[Nature Ethics](#) New Catalyst Books

In the spirit of *The Known World* and *The Underground Railroad*, "a miraculous debut" (Washington Post) and "a towering achievement of imagination" (CBS This Morning) about the unlikely bond between two freedmen who are brothers and the Georgia farmer whose alliance will alter their lives, and his, forever. In the waning days of the Civil War, brothers Prentiss and Landry—freed by the Emancipation Proclamation—seek refuge on the homestead of George Walker and his wife, Isabelle. The Walkers, wracked by the loss of their only son to the war, hire the brothers to work their farm, hoping through an unexpected friendship to stanch their grief. Prentiss and Landry, meanwhile, plan to save money for the journey north and a chance to reunite with their mother, who was sold away when they were boys. Parallel to their story runs a forbidden romance between two Confederate soldiers. The young men, recently returned from the war to the town of Old Ox,

hold their trysts in the woods. But when their secret is discovered, the resulting chaos, including a murder, unleashes convulsive repercussions on the entire community. In the aftermath of so much turmoil, it is Isabelle who emerges as an unlikely leader, proffering a healing vision for the land and for the newly free citizens of Old Ox. With candor and sympathy, debut novelist Nathan Harris creates an unforgettable cast of characters, depicting Georgia in the violent crucible of Reconstruction. Equal parts beauty and terror, as gripping as it is moving, *The Sweetness of Water* is an epic whose grandeur locates humanity and love amid the most harrowing circumstances. An Instant New York Times bestseller / An Oprah's Book Club Pick One of President Obama's Favorite Books of 2021 Winner of the Ernest J. Gaines Award for Literary Excellence Longlisted for the Man Booker Prize Longlisted for the 2022 Carnegie Medal for Excellence Longlisted for the Center for Fiction First Novel Prize A Best Book of the Year: Oprah Daily, NPR, Washington Post, Time, Boston Globe, Smithsonian, Chicago Public Library, BookBrowse, and the Oregonian A New York Times Book Review Editors' Choice A July Indie Next Pick **Believers** New Society Pub

Corporate capitalism has ravaged the planet the same way HIV ravages the human body, triggering a critical mass of cascading environmental, economic, social, and political crises. Economic and climate instability, collapsing ecosystems, peak fossil fuels, and devastating resource wars—if the Earth were a patient, her condition would be critical. *Life Rules* offers a comprehensive analysis of our present circumstances, combined with a holistic treatment protocol for restoring health to vulnerable human and natural communities. Predicting that Life will last, but if we don't make some fundamental changes, life as we know it—and a lot of us—won't, *Life Rules* identifies natural laws that have allowed non-human communities to thrive and prosper for several billion years, including: Local self-reliance Mutual interdependence Reliance on non-fossil sources of energy Resource conservation, sharing, and recycling Radically democratic self-organization and governance This sobering yet essentially optimistic manifesto is required reading for anyone concerned about our ability to live within Earth's means. A powerful tool for community transition and cultural transformation, *Life Rules* offers a solution to our global challenges that is at once authentically hopeful, deeply inspiring, and profoundly liberating. Ellen LaConte is acting director

of the EarthWalk Alliance, a contributing editor to Green Horizon Magazine and The Ecozoic, a frequent talk show guest, and publisher of the Starting Point online newsletter. She has written two books about Helen and Scott Nearing, homesteaders and best-selling authors of *Living the Good Life*, and she is the author of the upcoming environmental novel *Afton*.

*A Novel* Direct Authors

Looks beyond individual endangered species to examine the relationship between our actions and complex ecosystems, focusing on species loss and habitat destruction

*In the Shadow of the Mountain* Penguin

A Newbery Honor Book New York Times Bestseller "Wolf Hollow has stayed with me long after I closed the book. It has the feel of an instant classic." —Linda Sue Park, Newbery Medalist and New York Times bestselling author of *A Long Walk to Water* "This book matters." —Sara Pennypacker, New York Times bestselling author of *Pax* Despite growing up in the shadows cast by two world wars, Annabelle has lived a mostly quiet, steady life in her small Pennsylvania town. Until the day new student Betty Glengarry walks into her class. Betty quickly reveals herself to be cruel and manipulative, and though her bullying seems isolated at first, it quickly escalates. Toby, a reclusive World War I veteran, soon becomes the target of Betty's attacks. While others see Toby's strangeness, Annabelle knows only kindness. And as tensions mount in their small community, Annabelle must find the courage to stand as a lone voice for justice. The brilliantly crafted debut of Newbery Honor- and Scott O'Dell Award-winning author Lauren Wolk (*Beyond the Bright Sea*, *Echo Mountain*), *Wolf Hollow* is a haunting tale of America at a crossroads and a time when one girl's resilience, strength, and compassion help to illuminate the darkest corners of history.

