JAMARI MOYER

Creative Potential and Creative Performance Routledge

The view of translation as a socially regulated activity has opened up a broad field of research in the last few years. This volume deals with central questions of the new domain and aims to contribute to the conceptualisation of a general sociology of translation. Interdisciplinary in approach, it discusses the role of major representatives of sociology like Pierre Bourdieu, Bruno Latour, Bernard Lahire, Anthony Giddens or Niklas Luhmann in establishing a theoretical framework for a sociology of translation. Drawing on methodologies from sociology and integrating them into translation studies, the book questions some of the established categories in this discipline and calls for a redefinition of long-assumed principles. The contributions show the social involvement of translation in various fields and focus especially on the translator's position in an emerging sociology of translation, Bourdieu's influence in conceptualising this new sub-discipline, methodological questions and a sociologically oriented meta-discussion of translation studies.

Parallel Corpora for Contrastive and Translation Studies John Benjamins Publishing Company

This volume assesses the state of the art of parallel corpus research as a whole, reporting on advances in both recent developments of parallel corpora – with some particular references to comparable corpora as well – and in ways of exploiting them for a variety of purposes. The first part of the book is devoted to new roles that parallel corpora can and should assume in translation studies and in contrastive linguistics, to the usefulness and usability of parallel corpora, and to advances in parallel corpus alignment, annotation and retrieval. There follows an up-to-date presentation of a number of parallel corpus projects currently being carried out in Europe, some of them multimodal, with certain chapters illustrating case studies developed on the basis of the corpora at hand. In most of these chapters, attention is paid to specific technical issues of corpus building. The third part of the book reflects on specific applications and on the creation of bilingual resources from parallel corpora. This volume will be welcomed by scholars, postgraduate and PhD students in the fields of contrastive linguistics, translation studies, lexicography, language teaching and learning, machine translation, and natural language processing.

International Perspectives on Translation Studies BRILL

Translation technologies are moulded by and impact upon humans in all sorts of ways. This state-of-the-art volume looks at translation technologies from the point of view of the human users – as trainee, professional or volunteer translators, or as end users of translations produced by machines. Covering technologies from machine translation to online collaborative platforms, and practices from 'traditional' translation to crowdsourced translation and subtitling, this volume takes a critical stance, questioning both utopian and dystopian visions of translation technology. In eight chapters, the authors propose ideas on how technologies can better serve translators and end users of translations. The first four chapters explore how translators – in various contexts and with widely differing profiles – use and feel about translation technologies as they currently stand, while the second four chapters focus on the future: on anticipating needs, identifying emerging possibilities, and defining interventions that can help to shape translation practice and research. Drawing on a range of theories from cognitive to social and psychological, and with empirical evidence of what the technologization of the workplace means to translators, *Human Issues in Translation Technology* is key reading for all those involved in translation and technology, translation theory and translation research methods.

Normalization in Translation John Benjamins Publishing

The present volume is devoted to the study of language use in translated texts as a function of various linguistic, contextual and cognitive factors. It contributes to the recent trend in empirical

translation studies towards more methodological sophistication, including mixed methodology designs and multivariate statistical analyses, ultimately leading to a more accurate understanding of language use in translations.

Government Translation in South Korea Routledge

The linguistically innovative aspect of Francophone African literature has been recognized and studied from a variety of angles over recent decades, yet little attention has been paid to what happens to such literature when it is translated into another language. Taking as its corpus all sub-Saharan Francophone African texts that have ever been published in English, this book explores the ways in which translators approach innovative features such as African-language borrowings, neologisms and other deliberate manipulations of French, depictions of sociolinguistic variation, and a variety of types of wordplay. The implications of their translation decisions are drawn out with reference to the broader significances that are often accorded to postcolonial literature, and earlier critics' calls for a decolonized translation practice are explored from both a practical and theoretical angle. These findings are used to push towards a detailed investigation of the postcolonial turn in translation studies, drawing on the work of key postcolonial theorists such as Homi K. Bhabha and Gayatri Spivak. This is a timely and incisive critical assessment of contemporary discourses on the ethics and politics of translation.

