Sharing [Knowledge, Organizational Evolution, and Market Creation] presents an integrative framework for understanding organizational change in emerging economies. . . the book distills a tremendous amount of research relevant for understanding the culture of business in India. . . This book is important for its contribution to the literature on the rise of Indian business and economy. It has a wide reaching theoretical scope

and makes significant linkages with cognitive, behavioral and cultural theories. . . Ms. Surie s research on Indian firms thus presents a rare glimpse into the organizational and economic forces that are globalizing Indian industry from steel to software. Dinesh Sharma, Far Eastern Economic Review An astute study that especially focuses on the invaluable qualities of entrepreneurship and distributive innovation. . . . Exhaustively researched, and featuring appendices

packed with additional tables and statistics of hard data, Knowledge, Organizational Evolution, and Market Creation is especially recommended for college library business and economic studies shelves. Midwest Book Review The Economics Shelf India has become a global economic powerhouse and Sud de Surie offers in this book the first systematic analysis of the global spread of Indian businesses. She skillfully maps the foreign expansion of Indian firms

in five different industries, from steel, automotive components and machinery to software and biotechnology, showing that economic, political and cultural factors need to be present in order for companies to internationalize successfully. This book sets a new standard for research on international business. It is essential reading for those interested in the increasing role of emerging companies in global competition. Mauro F. Guillén, University of

Pennsylvania, US Where do new multinationals come from? How do firms in developing economies become global players? Gita Sud de Surie provides new perspectives on internationalization and the multinational corporation by focusing on firms in emerging markets rather than established multinationals in industrialized economies. She shows that firms in developing countries are not passive recipients of technology; rather, the attempt to absorb new technologies

builds capabilities and generates new aspirations propelling them from being adopters of technology to innovators and participants in the global knowledge economy. Knowledge, Organizational Evolution, and Market Creation documents the emergence of the Indian multinational by looking at data from firms in the old economy, such as those in manufacturing, steel-making, automotive components and heavy machinery and the new economy such as software

and biotechnology. The author provides insights on knowledge transfer, innovation and capability building processes through in-depth case studies in these industries and suggests that both entrepreneurship and distributed innovation are critical for the growth of firms globally. This book will be valuable for scholars in international management, business policy and strategy, organization and management theory, economic sociology and history and technology

and innovation management. Analysts, consultants and executives will find many useful insights in this book as well.

Electronic Participation IGI Global

This international Handbook provides a comprehensive overview of key topics, debates and issues within the now well-established field of Knowledge Management (KM). With contributions from a range of highly-skilled authors, diverse and multi-disciplinary approaches towards KM

are explored in this fantastic new reference work. Topics covered include performance, ethics, sustainability and cross-cultural management, making this an equally important read to academics and practitioners working in areas such as technology, education and engineering. By analysing how the field of KM has developed over the years, as well as presenting new methods to be implemented in the workplace, this Handbook outlines a research

agenda for the future of organisational learning and innovation.

### Policy and Governance

#### Applications Springer

The idea of managing and transforming tacit to explicit knowledge is getting more and more attention in public systems domain. It has been quite sometime that authors, researchers and managers have come to realize that employees, processes and systems of decision-making in the organizations are a great reservoir of tacit knowledge. It is an

important challenge to build and manage systems that can capture, store, retrieve and build new knowledge base for effective decision-making and yet have a human interface. This book is an eye opener for people having interest in knowledge management and knowledge management systems in modern organizations. This book covers ideas, models, conceptual papers and case studies covering the whole globe through the lenses of authors of different

continents. For good governance and effective management of public systems, the authors have developed knowledge management processes, models and systems that can have universal appeal and applicability. The book has sixteen, well researched, thought provoking papers and case studies from India, Europe, Brazil and USA. The judicious mix of conceptual papers and case studies will help the students/managers to understand and internalize the process

and stages of knowledge management from different countries. It will also make them visualize the practice of knowledge management across the diverse organizations and countries.

