The importance of the study of the history of Asia needs no special emphasis, particularly with the emergence of Japan, China and India as major powers of this continent. The present book; History of Asia, is different from other books of this genre, as it connects the ancient and medieval with the modern. It deals with the account of each country in its geographical setting, highlighting those incidents in neighbouring countries which have had some impact upon it. The ancient and medieval periods cover topics like migration, early settlements, formation of kingdoms and empires, socio-economic matters, Islamic penetrations and the advent of Western powers. The modern period is treated in great detail, especially matters like colonisation, impact of Western civilization, the rise of nationalism and the gaining of independence following the Second World War. Current history, which includes aspects like subversion of democracies, the ushering in of military rule, ethnic conflicts, movements for the restoration of democracy, oppression of minorities, economic issues and the possibility of nuclear war — right up to the end of the millennium — has been dealt with in a fascinating way, with maps and a bibliography to stimulate the reader's interest.

This book examines the deep roots of racism in the mental health system. Suman Fernando weaves the histories of racial discourse and clinical practice into a narrative of power, knowledge,

and black suffering in an ostensibly progressive and scientifically grounded system. Drawing on a lifetime of experience as a practicing psychiatrist, he examines how the system has shifted in response to new forms of racism which have emerged since the 1960s, highlighting the widespread pathologization of black people, the impact of Islamophobia on clinical practice after 9/11, and various struggles to reform. Engaging and accessible, this book makes a compelling case for the entrenchment of racism across all aspects of psychiatry and clinical psychology, and calls for a paradigm shift in both theory and practice.

A History of Gujarāt S. Chand Publishing

Sanskrit - the only preserved and the most ancient of all languages, generally proclaimed as language of the gods. According to Indian tradition, Sanskrit has neither beginning nor an end. It is eternal. It is everlasting. Historically, the Sanskrit was adopted, developed and refined by the invading Aryans in the Indus Valley, during 1500 BC. Sanskrit survived as the language of religion, literature and Hindu philosophy for over 3,357 years, dating from about 1500 BC to a close AD 1857. The term Aryans, Indo-Europeans and Indo-European Languages ? frequently used by historians is misleading; it is not correct that the Aryans or the Indo-Europeans were part of a great civilized nation. Aryan is a term that refers to migrants who settled in the Indus Valley; they were a mixed people; wanderers, criminals, mercenaries from the areas now known as Afghanistan, Iran, the tribal areas of Pakistan and Central Asia down to the Caspian Sea. In modern terms they can be identified as Pashtun, Tajik, Uzbek, Hazara, Kamboja, Yusufzai, Afridi, Khilji and the other Turkic tribes. The present-day Talibans and most of the people affiliated with Al-Qaeda are also the descendants of the Aryans.
