 There is nothing a mother
 won't do to protect her

son. "There are no reported outbreaks in the UK or Ireland." That is what the government broadcast. Nilda didn't believe it. Not trusting the authorities, she, and her son, Jay, stay behind when Penrith is evacuated. Vindicated when she learns the extent of the government's betrayal, they search for supplies, but after weeks of rationing, there is little left in the small town in Northern England. Soon, she discovers that there are many other survivors competing for it. Choosing diplomacy over violence, she attempts to forge a community out of a disparate group, but as the number of the undead grow, she realises that they will have to seek sanctuary elsewhere. Abandoned and betrayed, Nilda travels north into Scotland, but death follows her and she discovers that not all those who survived the evacuation have the same motives. Some only want to help. Others only want to help themselves. Whilst the new Mayor of Anglesey has her own agenda, one at odds with Nilda's quest; to find a safe haven for her son. If not us, who? If not now, when? As the much-depleted United Nations meets in Canberra, the scale of the global catastrophe becomes clear. The tsunami left Brisbane a flooded ruin. Vanuatu has disappeared. The Madagascan evacuation has failed. Vancouver has been reduced to a radioactive crater. For as far west as Mozambique, as far to the east as Chile, and as far north as Canada, the world is a catalogue of devastation. From the Atlantic, there has been no news since the early days of the outbreak, four weeks ago. With the satellite networks down, searching for survivors is difficult. With the relief fleets destroyed, rescue is impossible. While the fallout is still settling, the collective minds of the refugees in Australia focus on rebuilding as a distraction from the rising risk of radiation and extinction. Commissioner

Tess Qwong has a different duty. She must find those responsible for this ultimate crime against humanity. Her investigation into the failed coup provides the identity of those behind the outbreak and the location of their lab. With her misfit group of Special Forces and civilian conscripts, she heads to Mozambique. There, a New Zealand frigate will take them on into the unknown dangers of the Atlantic. But while they hunt the radioactive seas for the war criminals, below the waves their enemy is hunting for them. From Perth to Panama, from South Africa to South America, from paradise islands to radioactive wastelands, the battle against extinction continues. Divided We Fall Frank Tayell

Save Australia, Save the World. Three weeks after the outbreak, most nations have collapsed. An ever-increasing number of refugees flee, by boat and air, to the perceived safety of the remote Pacific nations. In Australia, every able body is conscripted, local and newcomer alike. The lucky few are put to work in the new factories, farms, and mines. The unlucky many

are given tools for weapons, put aboard cruise-ships and cargo freighters, and returned to the ever-moving frontline. But even though the death toll rises, victory is still within reach. The recordings made in North America by Pete and Corrie Guinn contained more than the siblings realised. The footage from Canada and Michigan is further confirmation the outbreak was no accident. The Canadian scientist, Dr Avalon, can prove it. As Commissioner Tess Qwong takes justice to the increasingly lawless outback, Anna Dodson brings order to the chaos of Parliament House, and Dr Avalon works on a weapon to finally destroy the undead. But no plans can survive the impact of a nuclear bomb. From a lawless natural gas refinery in Queensland to the once golden coast of New South Wales. Behind the barricaded streets of Canberra and in the bunker beneath Parliament House, there is still hope for Australia, the Pacific, the world, as long as the lights remain on. *Divided* Frank Tayell

The outbreak changed everything, but there are some bonds even the undead can't break. It's

been six years since Pete Guinn last saw his sister, Corrie. He always hoped to see her again, but feared she was dead. When an elusive billionaire reveals Corrie is living under an assumed name in the Australian outback, Pete unquestioningly jumps at the chance of a reunion. But you can't win the lottery without buying a ticket, and billionaires don't do favours for free. Corrie is in hiding from her old employer, and from the Rosewood Cartel. Now that they've both found her, only a miracle can save the two siblings, and what happens in Manhattan can't be described as miraculous. What begins as a viral outbreak soon turns into an impossible horror. People are infected and die, only to rise up and continue transmitting the infection. Even as the army is mobilised, the virus spreads beyond the borders of the United States. Nowhere is safe from the living dead. As Australia is quarantined, the mining town of Broken Hill becomes a transit hub for the relief effort. Tourists are evacuated while civilians are conscripted, Pete and Corrie among them.

Together with a bush pilot, a flying doctor, and an outback cop, the struggle to maintain civilisation begins. Supplies run low. Looting is rampant. Laws are forgotten, especially by the cartel who haven't abandoned their search for Corrie and their quest for revenge. Set in Broken Hill and beyond as the Australian quarantine begins. As this book returns to the beginning of the outbreak, it can be considered a good entry point for readers new to the series.

