The definitive story of American health care today—its causes, consequences, and confusions In March 2010, the Affordable Care Act was signed into law. It was the most extensive reform of America's health care system since at least the creation of Medicare in 1965, and maybe ever. The ACA was controversial and highly political, and the law faced legal challenges reaching all the way to the Supreme Court; it even precipitated a government shutdown. It was a signature piece of legislation for President Obama's first term, and also a ball and chain for his

second. Ezekiel J. Emanuel, a professor of medical ethics and health policy at the University of Pennsylvania who also served as a special adviser to the White House on health care reform, has written a brilliant diagnostic explanation of why health care in America has become such a divisive social issue, how money and medicine have their own—quite distinct—American story, and why reform has bedeviled presidents of the left and right for more than one hundred years. Emanuel also explains exactly how the ACA reforms are reshaping the health care system now. He forecasts the future, identifying six mega trends in health that will determine the market for health care to 2020 and beyond. His predictions are bold, provocative, and uniquely well-informed. Health care—one of America's largest employment sectors, with an economy the size of the GDP of France—has never had a more comprehensive or authoritative interpreter.

The Wildland Fire Incident Management Field Guide is a revision of what used to be called the Fireline Handbook, PMS 410-1. This guide has been renamed because, over time, the original purpose of the Fireline Handbook had been replaced by the Incident Response Pocket Guide, PMS 461. As a result, this new guide is aimed at a different audience, and it was felt a new name was in order.

Now in its 5th edition, Shiphandling for the Mariner is the classic and definitive text on the art of practical shiphandling skills for large, modern commercial vessels. Written by a father and son team of pilots, along with contributions from other expert pilots

and shipmasters, this compendium follows a nontechnical format that stresses maneuvers used routinely in the field. The text covers essential maneuvers used in docking, undocking, and shiphandling, plus uncommon maneuvers such as docking at single-point and multiple-buoy moorings, use of anchors in shiphandling, offshore lightering, and transiting of locks and canals. Bridge practices in pilot waters and training techniques, including simulator training are also discussed. Updated for the 5th edition: squat and under keel clearance, current practices for bridge resource management, and the use of laptop navigation systems and ECDIS in pilotage waters. Shiphandling for the Mariner is ideal for those with a foundation of practical knowledge looking to advance and master shiphandling skills that are essential to the marine profession.

Moving beyond the outline format used by most students, this book uses a checklist format to lead students through the questions they need to ask and answer to fully analyze the legal questions they are trying to resolve. It assembles the different issues, presenting a clear guide to procedural analysis that students can draw upon when writing their exams. Other study aids provide sample problems, but this book offers a systematic approach to problem solving.

This e-book package contains a copy of International Medical Guide for Ships Third edition and a copy of the Quantification Addendum which contains recommended quantities indications and dosing for 55 medicines listed in the International Medical Guide for Ships 3rd edition. The third edition of the International Medical Guide for Ships shows designated first-aid providers how to diagnose treat and prevent the health problems of seafarers on board ship. Since its first publication in 1967 the International Medical Guide for Ships has been a standard reference for medical care on board ships. The second edition written in 1988 was translated into more than 30 languages and has been used in tens of thousands of ships. This the third edition contains fully updated recommendations aimed to promote and protect the health of seafarers and is consistent with the latest revisions of both the WHO Model List of Essential Medicines and the International Health Regulations. The International Labour Organization's Maritime Labour Convention 2006 stipulates that

all ships shall carry a medicine chest medical equipment and a medical guide. The International Medical Guide for Ships supports a main principal of that convention; to ensure that seafarers are given health protection and medical care as comparable as possible to that which is generally available to workers ashore. By carrying this guide on board ships and following its instructions countries can both fulfill their obligations under the terms of the Maritime Labour Convention 2006 and ensure the best possible health outcomes for their seafaring population. The Quantification Addendum contains recommended quantities indications and dosing for 55 medicines listed in the International Medical Guide for Ships 3rd edition. The quantities are based on three types of ships: . ocean-going ships with crews of 25-40 and no doctor (Category A); . coastal ships with crews of up to 25 that travel no more than 24 hours from a port of call (Category B); and . small boats and private craft with crews of 15 or less and usually travelling no more than a few hours from a port of call (Category C). These quantities have been updated to reflect the decrease of crew numbers on most ships and calculated for voyages of one month. This companion volume to the International Medical Guide for Ships provides essential guidance to all those who involved in the procurement purchasing stock maintenance and use of medicines to promote and protect the health of seafarers worldwide.

A clever host/hostess is able to reach a proper mixture of protocol and common sense that will enable guests to enjoy themselves completely. If this is accomplished, an event is truly successful.