A Corpus Based Approach Chinese University Press

Professional translators are increasingly dependent on electronic resources, and trainee translators need to develop skills that allow them to make the best use of these resources. The aim of this book is to show how CULT (Corpus Use for Learning to Translate) methodologies can be used to prepare learning materials, and how novice translators can become autonomous users of corpora. Readers interested in translation studies, translator training and corpus linguistics will find the book particularly useful. Not only does it include practical, technical advice for using and learning to use corpora, but it also addresses important issues such as the balance between training and education and how CULT methodologies reinforce student autonomy and responsibility. Not only is this a good introduction to CULT, but it also incorporates the latest developments in this field, showing the advantages of using these methodologies in competence-based learning.

Creativity in Word Formation and Word Interpretation Cambridge Scholars Publishing
 Introduces the integration of theoretical and applied translation studies for socially-oriented and data-driven empirical translation research.

Issues and Challenges Routledge

The papers compiled in the present volume aim at investigating the many fruitful manners in which cognitive linguistics can expand further on cognitive translation studies. Some papers (e.g. Halverson, Muñoz-Martín, Martín de León) take a theoretical stand, since the epistemological and ontological bases of both areas (cognitive linguistics and translation studies) should be known before specific contributions of cognitive linguistic to translation are tackled. Several works in the volume attempt to illustrate how some of the notions imported from cognitive linguistics may contribute to enrich our understanding of the translation process in a general translation problem such as metaphor (e.g. Samaniego), the relationship between form and meaning (e.g. Tabakowska, Rojo and Valenzuela) or cultural aspects (e.g. Bernárdez, Sharifian/Jamarani). Others use translation as an empirical field to test some of the basic assumptions of cognitive linguistics such as frames (e.g. Boas), metonymy (e.g. Brdar/Brdar-Szabó), and lexicalisation patterns (e.g. Ibarretxe-Antuñano/Filipovi?). Finally, another set of papers (e.g. Feist, Hatzidaki) opens up new lines of investigation for experimental research, a very promising area still underdeveloped.

Routledge Encyclopedia of Translation Studies Gunter Narr Verlag

Corpus Linguistics for Translation and Contrastive Studies provides a clear and practical introduction to using corpora in these fields. Giving special attention to parallel corpora, which are collections of texts in two or more languages, and demonstrating the potential benefits for multilingual corpus

linguistics research to both translators and researchers, this book: explores the different types of parallel corpora available, and shows how to use basic and advanced search procedures to analyse them; explains how to compile a parallel corpus, and discusses their uses for translation purposes and to research linguistic phenomena across languages; demonstrates the use of corpus extracts across a wide range of texts, including dictionaries, novels by authors including Jane Austen and Mikhail Bulgakov, and newspapers such as The Sunday Times; is illustrated with case studies from a range of languages including Finnish, Russian, English and French. Written by two experienced researchers and practitioners, *Corpus Linguistics for Translation and Contrastive Studies* is essential reading for postgraduate students and researchers working within the area of translation and contrastive studies.

Empirical Translation Studies LED Edizioni Universitarie

Up to now, the Handbook of Translation Studies (HTS) consisted of four volumes, all published between 2010 and 2013. Since research in TS continues to grow and expand, this fifth volume was added in 2021. The HTS aims at disseminating knowledge about translation, interpreting, localization, adaptation, etc. and providing easy access to a large range of topics, traditions, and methods to a relatively broad audience: not only students who prefer such user-friendliness, but also researchers and lecturers in Translation Studies, Translation & Interpreting professionals, as well as scholars and experts from other adjacent disciplines. All articles in HTS are written by specialists in the different subfields and are peer-reviewed.

Selected papers from the EST Congress, Leuven 2010 Routledge

Translation technologies are moulded by and impact upon humans in all sorts of ways. This state-of-the-art volume looks at translation technologies from the point of view of the human users – as trainee, professional or volunteer translators, or as end users of translations produced by machines. Covering technologies from machine translation to online collaborative platforms, and practices from 'traditional' translation to crowdsourced translation and subtitling, this volume takes a critical stance, questioning both utopian and dystopian visions of translation technology. In eight chapters, the authors propose ideas on how technologies can better serve translators and end users of translations. The first four chapters explore how translators – in various contexts and with widely differing profiles – use and feel about translation technologies as they currently stand, while the second four chapters focus on the future: on anticipating needs, identifying emerging possibilities, and defining interventions that can help to shape translation practice and research. Drawing on a range of theories from cognitive to social and psychological, and with empirical evidence of what the technologization of the workplace means to translators, *Human Issues in Translation Technology* is key reading for all those involved in translation and technology, translation theory and translation research methods.