Surviving the

Evacuation: Outback Outbreak

Frank Tayell

Fourteen months after the outbreak, thirteen months after the nuclear war, the old world is gone, but a new world is emerging. The evacuation of Britain failed, but other evacuations were a success. In Canberra, a new civilisation is being born, but in Canada, the survivors bid a last and final farewell to the Atlantic. While a final evacuation of Nova Scotia is planned, the search for lost communities begins. The journey takes Bill and Kim to the very end of the Earth, and to a meeting with familiar strangers. Crossing the border, Sholto endures a

bittersweet return to the country he'd embraced so many decades ago. The United States he remembered is gone, and yet he can see its shadow among the burned ruins and desolate towns of the American Northeast. But the rains soon turn to a flood that washes away the few bridges not destroyed during the failed quarantine. With no other escape from the deluge, they take to the river. On the Hudson, they sail into the middle of a civil war. When they learn one faction is led by the last surviving member of the political conspiracy that spawned the apocalypse, it is obvious which side to take. Set among the thawing wilderness of Quebec and Ontario, the swollen rivers and flooded roads of New York, and in the courtrooms of Canberra, this novel includes characters and events from the five-part Pacific-based series *Life Goes On*. A castle can be made safe from the undead, but not from the people inside the walls. It is seven months since the outbreak. In the anarchy and chaos that came with the undead, civilisation was destroyed.

In the wars that followed, the planet was nearly ruined. Billions died. Only a few thousand survived. Fifty people have found refuge in the Tower of London. Zombies plague the city outside the old fortress. The wasteland beyond is filled with nothing but radioactive ruins. With nowhere left to retreat to, and in a final attempt to make the ancient castle a place where they can do more than just slowly starve, the survivors search for food in the abandoned coastal farms. They find something else. They discover that hunger, thirst, and the undead aren't the only threat they face. Betrayal and danger lurk in the shadows in this, the sixth novel in the series. The Life You Were Born to Live - Revised 25th Anniversary Edition
Frank Tayell

Two deaths could be an accident. Three must be murder. 2039, twenty

years after the Als went to war, plague and famine has reduced the global population to a hundred million. Most of the planet is a wasteland, with only a handful of enclave-nations preserving a dim shadow of civilisation. Technology has regressed to the era of steam trains, telegrams, and sailing boats, but democracy survived and is again under threat. Three terrorist insurgencies have swept across Europe, pillaging farms, burning villages, destroying two decades of fragile recovery. Those refugees who escaped the massacres fled to the coast. Like a century before, Calais and Dunkirk have become the front line. On the home front, rationing continues, and another ice-age winter has begun. Christmas is only days away, but Constable Ruth Deering's mood is anything but festive. In the walled city of Dover, a lonely chef is discovered dead, poisoned. What first appeared to be an accident is soon suspected to be the work of a serial killer who is certain to strike again. On the front line, Henry Mitchell doesn't view this as war, just another crime against humanity during

the twenty-year-long battle for survival. As hastily built bastions are fortified by a conscript-militia, Mitchell ventures deep behind the lines, hunting for the mastermind responsible for this latest assault. In the new British capital of Twynham, a peace treaty with the separatist kingdom of Leicester is in peril. Until it's signed, the soldiers laying siege to the royalist redoubt can't be redeployed to the front. As rusting tanks are recovered for repair, as new regiments are raised, and spies are sent east, the nation prepares for a war that certainly won't be over by Christmas. [Here We Stand 2](#) Frank Tayell

As nations rebuild, democracy is under threat. In 2019, the Als went to war. Millions died before a nuclear holocaust brought an end to their brief reign of terror. Billions more succumbed to radiation poisoning, disease, and the chaotic violence of that apocalypse. Some survived. They rebuilt. Twenty years later, civilisation is a dim shadow of its former self. Crime is on the rise. During the investigation of a routine homicide, Police Officer Ruth

Deering prevents a group, claiming to be Luddites, from destroying the telegraph. This act of sabotage is only the beginning. As arrests are made and criminals are caught, evidence emerges that the saboteurs are connected to the Als, the counterfeiting, and to the assassination. The shadowy figure behind the conspiracy must be unmasked before their fragile democracy is destroyed.

It took three weeks to destroy civilisation. It won't be rebuilt in a day. A year after the outbreak, a sharp winter is followed by a sudden thaw. Spring has come early to Nova Scotia, bringing new hope. For the thirteen thousand survivors who've found sanctuary in northern Canada, and for the first time since the apocalypse, extinction isn't imminent. But it looms large in the near future, a legacy of the nuclear war that destroyed civilisation. As the weather improves, some survivors quit the small community. Even more plan their departure. The old-world supplies of food, oil, and ammunition have been consumed.

