Psychology of Music

Scarecrow Press

In *Psychology of Music: From Sound to Significance* (2nd edition), the authors consider music on a broad scale,

from its beginning as an acoustical signal to its different manifestations across cultures. In their second edition, the authors apply the same richness of depth and scope that was a hallmark of the first edition of this text. In addition, having laid out the topography of the field in the original book, the second edition puts greater emphasis on linking academic learning

to real-world contexts, and on including compelling topics that appeal to students' natural curiosity. Chapters have been updated with approximately 500 new citations to reflect advances in the field. The organization of the book remains the same as the first edition, while chapters have been updated and often expanded with new topics. 'Part I: Foundations' explores the acoustics of sound, the auditory system, and responses to music in the

brain. 'Part II: The Perception and Cognition of Music' focuses on how we process pitch, melody, meter, rhythm, and musical structure. 'Part III: Development, Learning, and Performance' describes how musical capacities and skills unfold, beginning before birth and extending to the advanced and expert musician. And finally, 'Part IV: The Meaning and Significance of Music' explores social, emotional, philosophical and cultural dimensions of music and meaning. This

book will be invaluable to undergraduates and postgraduate students in psychology and music, and will appeal to anyone who is interested in the vital and expanding field of psychology of music. For Two Pianos Schott & Company Limited
Carl Orff's 24 selections from 200 poems of the Carmina Burana celebrate the universal range of human emotion and experience: passion, longing, exuberance, humor, rebellion, ennui, resignation. Now tender, now tragic; secular yet

reverent; the poems of the carmina touch the chords of our purest and darkest spirituality. An excellent resource for the student, the performer, the audience and the general reader, this dual language edition provides two moving translations from the original Latin, informative essays, and facing vocabulary. This text will enrich understanding and heighten appreciation of these beloved medieval poems.

Hal Leonard Corporation
Ton de Leeuw was a truly groundbreaking

composer. As evidenced by his pioneering study of compositional methods that melded Eastern traditional music with Western musical theory, he had a profound understanding of the complex and often divisive history of twentieth-century music. Now his renowned chronicle *Music of the Twentieth Century* is offered here in a newly revised English-language edition. *Music of the Twentieth Century* goes beyond a historical survey with its lucid and

impassioned discussion of the elements, structures, compositional principles, and terminologies of twentieth-century music. De Leeuw draws on his experience as a composer, teacher, and music scholar of non-European music traditions, including Indian, Indonesian, and Japanese music, to examine how musical innovations that developed during the twentieth century transformed musical theory, composition, and scholarly thought around

the globe.

In this authoritative study,
one of the first to appear
in English, Erik Levi
explores the ambiguous
relationship between
music and politics during
one of the darkest periods
of recent cultural history.
Utilising material drawn
from contemporary
documents, journals and
newspapers, he traces the
evolution of reactionary
musical attitudes which
were exploited by the

Nazis in the final years of the Weimar Republic, chronicles the mechanisms that were established after 1933 to regiment musical life throughout Germany and the occupied territories, and examines the degree to which the climate of xenophobia, racism and anti-modernism affected the dissemination of music either in the opera house and concert hall, or on the radio and in the media.

This book *Modern Piano* contains 90 easy original pieces from the 20th and 21st centuries. The pieces selected display a great variety of styles including New Music, neoclassicism, modern dances, jazz, blues, pop, rock, musical studies, meditative music, New Age music and more besides: a colourful range of different styles, sometimes blurring the distinction between classical and popular music in 'crossover' pieces that bridge the gap between different musical worlds. The little pieces

selected invite us to go on a musical journey of discovery, introducing new experiences using modern sounds and rhythms. All these pieces are suitable for tuition purposes, auditions, examinations and school music competitions - or just as stimulating repertoire for pianists interested in music.

Children are inherently musical. They respond to music and learn through music. Music expresses

children's identity and heritage, teaches them to belong to a culture, and develops their cognitive well-being and inner self worth. As professional instructors, childcare workers, or students looking forward to a career working with children, we should continuously search for ways to tap into children's natural reservoir of enthusiasm for singing, moving and experimenting with instruments. But how, you might ask? What music is appropriate for the

children I'm working with? How can music help inspire a well-rounded child? How do I reach and teach children musically? Most importantly perhaps, how can I incorporate music into a curriculum that marginalizes the arts? This book explores a holistic, artistic, and integrated approach to understanding the developmental connections between music and children. This book guides professionals to work through music, harnessing the processes that underlie music

learning, and outlining developmentally appropriate methods to understand the role of music in children's lives through play, games, creativity, and movement. Additionally, the book explores ways of applying music-making to benefit the whole child, i.e., socially, emotionally, physically, cognitively, and linguistically.
