-quality, public preK programs in their system and achieving exceptional results. In this book, the authors outline the core principles that underlie the district's early childhood programs and explore the role of curriculum, professional development, coaching, and data use in supporting these new initiatives. They show how the Boston

Public Schools Department of Early Childhood was able to work with and against the constraints of the current accountability system to create a holistic, child-centered, play-based program that has had a significant impact in narrowing income-based learning gaps. Written in collaboration with the Department of Early Childhood Education, this account of creating successful preK programs in a diverse urban district will provide a valuable resource for practitioners engaged in similar work across the country. The Routledge Handbook of English Language and Digital Humanities serves as a reference point for key developments related to the ways in which the digital turn has shaped the study of the English language and of how the resulting methodological approaches have permeated other disciplines. It draws on

modern linguistics and discourse analysis for its analytical methods and applies these approaches to the exploration and theorisation of issues within the humanities. Divided into three sections, this handbook covers: sources and corpora; analytical approaches; English language at the interface with other areas of research in the digital humanities. In covering these areas, more traditional approaches and methodologies in the humanities are recast and research challenges are re-framed through the lens of the digital. The essays in this volume highlight the opportunities for new questions to be asked and long-standing questions to be

reconsidered when drawing on the digital in humanities research. This is a ground-breaking collection of essays offering incisive

and essential reading for anyone with an interest in the English language and digital humanities.