*Information Diffusion Management and Knowledge Sharing: Breakthroughs in Research and Practice*  
Academic Conferences Limited

This book constitutes the proceedings of the 9th IFIP WG 8.5 International Conference on Electronic Participation, ePart 2017,

held in St. Petersburg, Russia, in September 2017. The 11 revised full papers presented in this book were carefully reviewed and selected from 14 submissions. The papers reflect completed multi-disciplinary research ranging from policy analysis and conceptual modeling to programming and visualization of simulation models. They are organized in four topical threads: methodological issues in e-participation; e-participation implementations; policy

modeling and policy informatics; critical reflections.

**Handbook of Research on Tacit Knowledge Management for Organizational Success**

Springer

Within the past 10 years, tremendous innovations have been brought forth in information diffusion and management. Such technologies as social media have transformed the way that information is disseminated and used, making it critical to understand its distribution through these mediums.

With the consistent creation and wide availability of information, it has become imperative to remain updated on the latest trends and applications in this field. Information Diffusion Management and Knowledge Sharing: Breakthroughs in Research and Practice examines the trends, models, challenges, issues, and strategies of information diffusion and management from a global context. Highlighting a range of topics such as influence

maximization, information spread control, and social influence, this publication is an ideal reference source for managers, librarians, information systems specialists, professionals, researchers, and administrators seeking current research on the theories and applications of global information management.

**The Strategic Knowledge Management Handbook**

"This book is a detailed resource on knowledge

management and innovations that has been written and edited to provide flexibility and in-depth knowledge management innovations, strategies, and practices"-  
-Provided by publisher.

*The Impact of Organisational Culture On Knowledge Management*  
IGI Global  
Challenges and Issues in Knowledge Management – the fifth volume in the Research on Management Consulting series – presents sixteen chapters that explore these various perspectives, focusing on

knowledge management within the context of the management consulting industry, the dynamics associated with knowledge sharing and dissemination, methodological approaches to studying knowledge in organizations, and reflections on knowledge management and management consulting. As the chapters underscore, it is important to ensure that KM initiatives are aligned with the needs of the organization and its

members, that the KM system is “owned” by organizational members with particular emphasis on executive sponsorship and team member acceptance, and that it be understood as an ongoing process rather than simply another management objective or faddish consulting tool. The focus, therefore, should be on how knowledge processes can be facilitated, leveraged and utilized in organizational value creation.

**Management** Springer Nature

Community college and university faculty members changing their practice of teaching have reported benefits to participating in peer support within communities of practice that offer an online knowledge sharing space. The ability of such online knowledge sharing to provide opportunities for collaborative knowledge building has made fostering a viable online knowledge sharing space

within a community of practice a goal of instructional innovation projects. However, motivating members to participate in knowledge sharing and generating sufficient member commitment to sustain the online knowledge sharing has proven difficult to accomplish. This study therefore addressed the question "How do cost and benefit factors relate to participation in online knowledge sharing in communities of practice meant to support efforts

to improve instruction?" Kankanhalli, Tan, and Wei's (2005) model of knowledge sharing as an individual cost and benefit analysis decision influenced by institutional context was applied to online knowledge sharing within communities of practice supporting faculty innovation. Online knowledge sharing was defined as members posting information to the online site for a community of practice. Registrants to the National Science Foundation's Advanced

Technological Program's 2011 Principal Investigator's Conference were invited by email to complete an online version of the original study's survey modified for the new population. A total of 174 recipients (24.4% of the 712 invited) started and 153 (21.5%) finished the survey. The hypotheses were assessed with Moderated Simultaneous Regression. Participation in online knowledge sharing was significantly increased among contributors who identified knowledge self-

efficacy (adjusted Beta = .18,  $p = .047$ ) and enjoyment in helping others (adjusted Beta = .24,  $p = .011$ ) with participation. However, reciprocity and generalized trust did not moderate the influence of pro-sharing norms and participation effort on the respondent's participation. These findings suggest research is needed to identify other benefits to participation for the participants. Understanding what motivates participation may aid managers of