*Touching the Void* Simon and Schuster

This book of readings, meditations, rituals and workshop notes prepared on three continents helps us remember that environmental defence is nothing less than 'Self' defence. Including magnificent illustrations of Australia's rainforests, 'Thinking Like a Mountain' provides a context for ritual identification with the natural environment. It helps us experience our place in the web of life -- rather than at the apex of some human-centred pyramid. An important deep ecology educational tool for activist, school and religious groups, it can also be used for personal reflection.

*Minecraft: The Mountain* Henry Holt and Company

Drawing on in-depth interviews with hundreds of the nation's top executives, D. A. Benton explains the 22 vital traits that make a CEO - the leader responsible for making decisions, guiding teams, selling ideas, managing crises, and conquering the mountains before them. You'll penetrate the mystery of why some people make it to the top and some don't, when they're all equally good at their jobs. You'll learn how to avoid getting fired and how to get promoted more quickly, how to enjoy the quality of life you want and deserve, and - if you decide you want to be the Big Boss - how to have the right character traits to get there. These are some of the traits that make a CEO. Are you ready to make them yours? You're gutsy and a little wild - yet modest and in control. You're competitive and tenacious - yet flexible and generous. You're willing to admit mistakes - yet unapologetic. You're secure in yourself - yet constantly improving. You're original and straightforward - yet think before you talk. Make your ascent not only gratifying, but also exhilarating and fun. This is how chiefs run the show - and how you can act like a chief to become a chief, even sooner than you dreamed.

*Balance Point* Farrar, Straus and Giroux

Who would imagine that plants can become master teachers of a radical new way of seeing and interacting with the world? Plants are dynamic and resilient, living in intimate connection with their environment. This book presents an organic way of knowing modeled after the way plants live. When we slow down, turn our attention to plants, study them carefully, and consciously internalize the way they live, a transformation begins. Our thinking becomes more fluid and dynamic; we realize how we are embedded in the world; we become sensitive and responsive to the contexts we meet; and we learn to thrive within a changing world. These are the qualities our culture needs in order to develop a more sustainable, life-supporting relation to our environment. While it is easy to talk about new paradigms and to critique our current state of affairs, it is not so easy to move beyond the status quo. That's why this book is crafted as a practical guide to developing a life-infused way of interacting with the world.

**Thinking Like a Mountain** Princeton University Press

The special anniversary edition of *The Little Engine That Could*™ contains the entire text and original artwork. Young readers, as well as parents and grandparents, will treasure the story of the blue locomotive who exemplifies the power of positive thinking.

*The 22 Vital Traits You Need to Be the Person at the Top* Penguin UK

THIS IS A BOOK ABOUT SELF-SABOTAGE. Why we do it, when we do it, and how to stop doing it-for good. Coexisting but conflicting needs create self-sabotaging behaviors. This is why we resist efforts to change, often until they feel completely futile. But by extracting crucial insight from our most damaging habits, building emotional intelligence by better understanding our brains and bodies, releasing past experiences at a cellular level, and learning to act as our highest potential future selves, we can step out of our own way and into our potential. For centuries, the mountain has been used as a metaphor for the big challenges we face, especially ones that seem impossible to overcome. To scale our mountains, we actually have to do the deep internal work of excavating trauma, building resilience, and adjusting how we show up for the climb. In the end, it is not the mountain we master, but ourselves.

*How to Think Like a CEO* GENERAL PRESS

A provocative argument that environmental thinking would be better off if it dropped the concept of "nature" altogether and spoke instead of the built environment.

