authorised feed additives are listed in Annex I of the Register of Feed Additives. The Register of Feed Additives is a useful source of information about the status of feed additives. The register provides information on the authorised feed additive and its conditions for use, such as its purity, specific function and target animal species. Animal feed additives | Food Standards Agency Sensory additives, such as flavourings and colourants, improve the feed's presentation, palatability and stimulate the animal's appetite. For instance, a vanilla extract can increase the appetite of piglets during the period of weaning, or when fed to cows, can ensure optimal animal feeding for the production of milk. Specialty feed ingredients - FEFANA Feed additives are products designed to improve animal health and the natural absorption of feed nutrients. The main focus of our additives are to increase performance and productivity in the animal, on-farm and for your business. Categories include: Health & Performance, Preservatives, Palatability, Functional Lipids, Milk

Products, and Speciality Products. Animal Feed Additives | Pestell Minerals & Ingredients Borregaard is one of the world's leading suppliers of high performance, sustainable additives and ingredients to the animal feed industry. Our products and technical expertise help our customers maximize the quality of their feeds, while lowering costs and increasing profits. Borregaard - Animal Feed Additives Feed additives are substances, micro-organisms or preparations which are intentionally added to feed or water in order to perform one or more of the functions described in Article 5 of Regulation (EC) No 1831/2003 on additives for use in animal nutrition. All feed additives placed on the market in the European Union must be approved under the auspices of the mentioned regulatory framework. Product classification - FEFANAC Commission Recommendation 25/2011 establishing guidelines for the distinction between feed materials, feed additives, biocidal products and veterinary medicinal products. is not legally binding.

Commission Directive 2008/38 establishing a list of intended uses of animal feeds for particular nutritional purposes AIC | Marketing, Labelling and Composition of Feeds ... Our all-natural ingredients allow feed manufacturers to develop more nutritional products, and meat producers to raise healthier animals. Natura Feed serves animal feed manufacturers and animal producers operating in the poultry, swine, ruminants, and aquaculture sectors. We help them raise the nutritional value of their feed, improve animal ...