More will have to be grown, drilled, and made. Medicine, paper, clothes: in a few years there will be none left to salvage. If it can't be manufactured, it will have to be forgone. What knowledge can't be preserved will be lost. Humanity's future appears bleak unless more people can be found. Hoping there is some truth in the rumours of a redoubt in Vancouver, an expedition to the Pacific is launched. The journey will be perilous as North America was ground zero for the outbreak, and for the nuclear war. Set in Canada and beyond, as survivors from the Atlantic and Pacific meet. Please note: this book features places and events, and heroes and villains from Life Goes On Books 1-3, the saga of survivors in the Pacific.

Frank Tayell Anglesey became a refuge for survivors from across the world, but living in the shadow of a decrepit nuclear power station was always a precarious existence. There is only one destination for their final exodus from Britain, but Belfast won't become their new home. There are fewer undead on the island of Ireland, but their

numbers still count in the millions. With farming impossible, with the weather worsening, with ammunition exhausted, desperation turns to despair. All seems bleak, but the survivors don't know how truly desperate their situation is. During the chaos that ensued after the calamitous election, they misjudged the evidence. Their true enemy is still among them, and that enemy is about to act. Set nine months after the outbreak, in Britain and the island of Ireland, when humanity is at a crossroads. Either all will survive, or our species will die.

Whoever wins the election, humanity will lose. Nine months after the outbreak, ten thousand survivors from across the globe have found a refuge on the Welsh island of Anglesey. Hordes of the undead ravage the wastelands of Britain and Ireland. Satellite images show that the rest of the world is no better. Food, fuel, and ammunition are running low and there are no more old-world supplies with which to replace them. Intended as an alternative

to a slide into despotism, an election is called. It is hoped the contest will bring forth solutions to the myriad crises facing this last bastion of humanity. After the favoured candidate is hospitalised, suspicion falls on the new frontrunner, a publican who purchased his support with an impossible promise of a return to the pre-apocalyptic world. With no viable candidate, and no way of calling off the election, those who still have access to a ship plan their departure; others plan to rig the contest; a few give up on all plans for a future beyond tomorrow. Anglesey is on the verge of collapse, and humanity is on the brink of extinction. Set in Belfast, the Isle of Man, and Wales during the run-up to the election on Anglesey, this is the sixth volume of Bill Wright's journals.

No More News Frank Tayell

There is always hope. Northern France is a frozen morass of mud and snow across which rampages a horde of the undead, a hundred million strong. That won't stop Chester Carson and his comrades. Seeking a way across the Channel, they

make for the coast, unaware that Britain has been abandoned, Belfast is a ruin, and that radiation is seeping into the Irish Sea. If they knew, that wouldn't stop them either. They're on a quest to save their family, their friends, and humanity itself; failure is not an option. As they journey through war-ravaged ports and storm-wrecked beaches, a new truth becomes clear. The flotilla that found refuge on Anglesey wasn't the only group of sea-borne refugees to have survived the outbreak. There are other survivors. Some good, some evil, some just determined to do their duty no matter the cost. Danger lurks along the French and Belgian coasts. So do answers, and hope that humanity now has a future.

Divided We Fall-United We Stand is an awareness tool which shows righteous people are divided from unnatural forces. The inability for us to unite for righteous causes has weakened us just as it did when divide and conquer was implemented as a tool to control slave plantations during the years of physical slavery.

Presently, in the time of mental slavery, our oppressors sleep soundless nights because we are quick to divide ourselves for reasons that have no merit. In *Divided We Fall* we discuss the seven most known reasons people are dividing themselves. This book will break down the barriers that we have willingly put up around ourselves and bring us back into the mentality of unity. Only our unity will allow us to stand against present and future wrongs committed on the masses of people everywhere. And this book is where you begin your journey back to the family of righteousness.

