Reliability Testing and Improvement : Proceedings of the 2nd Asian International Workshop (AIWARM 2006), Busan, Korea, 24-26 August 2006

Rowman & Littlefield

Throughout the last several decades, Korean companies have become strong global competitors in a wide range of manufacturing industries. How did they achieve this exceptional performance? The Evolution of Tiger Management uncovers the secret of their success through a comprehensive analysis of Korean-style management. It explains how it has developed, why

it works so well, what non-Koreans can learn from it, and what Korean companies need to do to stay competitive in the future. This book is an extended and significantly updated new edition of Tiger Management: Korean companies on world markets (Routledge, 2012). It tells the remarkable stories of how Korean firms, seemingly coming from nowhere, have successfully challenged their Western and Japanese competitors globally. A new chapter highlights the rise of Korean venture firms and start-ups. Next, the essence of Tiger Management is analyzed by showing that it consists of an effective combination of business strategy, leadership, and human resource management practices. Finally, the evolution and future of Tiger Management is discussed by showing how Korean companies have adapted to

changes at home and abroad, and how non-Korean companies can adopt Tiger Management. A new final chapter discusses the way forward for Korean companies.

Coastal structures are an important component in any coastal protection scheme. They directly control wave and storm surge action or to stabilize a beach which provides protection to the coast. This book provides the most up-to-date technical advances on the design and construction of coastal structures and sea defenses. Written by renowned practicing coastal engineers, this edited volume focuses on the latest technology applied in planning, design and construction, effective engineering methodology, unique projects and problems, design and construction challenges, and other lessons learned. Many books have been written about the theoretical treatment of coastal and ocean structures. Much less has been written about the practical practice aspect of ocean structures and sea defenses. This comprehensive book fills the gap. It is an essential source of reference for professionals and researchers in the areas of coastal, ocean, civil, and geotechnical engineering.

A guide to buying a used car or minivan features information on

the strengths and weaknesses of each model, a safety summary, recalls, warranties, and service tips.

The Consolidation of the International Automobile Industry World Scientific

During the past few decades the global auto industry has concentrated into a small number of groups led by GM, Ford, Daimler-Chrysler, VW, Toyota, and Renault. The trend is of great political and economic significance because of the large size of the industry, its importance to the economic health of many countries, and its geographic spread around the globe. Many reasons are commonly cited when trying to explain this rapid corporate consolidation—cost savings, new products and markets, price controls, and labor negotiations chief among them. Frequently, however, mergers do not achieve their stated goals. Merging Traffic explores all these factors and goes on to suggest that, as with the mystique of the automobile itself, other motivations may prevail.

This two-volume-set constitutes the refereed proceedings of the 6th International Conference on Future Information Technology, FutureTech 2011, held in Crete, Greece, in June 2011. The 123 revised full papers presented in both volumes were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on future information technology, IT service and cloud computing; social computing, network, and services; forensics for future generation communication environments; intelligent transportation systems and applications; multimedia and semantic technologies; information science and technology.

Jane's World Railways, 1987-88 Jane's World Railways, 1999-2000

This book provides a comprehensive overview of the current marketing environment in India. It examines the changing dynamics of marketing management against the backdrop of globalization and liberalization, analysing how both marketers and consumers are adapting to radical changes. Insightful perspectives on key issues including market segmentation, brand strategy, product planning, advertising, pricing and distribution strategies as well as challenges of rural marketing are given. This Fourth Edition boasts of incisive coverage of all contemporary concepts and formats of marketing, including retailing, Internet marketing and telemarketing. It is further enriched by varied case studies that are drawn from the Indian experience and will go a long way to inculcate skills of analysis, logical thinking and decision making in students. Valuable not only to students and teachers of marketing management, the book is a must-have for practising managers who want to stay abreast with the latest developments in their field.

Two leading sports authorities explore the culture of soccer around the world, considering the sport as a means to better understand a society's past, present, and future. • Includes both men's and women's soccer • Features lists of winners of World Cups, regional confederations cups, and Olympic Games • Provides sidebars of interesting facts and photos to supplement the text • Offers a multi-disciplinary perspective from across geography, social studies, world cultures, and anthropology
Marine Engineers Review Graphic Communications Group

Widely regarded as the leading authority on voyage charters, this book is the most comprehensive and intellectually-rigorous analysis of the area, is regularly cited in court and by arbitrators, and is the go-to guide for drafting and disputing charterparty contracts. Voyage Charters provides the reader with a clause-by-clause analysis of the two major charterparty forms: the Gencon standard charterparty contract and the Asbatankvoy form. It also delivers thorough treatment of COGSA and the Hague and Hague-Visby Rules, a comparative analysis of English and United States law, and a detailed section on arbitration awards. Key features of the fourth edition: The only textbook to deal specifically with this key area of maritime law Written by an impressive team of highly-regarded maritime authorities from both sides of the Atlantic Contains a wealth of updated English and American case law and arbitrations, as well as addressing broader issues such as Rome II Regulation Convention regarding the conflict of laws Practical user-friendly guide, which is accessible not only to lawyers but also shipping professionals A new, detailed United States law section on COGSA This book is an indispensable, practical guide for both contentious and non-contentious shipping law practitioners, and postgraduate students studying this area of law.

Romania Routledge

The 2006 Asian International Workshop on Advanced Reliability Modeling (AIWARM) is the second symposium in a series of biennial workshops for the dissemination of state-of-art research and the presentation of practice in reliability and maintenance engineering in Asia. It brings together researchers and engineers from not only Asian countries but also all over world to discuss

the state of research and practice in dealing with both reliability issues at the system design phase and maintenance issues at the system operation phase. The theme of AIWARM 2006 is OC reliability testing and improvementOCO. The contributions in this volume cover all the main topics in reliability and maintenance engineering, providing an in-depth presentation of theory and practice. Sample Chapter(s). Chapter 1: Optimal Burn-In for Minimizing Total Warranty Cost (311 KB). Contents: System and Network Reliability; Optimization in Reliability Engineering; Maintenance; Advanced Warranty Modeling; Software Reliability; Acceleration Testing and Failure Analysis; Statistical Analysis and Reliability Modeling; Stochastic Models; Statistical Quality Control. Readership: Graduate students and researchers and as well as reliability, maintenance and industrial engineers."

Investment and Growth ABC-CLIO

This book constitutes the refereed proceedings of the 5th International Conference on Web-Age Information Management, WAIM 2004, held in Dalian, China in July 2004. The 57 revised full papers and 23 revised short and industrial papers presented together with 3 invited contributions were carefully reviewed and selected from 291 submissions. The papers are organized in topical sections on data stream processing, time series data processing, security, mobile computing, cache management, query evaluation, Web search engines, XML, Web services, classification, and data mining.

The Military Balance 2013 is the annual assessment of the military capabilities and defence economics of 171 countries

world-wide. New features of the 2013 edition include; reorganised and expanded analytical essays. New sections on trends in contemporary armed conflicts in Afghanistan and Syria, as well as trends in defence capability areas, with a focus on equipment, technological or doctrinal developments. There is also an essay on trends in defence economics and procurement, one on European defence industries, and another on anti-access/area denial, detailed analysis of regional and national defence policy and economic issues for selected states, updated graphics feature on comparative defence statistics, with focus on defence economics, and major land, sea and, air capability concerns, tables, graphics and analysis of defence economics issues, additional national capability summaries, additional data on, land forces: combat support and combat service support, new graphics and maps on defence capability issues and additional data on cyber capabilities.

Detroit, Michigan, May 2-4, 1989 World Scientific

Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia

but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they

held. An index ensures that these volumes serve as the ideal reference source on GM.