communities of practice and projects supporting faculty innovation to improve participant support so as to more effectively increase and sustain participation. *Sharing and Exchanging Knowledge in Networked Environments* Emerald Group Publishing  
The internet has grown to become one of the largest communication hubs in history. With its ability to share content and create community bonds, it has seen many fandoms and online social communities develop within the past

decades. While there are some detriments to these communities, there are also many benefits and potential uses for the betterment of society. The Research Anthology on Fandoms, Online Social Communities, and Pop Culture explores the ways in which the internet has presented itself as a platform for communities to gather. This essential reference source discusses the engagement of these communities, social media use, and the uses of these communities for

education. Covering topics such as digital communities, transmedia language learning, and digital humanities, this book is a vital tool for educators of K-12 and higher education, digital folklorists, sociologists, communications researchers, online administrators, community leaders, and academicians.

*Leading Issues in Knowledge Management Research* IOS Press

In this volume organizational learning theory is used to analyse

various practices of managing and facilitating knowledge sharing within companies. Experiences with three types of knowledge sharing, namely knowledge acquisition, knowledge reuse, and knowledge creation, at ten large companies are discussed and analyzed. This critical analysis leads to the identification of traps and obstacles when managing knowledge sharing, when supporting knowledge sharing with IT tools, and when organizations try to learn from knowledge

sharing practices. The identification of these risks is followed by a discussion of how organizations can avoid them. This work will be of interest to researchers and practitioners working in organization science and business administration. Also, consultants and organizations at large will find the book useful as it will provide them with insights into how other organizations manage and facilitate knowledge sharing and how potential failures can be prevented.

*Costs, Benefits, and Participation in Online Knowledge Sharing in Communities of Practice for Faculty* Routledge  
 Due to the development of mobile and Web 2.0 technology, knowledge transfer, storage and retrieval have become much more rapid. In recent years, there have been more and more new and interesting findings in the research field of knowledge management. This book aims to introduce readers to the recent research topics, it is titled "New Research on

Knowledge Management Applications and Lesson Learned" and includes 14 chapters. This book focuses on introducing the applications of KM technologies and methods to various fields. It shares the practical experiences and limitations of those applications. It is expected that this book provides relevant information about new research trends in comprehensive and novel knowledge management studies, and that it serves as an important resource for researchers, teachers

and students, and for the development of practices in the knowledge management field. ECKM 2013 IGI Global 'Learning through Knowledge Management' provides an insightful overview of the main issues integrating learning and Knowledge Management. It offers a rich resource of case examples that highlight Knowledge Management in practice. The text explores and defines learning and Knowledge Management concepts, and deals with the

elements that play an important part in determining implementation success in the organization. The chapters present a managerially oriented discussion of the following key areas: \* The role of processes in managing knowledge \* The behavioural side of Knowledge Management \* Leadership reflexes for knowledge management success \* The key features of Information Technology required for Knowledge Management \* The future of Knowledge

Management as part of organization management. There are many case studies which include: British Airways BP Amoco Ford Hewlett Packard Xerox Swedish Police IBM The case studies encompass a diverse and broad range of sectors, maturity of practice, problems and approaches to Knowledge Management.

**Applications and Challenges** Excel Books India Knowledge Management, Organizational Intelligence and Learning,

and Complexity is the component of Encyclopedia of Technology, Information, and Systems Management Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. The Theme on Knowledge Management, Organizational Intelligence and Learning, and Complexity in the Encyclopedia of Technology, Information, and Systems Management Resources provides the

latest scientific insights into the evolution of complexity in both the natural and social realms. Emerging perspectives from the fields of knowledge management, computer-based simulation and the organizational sciences are presented as tools for understanding and supporting this evolving complexity and the earth's life support systems. These three volumes are aimed at the following a wide spectrum of audiences from the merely curious to those

seeking in-depth knowledge: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers and NGOs.  
Handbook of Knowledge Management for Sustainable Water Systems Quality Press  
 Given the widespread, frequent use of social networks as a means for people to communicate and share their interests, it comes as no surprise that they have become an

