The Transhumanist Wager OR Books
On Strategic Nonviolent Conflict delves into the question of how to build a strategy for nonviolent struggle. Covering a variety of topics--such as ways to identify a movement's objectives, preparing a strategic estimate for a nonviolent struggle, and operational planning considerations--this publication contains insights on the similarities between military and nonviolent strategy. It represents a major new contribution to this field of study. Additional topics covered in the book include psychological operations and propaganda, contaminants that may affect the efficiency of a nonviolent movement, and providing consultations and training for members of movements and organizations.

The Imperial Style of Inquiry in Twentieth-Century China MICHIE

Already acclaimed in England as "first-rate" (The Sunday Times); "a model of meticulous, courageous and path-breaking scholarship"(Literary Review); and "absorbing and thoroughly gripping... deserves a lasting place among histories of the war." (The Sunday Telegraph), *Hunting Evil* is the first complete and definitive account of

how the Nazis escaped and were pursued and captured -- or managed to live long lives as fugitives. At the end of the Second World War, an estimated 30,000 Nazi war criminals fled from justice, including some of the highest ranking members of the Nazi Party. Many of them have names that resonate deeply in twentieth-century history -- Eichmann, Mengele, Martin Bormann, and Klaus Barbie -- not just for the monstrosity of their crimes, but also because of the shadowy nature of their post-war existence, holed up in the depths of Latin America, always one step ahead of their pursuers. Aided and abetted by prominent people throughout Europe, they hid in foreboding castles high in the Austrian alps, and were taken in by shady Argentine secret agents. The attempts to bring them to justice are no less dramatic, featuring vengeful Holocaust survivors, inept politicians, and daring plots to kidnap or assassinate the fugitives. In this exhaustively researched and compellingly written work of World War II history and investigative reporting, journalist and novelist Guy Walters gives a comprehensive account of one of the most shocking and important aspects of the war: how the most notorious Nazi war criminals escaped justice, how they were pursued, captured or able to remain free until their natural deaths and how the Nazis were assisted while they were on the run by "helpers" ranging from a Vatican bishop to a

British camel doctor, and even members of Western intelligence services. Based on all new interviews with Nazi hunters and former Nazis and intelligence agents, travels along the actual escape routes, and archival research in Germany, Britain, the United States, Austria, and Italy, *Hunting Evil* authoritatively debunks much of what has previously been understood about Nazis and Nazi hunters in the post war era, including myths about the alleged "Spider" and "Odessa" escape networks and the surprising truth about the world's most legendary Nazi hunter Simon Wiesenthal. From its haunting chronicle of the monstrous mass murders the Nazis perpetrated and the murky details of their postwar existence to the challenges of hunting them down, *Hunting Evil* is a monumental work of nonfiction written with the pacing and intrigue of a thriller.

Beautiful Trouble Berrett-Koehler Publishers

In this timely work, Liu Kang argues that globalization in China is both a historical condition in which the country's gaige

kaifang (reform and opening up) has unfolded and a set of values or ideologies by which it and the rest of the globe are judged. Moreover, globalization signals a significant ascendancy of culture. Liu examines China's current ideological struggles in political discourse, intellectual debate, popular culture, avant-garde literature, the news media, and the internet. With careful textual analysis and observation informed by critical theories and cultural studies, he offers a forceful critique of the Chinese version of globalism that privileges economic development at the expense of social justice and equality.

This book uses a variety of previously untapped sources, including a range of news sources within China itself, weblogs, and interviews with prominent figures, to make a powerful new argument about the causes and consequences of the new Chinese nationalism.

"College athletes are not slaves," writes Pulitzer Prize-winning journalist Taylor Branch in "The Cartel: Inside the Rise and Imminent Fall of the NCAA." "Yet to survey the scene-corporations and universities enriching themselves on the backs of uncompensated young men, whose status as 'student-athletes' deprives them of the right to due process guaranteed by the Constitution-is to catch the unmistakable whiff of the plantation." Branch, best known for his award-winning trilogy about the civil rights movement, "Parting the Waters," argues that decades of greed and self-interest have finally caught up with the NCAA and that the organization is poised to collapse under the weight of its own hypocrisy. From Reggie Bush and Cam Newton to Ohio State and the University of Miami, it's been one big sports scandal after another. But the true