*The Dictionary of Obscure Sorrows* Basic Books

"In the West, shortsighted human self-interest has resulted in devastating environmental losses. Fur trade beaver trapping meant streams and wetland ecosystems deteriorated. Grazing livestock depleted native bunch grasses. Migrating Idaho Salmon once reached the ocean in ten to fourteen days. Now dams stretch the journey to fifty or more. The author's goal is to encourage people to think like a mountain--to consider long-term consequences. His essays examine cultural conflicts over resource extraction, threats to watersheds by abandoned mines, wolf recovery in the northern Rocky Mountains, the lingering effects of livestock grazing on western rangelands, and the rapidly disappearing sage grouse. They discuss the importance of forest fires, the value of beavers, the failed promises of salmon hatcheries, the reasons behind the decline of the timber industry in the Pacific Northwest, and how unlikely allies learned to set aside their differences in order to resolve long-standing disputes."--

**To Think Like a Mountain** Penguin

This stunning fantasy inspired by Chinese folklore is a companion novel to *Starry River of the Sky* and the New York Times bestselling and National Book Award finalist *When the Sea Turned to Silver*. In the valley of Fruitless mountain, a young girl named Minli lives in a ramshackle hut with her parents. In the evenings, her father regales her with old folktales of the Jade Dragon and the Old Man on the Moon, who knows the answers to all of life's questions. Inspired by these stories, Minli sets off on an extraordinary journey to find the Old Man on the Moon to ask him how she can change her family's fortune. She encounters an assorted cast of characters and magical creatures along the way, including a dragon who accompanies her on her quest for the ultimate answer. Grace Lin, author of the beloved *Year of the Dog* and *Year of the Rat* returns with a wondrous story of adventure, faith, and friendship. A fantasy crossed with Chinese folklore, *Where the Mountain Meets the Moon* is a timeless story reminiscent of *The Wizard of Oz* and *Kelly Barnhill's The Girl Who Drank the Moon*. Her beautiful illustrations, printed in full-color, accompany the text throughout. Once again, she has created a charming, engaging book for young readers.

**Towards a Council of All Beings** MIT Press

"This book offers a short, spirited defense of rhetoric and the liberal arts as catalysts for precision, invention, and empathy in today's world. The author, a professor of Shakespeare studies at a liberal arts college and a parent of school-age children, argues that high-stakes testing and a culture of assessment have altered how and what students are taught, as courses across the arts, humanities, and sciences increasingly are set aside to make room for joyless, mechanical reading and math instruction. Students have been robbed of a complete education, their imaginations stunted by this myopic focus on bare literacy and numeracy. Education is about thinking, Newstok argues, rather than the mastery of a set of rigidly defined skills, and the seemingly rigid pedagogy of the English Renaissance produced some of the most compelling and influential examples of liberated thinking. Each of the fourteen chapters explores an essential element of Shakespeare's world and work, aligns it with the ideas of other thinkers and writers in modern times, and suggests opportunities for further reading. Chapters on craft, technology, attention, freedom, and related topics combine past and present ideas about education to build a case for the value of the past, the pleasure of thinking, and the limitations of modern educational practices and prejudices"--

**Environmental Philosophy After the End of Nature** Harvard University Press

When initially published more than twenty years ago, *Thinking Like a Mountain* was the first of a

handful of efforts to capture the work and thought of America's most significant environmental thinker, Aldo Leopold. This new edition of Susan Flader's masterful account of Leopold's philosophical journey, including a new preface reviewing recent Leopold scholarship, makes this classic case study available again and brings much-deserved attention to the continuing influence and importance of Leopold today. *Thinking Like a Mountain* unfolds with Flader's close analysis of Leopold's essay of the same title, which explores issues of predation by studying the interrelationships between deer, wolves, and forests. Flader shows how his approach to wildlife management and species preservation evolved from his experiences restoring the deer population in the Southwestern United States, his study of the German system of forest and wildlife management, and his efforts to combat the overpopulation of deer in Wisconsin. His own intellectual development parallels the formation of the conservation movement, reflecting his struggle to understand the relationship between the land and its human and animal inhabitants. Drawing from the entire corpus of Leopold's works, including published and unpublished writing, correspondence, field notes, and journals, Flader places Leopold in his historical context. In addition, a biographical sketch draws on personal interviews with family, friends, and colleagues to illuminate his many roles as scientist, philosopher, citizen, policy maker, and teacher. Flader's insight and profound appreciation of the issues make *Thinking Like a Mountain* a standard source for readers interested in Leopold scholarship and the development of ecology and conservation in the twentieth century.