important tool for businesses and business networking. The Handbook of Research on Business Social Networking: Organizational, Managerial, and Technological Dimensions investigates the beginning of social networks and provides perspectives on how they can enhance business. This two-volume reference discusses the main issues, challenges, opportunities, and trends related to the range of new developments and applications in business

social networking. Social networks and their integration in businesses are be addressed using technological, organizational, managerial, and social perspectives with the aim of disseminating current developments, case studies, new integrated approaches, and practical solutions and applications. *Knowledge Management in Healthcare* Kogan Page Publishers  
Police Leadership as Practice applies a leadership-as-practice approach (emphasising

leader-employee relationships) to law enforcement. This book provides a progressive and collaborative leadership text for students of law enforcement, as well as insights into leadership dynamics in all organisations for students and researchers of business and management. The police leadership-as-practice perspective provides a holistic understanding of leadership in the police, identifying factors that inhibit and promote

learning. It refers to four main components as dynamic and continuously evolving processes:  
Strategies: social mission and organisation, along with strategies as practice  
Community: organisational and police culture, identity and belonging, community of practice and competencies  
Participation: sense-making and discretion; power and politics  
Activities: learning as practice, change and change management as practice  
Practical and

enriched with case studies, examples and best practice, the textbook is also rigorously research based. Authored by a professor of business and management with specialist knowledge in police leadership, it brings the cutting edge of leadership thinking to the practicalities of policing. It is essential reading for those engaged with policing, leadership roles, and management.

*Water Governance, Policy and Knowledge Transfer*

Routledge

This volume offers a

simple, systematic guide to creating a knowledge sharing practice in your organization. It shows how to build the enabling environment and develop the skills needed to capture and share knowledge gained from operational experiences to improve performance and scale-up successes. Its recommendations are grounded on the insights gained from the past seven years of collaboration between the World Bank and its clients around the world—ministries and

national agencies operating in various sectors—who are working to strengthen their operations through robust knowledge sharing. While informed by the academic literature on knowledge management and organizational learning, this handbook's operational background and many real-world examples and tips provide a missing, practical foundation for public sector officials in developing countries and for development practitioners. However,

though written with a public sector audience in mind, the overall concepts and approaches will also hold true for most organizations in the private sector and the developed world.

#### **ICICKM IAP**

The Fraunhofer Competence Center Knowledge Management presents in this second edition its up-dated and extended research results. In doing so it describes best practices in knowledge management from leading companies and

shows how to integrate such activities into the daily business tasks and processes, how to motivate people and which capabilities and skills are required. It concludes with an overview of the leading knowledge management projects in several European countries. Springer Science & Business Media  
This comprehensive text introduces public management students and government and nonprofit administrators to the principles and

practices of Knowledge Management. The first book to focus exclusively on knowledge management techniques in government agencies, it covers such important concepts as collecting, categorizing, processing, distributing, and archiving critical organization data and information - and then converting and disseminating these resources to all who need to share in the organizational knowledge. Written in an easy-to-read, non-technical style, the book includes a

thorough review of the current literature in the field as well as a comprehensive presentation of Knowledge Management techniques. Extensive illustrations, models, checklists, and instructions lead readers through the steps involved in instituting KM programs in government and non-profit agencies.

**Research Anthology on Fandoms, Online Social Communities, and Pop Culture** Academic Conferences Limited  
Public policy has a

dynamic effect on multiple facets of modern society. Methods for managing and engaging the public sphere continue to change conceptually across the globe, impacting the ways that governments and citizens interact both within and across borders. Management and Participation in the Public Sphere is a definitive reference source for the latest scholarly research on the interplay of public affairs and the domestic realm, providing innovative methods on

managing public policy across various nations, cultures, and governments. Featuring expansive coverage on a multitude of relevant topics in civic involvement, information technology, and modes of government, this publication is a pivotal reference source for researchers, students, and professionals seeking current developments in novel approaches to public policy studies. This publication features timely, research-based chapters on the critical

issues of public policy  
including, but not limited  
to, archival paradigms,

Internet censorship,  
media control, civic  
engagement, virtual  
public spaces, online

activism, higher  
education, and public-  
private partnerships.