New Methodological and Theoretical Traditions Routledge

Computers offer new perspectives in the study of language, allowing us to see phenomena that previously remained obscure because of the limitations of our vantage points. It is not uncommon for computers to be likened to the telescope, or microscope, in this respect. In this pioneering computer-assisted study of translation, Dorothy Kenny suggests another image, that of the kaleidoscope: playful changes of perspective using corpus-processing software allow textual patterns to come into focus and then recede again as others take their place. And against the background of repeated patterns in a corpus, creative uses of language gain a particular prominence. In *Lexis and Creativity in Translation*, Kenny monitors the translation of creative source-text word forms and collocations uncovered in a specially constructed German-English parallel corpus of literary texts. Using an abundance of examples, she reveals evidence of both normalization and ingenious creativity in translation. Her discussion of lexical creativity draws on insights from traditional morphology, structural semantics and, most notably, neo-Firthian corpus linguistics, suggesting that rumours of the demise of linguistics in translation studies are greatly exaggerated. *Lexis and Creativity in Translation* is essential reading for anyone interested in corpus linguistics and its impact so far on translation studies. The book also offers theoretical and practical guidance for researchers who wish to conduct their own corpus-based investigations of translation. No previous knowledge of German, corpus linguistics or computing is assumed.

Constructing a Sociology of Translation Routledge

The Selected Papers from the 6th Congress Tracks and Treks in Translation Studies (TS) held at the University of Leuven, Belgium in 2010 congregated scholars and practitioners presenting their ideas and research in this thriving domain. This volume includes fifteen carefully selected articles which represent the diversity and breadth of the topics dealt with in Translation Studies today, increasingly bolstered by its interaction with other disciplines. At the same time it aims to provide a balance between process and product oriented research, and training and professional practice. The authors cover both Translating and Interpreting from a myriad of approaches, touching upon topics such as creativity, pleasant voice, paratext and translator intervention, project-based methodologies, revision, corpora, and individual translation styles, to name but a few. This volume will hopefully contribute to further fruitful interaction and cohesion which are essential to the international status of TS.

Corpus Linguistics for Translation and Contrastive Studies Multilingual Matters

The Routledge Encyclopedia of Translation Studies remains the most authoritative reference work for students and scholars interested in engaging with the phenomenon of translation in all its modes and in relation to a wide range of theoretical and methodological traditions. This new edition provides a considerably expanded and updated revision of what appeared as Part I in the first and second editions. Featuring 132 as opposed to the 75 entries in Part I of the second edition, it offers authoritative, critical overviews of additional topics such as authorship, canonization, conquest, cosmopolitanism, crowdsourced translation, dubbing, fan audiovisual translation, genetic criticism, healthcare interpreting, hybridity, intersectionality, legal interpreting, media interpreting, memory, multimodality, nonprofessional interpreting, note-taking, orientalism, paratexts, thick translation, war and world literature. Each entry ends with a set of annotated references for further reading. Entries no longer appearing in this edition, including historical overviews that previously appeared as Part II, are now available online via the Routledge Translation Studies Portal. Designed to support critical reflection, teaching and research within as well as beyond the field of translation studies, this is an invaluable resource for students and scholars of translation, interpreting, literary theory and social theory, among other disciplines.

Researching Translation in the Age of Technology and Global Conflict John Wiley & Sons

Government Translation in South Korea: A Corpus-based Study is the first book to investigate and

discuss translation processes and translation products in South Korean government institutions, employing a parallel corpus-based approach. Choi identifies different agents and procedures involved in institutional translation practices, discusses linguistic and genre features of translations, and investigates changes made in translations compared to the original documents, during the two Korean presidencies of Lee Myung-bak (2008–2013) and Park Geun-hye (2013–2017). Choi's book explores important facets of Korean government translation in the belief that practices associated with the normative meaning and concept of government translation have to be displaced into the wider understanding of the concept of translation as a social construct. Drawing on the theoretical frameworks of institutional translation and critical discourse analysis-informed corpus-based translation studies, the chapters discuss the practice, process and products of Korean government translation. The Korean-English parallel corpus methodology used introduces a systemic way to analyse changes in Korean government translations, based on a personally built sentence-level tagged corpus, both qualitatively and quantitatively. This volume will be of great interest to scholars and students of translation studies as well as Korean studies.

