ScienceDirect Topics Formerly titled "Wärme- und Stoffübertragung," the journal has been publishing under the title "Heat and Mass Transfer" since 1995. Covers the complete discipline of heat and mass transfer in relation to engineering thermodynamics and fluid mechanics. Heat and Mass Transfer | Home International Journal of Heat and Mass Transfer is the vehicle for the exchange of basic ideas in heat and mass transfer between research workers and engineers throughout the world. It focuses on both analytical and experimental research, with an emphasis on contributions which increase the basic understanding... International Journal of Heat and Mass Transfer - Elsevier Heat transfer is a discipline of thermal engineering that concerns the generation, use, conversion, and exchange of thermal energy between physical systems. Heat transfer is classified into various mechanisms, such as thermal conduction, thermal convection, thermal radiation, and transfer of energy by phase changes. Engineers also consider the transfer of mass of differing chemical species, either cold or hot, to achieve heat transfer.