scandal, argues Branch in this gripping, deeply reported narrative, is the parasitic structure of college sports, a business that generates billions of dollars in revenue every year yet fails to provide even workers' compensation for its young performers. The outrage, he writes, is "not that students are getting illegally paid or recruited, it's that two of the noble principles by which the NCAA justifies its existence-'amateurism' and the 'student-athlete'-are cynical hoaxes, legalistic confections propagated by the universities so they can exploit the skills and fame of young athletes. The tragedy at the heart of college sports is not that some college athletes are getting paid, but that more of them are not." A portion of "The Cartel" was first published in different form in the October 2011 issue of "The Atlantic," and it set off a firestorm of controversy and an avalanche of praise. "Sports Illustrated's" Frank Deford, speaking on National Public Radio, said Branch's story "may well be the most important article ever written about college sports." Now the full, landmark story is available. "The Cartel" is classic investigative journalism of the highest order, by one of America's most admired historians. "The Cartel" is published by Byliner through a partnership with "The Atlantic." ABOUT THE AUTHOR Taylor Branch is the author of the three-volume history of the civil-rights movement, "America in the King Years," for which he won the Pulitzer Prize and the National Book Critics Circle Award. Among his many other books are "The Clinton Tapes: Wrestling History with the President" and "Second Wind" (with Bill Russell).

"The Uyghurs is an original and significant contribution to the study of ethnic relations within the People's Republic of China. Very few foreign scholars have been able to study Xinjiang in such detail. Garadner Bovingdon's thoughtful discussion and comprehensive coverage make this must reading for anyone interested in contemporary China."-Peter C. Perdue, Yale University, author of *China Marches West: The Qing Conquest of Central Eurasia* "The Uyghurs is a depth cast study of the failure of the Chinese government to integrate the Uyghurs, one of China's fifty-six nationalities, into the so-called great family of the nation. The book offers a unique perspective to

understand the difficult and on-going process of Chinese nation-state building efforts. It is a must read for anyone who is interested in China's nationality issues and the rise of ethnic nationalism in the post-Cold War world."-Suishen Zhao, University of Denver, author A Nation-State by Construction: Dynamics of Modern Chinese Nationalism "Gardner Bovingdon brings to this project fluency in both Uyghur and Chinese languages, a deep knowledge of Han and Uyghur society and the PRC political system, and a comparative perspective enriched by wide reading in social science literature on identity and nationalism. Though he focuses on political questions, Bovingdon displays a humanist's concern for his subjects as individuals and eschews social science jargon for elegantly turned phrases that crystallize the issues in a memorable way."-James Millward, Georgetown University, author of Eurasian Crossroads: A History of Xinjiang For more than half a century, many Uyghurs, members of a Muslim minority in northwestern China, have sought to achieve greater autonomy or outright independence. Yet the Chinese government has consistently resisted these efforts, countering with repression and a sophisticated strategy of state-sanctioned propaganda that emphasizes interethnic harmony and Chinese nationalism. After decades of struggle, Uyghurs remain passionate about establishing and expanding their power within government, and China's leaders continue to push back, refusing to concede any physical or political ground. Beginning with the history of Xinjiang and its unique population of Chinese Muslims, Gardner Bovingdon follows fifty years of Uyghur discontent, particularly the development of individual and collective acts of

resistance since 1949, as well as the role of various transnational organizations in cultivating dissent. Bovingdon's work provides fresh insight into the practices of nation building and nation challenging, not only in relation to Xinjiang but also in reference to other regions of conflict. His work highlights the influence of international institutions on growing regional autonomy and underscores the role of representation in nationalist politics, as well as the local, regional, and global implications of the "war on terror" on antistate movements. While both the Chinese state and foreign analysts have portrayed Uyghur activists as Muslim terrorists, situating them within global terrorist networks, Bovingdon argues that these assumptions are flawed, drawing a clear line between Islamist ideology and Uyghur nationhood.

Originating in India, the Gypsies arrived in Europe around the 14th century, spreading not only across the entirety of the continent but also immigrating to the

Americas. The first Gypsy migration included farmworkers, blacksmiths, and mercenary soldiers, as well as musicians, fortune-tellers, and entertainers. At first, they were generally welcome as an interesting diversion to the dull routine of that period. Soon, however, they attracted the antagonism of the governing powers, as they have continually done throughout the following centuries. The second edition of the Historical Dictionary of the Gypsies (Romanies) seeks to end such prejudice by clarifying the facts about this nomadic people. Through a list of acronyms, a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on significant persons, places, events, institutions, and aspects of culture, society, economy, and politics, the history of the Gypsies and their culture is told.

Juji Gatame, the cross-body armlock, is the most popular armlock in the world. It has been used in a wide variety of martial arts and combat sports for years. This is a comprehensive, systematic and realistic study of the cross-body armlock. The skills demonstrated in this book have been used, and continue to be used, by athletes at all levels of competition in every combat sport that

allows joint locks. The Encyclopedia is the first book to examine, analyse, catalogue and systematically present this armlock. While the Cross-body Armlock is quite simple in concept, its execution is complex. Author Steve Scott has put together an extensive collection of Juji Gatame applications and variations, drawing on his decades of experience in Judo, Sambo and other forms of submission grappling. With thousands of detailed photographs, this is a comprehensive and thought-provoking examination of Juji Gatame that will be a reliable training reference for years to come.