Textologie und Translation Cambridge University Press

This volume is a study into the norms that come into play in the translation of European Union legislation. With a focus on expressions of modality, the study adopts a corpus-based Descriptive Translation Studies approach to analyse the translation strategies used in a bilingual English/Italian parallel corpus of European Union legislation and identify the most frequent translational patterns. The book outlines the principles at the basis of the multilingual policy at the European Union and provides a detailed outline of the context in which the drafting and translation processes take place as a key to understanding the translational choices. The impact of sometimes contrasting factors such as the conventions of legal drafting at the European Union and those within the target culture, the principle of equal authenticity and the attention to the quality and readability of legislative texts is revealed in the analysis. Evidence in support of the theories concerning translation universals is also found and their implications for EU legal translation are discussed. The results lead to the formulation of several hypotheses as regards the norms governing the translation of EU legislative texts. The book also reflects on the impact that the translational choices have on the development of European Union legal language as an independent variety. This volume will be of interest to researchers and students in the fields of Legal Translation Studies and Linguistics, as well as practising translators.

Developing Translation Resources and Technologies Routledge

Introducing Translation Studies remains the definitive guide to the theories and concepts that make up the field of translation studies. Providing an accessible and up-to-date overview, it has long been the essential textbook on courses worldwide. This fifth edition has been fully revised, and continues to provide a balanced and detailed guide to the theoretical landscape. Each theory is applied to a wide range of languages, including Bengali, Chinese, English, French, German, Italian, Punjabi, Portuguese and Spanish. A broad spectrum of texts is analysed, including the Bible, Buddhist sutras, Beowulf, the fiction of Proust and the theatre of Shakespeare, European Union and UNESCO documents, a range of contemporary films, a travel brochure, a children's cookery book and the translations of Harry Potter. Each chapter comprises an introduction outlining the translation theory or theories, illustrative texts with translations, case studies, a chapter summary, and discussion points and exercises. New features in this fifth edition include: New material to keep up with developments in research and practice; this includes the sociology of translation chapter, where a new case study employs a Bourdieusian approach; there is also newly structured discussion on translation in the digital age, and audiovisual and machine translation; Revised discussion points and updated figures and tables; New in-chapter activities with links in the enhanced ebook to online materials and articles to encourage independent research; An extensive updated companion website with video introductions and journal articles to accompany each chapter, online exercises, an interactive timeline, weblinks, and PowerPoint slides for teacher support. This is a practical, user-friendly textbook ideal for students and researchers on courses in translation and translation studies.

A Companion to Translation Studies Springer Science & Business Media

Computers offer new perspectives in the study of language, allowing us to see phenomena that previously remained obscure because of the limitations of our vantage points. It is not uncommon for computers to be likened to the telescope, or microscope, in this respect. In this pioneering computer-assisted study of translation, Dorothy Kenny suggests another image, that of the kaleidoscope: playful changes of perspective using corpus-processing software allow textual patterns to come into focus and then recede again as others take their place. And against the background of repeated patterns in a corpus, creative uses of language gain a particular prominence. In *Lexis and Creativity in Translation*, Kenny monitors the translation of creative source-text word forms and collocations uncovered in a specially constructed German-English parallel corpus of literary texts. Using an abundance of examples, she reveals evidence of both normalization and ingenious creativity in translation. Her discussion of lexical creativity draws on insights from traditional morphology, structural semantics and, most notably, neo-Firthian corpus linguistics, suggesting that rumours of the demise of linguistics in translation studies are greatly exaggerated. *Lexis and Creativity in Translation* is essential reading for anyone interested in corpus linguistics and its impact so far on translation studies. The book also offers theoretical and practical guidance for researchers who wish to conduct their own corpus-based investigations of translation. No previous knowledge of German, corpus linguistics or computing is assumed.

The Translation of European Union Legislation. A Corpus-based Study of Norms and Modality Cambridge Scholars Pub

A volume of selected, annotated references arranged under specific headings to provide a non-partisan guide to teachers involved in designing courses in translation and/or interpreting.

A Corpus-based Study Oxford University Press, USA

The Oxford Handbook of Translation and Social Practices draws on a wide array of case studies from all over the world to demonstrate the value of different forms of translation - written, oral, audiovisual - as social practices that are essential to achieve sustainability, accessibility, inclusion, multiculturalism, and multilingualism. Edited by Meng Ji and Sara Laviosa, this timely collection illustrates the interactions between translation studies and the social and natural sciences, reformulating the scope of this discipline as a socially-oriented, empirical, and ethical research field in the 21st century.