Surviving the Evacuation

Frank Tayell

Divided We Stand is a study of how class and race have intersected in American society--above all, in the "making" and remaking of the American working class in the nineteenth and twentieth centuries. Focusing mainly on longshoremen in the ports of New York, New Orleans, and Los Angeles, and on steelworkers in many of the nation's steel towns, it examines how European immigrants became American and "white" in the crucible of the

industrial workplace and the ethnic and working-class neighborhood. As workers organized on the job, especially during the overlapping CIO and civil rights eras in the middle third of the twentieth century, trade unions became a vital arena in which "old" and "new" immigrants and black migrants forged new alliances and identities and tested the limits not only of class solidarity but of American democracy. The most volatile force in this regard was the civil rights movement. As it crested in the 1950s and '60s, "the Movement" confronted unions anew with the question, "Which side are you on?" This book demonstrates the complex ways in which labor organizations answered that question and the complex relationships between union leaders and diverse rank-and-file constituencies in addressing it. *Divided We Stand* includes vivid examples of white working-class "agency" in the construction of racially discriminatory employment structures. But Nelson is less concerned with racism as such than with the concrete historical circumstances in which

racialized class identities emerged and developed. This leads him to a detailed and often fascinating consideration of white, working-class ethnicity but also to a careful analysis of black workers--their conditions of work, their aspirations and identities, their struggles for equality. Making its case with passion and clarity, *Divided We Stand* will be a compelling and controversial book.

It is a week since the outbreak began in New York. The president has been betrayed. The vice-president is dead. The government has collapsed. The conspirators are close to victory. Having narrowly escaped agents of the cabal, Tom Clemens heads to Washington hoping to get word of the conspiracy to the president. The highways become impassable, filled with millions fleeing from the cities. Towns are fortified, but it is too late. The infection has already spread throughout the country. Nowhere is safe from the undead. As refugees storm the towns, and zombies fill their smoking ruins, survivors

become more deadly a threat than the impossibly living dead. Still hopeful he can find the cause of the outbreak, and so end it, Tom fights his way through an undead America. As he searches for the cabal, he is unaware that they are searching for him. The story of Tom Clemens / Sholto continues in *Surviving The Evacuation: Book 1: London*. That of the survivors in North America will continue in *Here We Stand 3: Betrayed*. Please note: As the President of the United States is a background character, and the presidential election a background event, American English has been used in this book though with some British spellings as most of *Surviving the Evacuation* takes place in the United Kingdom.

The battle might be lost, but the war isn't over. Once it was home to half a billion people. A year after the nuclear war, Europe is a radioactive, storm-ravaged wasteland through which a hundred million undead inexorably march. In their wake, they leave nothing but ruins. Ahead of them flee those

few who managed to survive this long. Chasing them are the dregs of humanity. Once known as the Rosewood Cartel, they kill, loot, and destroy as indiscriminately as the living dead. Hope might be lost, but it could still be found, as can a future for the last remnant of humanity. Those who built a sanctuary on Anglesey, in Dundalk, in Creil are the help that came to others. In this, their darkest hour, but with a new dawn so close, they will not give up. Set in the Faroe Islands, France, Denmark, and elsewhere, the battle has begun, but the war hasn't yet been lost.

Zombies. The outbreak began in New York. Soon it had spread to the rest of the world. People were attacked, infected, and they died. Then they came back. No one is safe from the undead. As anarchy and civil war took grip across the globe, Britain was quarantined. The British press was nationalised. Martial law, curfews and rationing were implemented. It wasn't enough. An evacuation was planned. The inland towns and cities of the United Kingdom were to be

evacuated to defensive enclaves being built around the coast, the Scottish Highlands, and in the Irish Republic. Bill Wright, a Westminster insider and an advisor to a future Prime Minister, broke his leg on the day of the outbreak. Unable to join the evacuation, he watched from his window as the streets filled with refugees. He watched as the streets emptied once more. He watched as they filled up again, this time with the undead. Then the power went out. He is trapped. He is alone. He is running out of food and water. He knows that to reach the safety of the enclaves he will have to venture out into the wasteland that once was England. On that journey

he will ultimately discover the horrific truth about the outbreak, a decades old conspiracy, and his unwitting part in it. This is the first volume of his journal. (73,000 words) [Surviving The Evacuation, Book 0.5: Zombies vs The Living Dead](#) HarperCollins In 2019, the Als went to war. Three days later, hundreds of nuclear missiles were launched. The electromagnetic pulse destroyed the machines, but the radiation and ensuing famine nearly destroyed humanity. By 2039, civilisation had regressed to the age of steam, but newer technologies were on the horizon. The future looked bright until the warlords swept through Europe. Villages and towns were

laid waste, the few thousand people who'd hacked out a life in the continental wasteland were butchered. It was only when the barbarians reached the British garrison in Calais that they were stopped. And so, another war began. In Dover, life goes on. Food needs to be grown. Children need to be taught. For Ruth Deering, the city's newest police officer, crimes need to be solved. When an artist is murdered, an investigation begins that will take her far beyond the city's walls and, ultimately, determine the fate of their fragile democracy. Set in Britain and France, twenty years after the world we know was destroyed.