*Thinking Like a Mountain* Vintage

Mountaineering has served as a metaphor for civilization triumphant. A fascinating study of the first ascents of the major Alpine peaks and Mt. Everest, *The Summits of Modern Man* reveals the significance of our encounters with the world's most forbidding heights and how difficult it is to imagine nature in terms other than conquest and domination.

*Searching for a Spiritual Missing Link* Rowman & Littlefield

Dr. Lucille Boggs, a maverick scientist at a large western university, had been uncovering answers as to why humans remain indifferent to the looming ecological collapse that jeopardizes the world today. Yet her untimely death in 1999 threatened to put an end to her extraordinary discoveries. Through an ingenious manipulation involving her Last Will and Testament, however, she manages to goad a nephew into following a mysterious trail she had so nearly completed -- a journey that takes him and his wife to remote territories, and ultimately, leads them back to the truths they hold inside.

*The Cambridge Introduction to Literature and the Environment* Thinking Like a MountainTowards a Council of All BeingsThis book of readings, meditations, rituals and workshop notes prepared on three continents provides a context for ritual identification with the natural environment. As relevant today as when it was originally published in 1988, this classic of the sustainability movement helps us experience our place in the web of life - rather than at the apex of some human-centered pyramid. An important deep ecology educational tool for activist, school and religious groups, it can also be used for personal reflection.Thinking Like a MountainTowards a Council of All Beings

Essential reading for business leaders and policymakers, an in-depth investigation of red teaming, the practice of inhabiting the perspective of potential competitors to gain a strategic advantage Red teaming. The concept is as old as the Devil's Advocate, the eleventh-century Vatican official charged with discrediting candidates for sainthood. Today, red teams are used widely in both the public and the private sector by those seeking to better understand the interests, intentions, and capabilities of institutional rivals. In the right circumstances, red teams can yield impressive results, giving businesses an edge over their competition, poking holes in vital intelligence estimates, and troubleshooting dangerous military missions long before boots are on the ground. But not all red teams are created equal; indeed, some cause more damage than they prevent. Drawing on a fascinating range of case studies, *Red Team* shows not only how to create and empower red teams, but also what to do with the information they produce. In this vivid, deeply-informed account, national security expert Micah Zenko provides the definitive book on this important strategy -- full of vital insights for decision makers of all kinds.

*Aldo Leopold and the Evolution of an Ecological Attitude toward Deer, Wolves, and Forests* Penguin In *Nature Ethics: An Ecofeminist Perspective*, Marti Kheel explores the underlying worldview of 'nature ethics,' offering an alternative ecofeminist approach. Seeking to heal the divisions between the seemingly disparate movements and philosophies of feminism, animal advocacy, environmental ethics, and holistic health, Kheel proposes an ecofeminist philosophy that

underscores the importance of empathy and care for individual beings as well as larger wholes.  
*My Side of the Mountain* Del Rey

This book of readings, meditations, rituals and workshop notes prepared on three continents provides a context for ritual identification with the natural environment. As relevant today as when it was originally published in 1988, this classic of the sustainability movement helps us experience our place in the web of life - rather than at the apex of some human-centered pyramid. An

important deep ecology educational tool for activist, school and religious groups, it can also be used for personal reflection.

[Thinking Like a Mountain](#) Crown

Few books have had a greater impact than *A Sand County Almanac*, which many credit with launching a revolution in land management. Written as a series of sketches based principally upon

the flora and fauna in a rural part of Wisconsin, the book, originally published by Oxford in 1949, gathers informal pieces written by Leopold over a forty-year period as he traveled through the woodlands of Wisconsin, Iowa, Arizona, Sonora, Oregon, Manitoba, and elsewhere; a final section addresses the philosophical issues involved in wildlife conservation. Beloved for its description and evocation of the natural world, Leopold's book, which has sold well over 2 million copies, remains a foundational text in environmental science and a national treasure.
