In the wake of the financial and refugee crisis, economic and social insecurity, Brexit, the current coronavirus pandemic and its attendant economic and social upheavals, identitarian movements are gaining ground worldwide. Touting visions of impending doom and gloom, including overpopulation and social decline, they fan fears and peddle purportedly 'common sense' solutions and promises that breed exclusion and intolerance. All of Europe is witnessing the political ascent of right-wing populist parties: UKIP in the UK, Dansk Folkeparti (DF) in Denmark, FPÖ in Austria, AfD in Germany, Vox in Spain and SVP in Switzerland, to name just a few. Swiss photographer Christian Lutz has documented right-wing populist people, movements and hot spots all over Europe for his latest series, Citizens. A far cry from the usual polarized coverage in the mass media, Lutz's multi-layered photographic approach involves noiseless pictorial expressions of deep seated despair in the form of candid portraits of party leaders and followers alike and shots of their rallies, post-industrial

landscapes, bars and hangouts.0.

A landmark new history from design journalist Nick Hull, Land Rover Design – 70 years of Success offers a detailed insight to the company's design story, from the early days of Land Rover in Solihull to the latest generation of the Range Rover Velar in 2018. The Land Rover was born from a desperate need by the Rover Company to develop a stop-gap model to provide cashflow in the post-war years. The original aim of a simple 4x4 agricultural tool soon developed into a multi-purpose vehicle that became the mainstay of the British Army and produced numerous offshoots for the emergency services, police, forestry and aid agencies worldwide. This book details the personalities involved in the various projects since the late 1940s up to today: the designers, modellers and studio engineers. It charts the development of Land Rover and Range Rover projects in the UK, particularly those designed in the Gaydon studio that opened in 1996, and is still a key part of JLR's design resource. From the early days of chalk drawings and wooden models to today's digital renderings and milled clays for the latest Range Rover Evoque, Land Rover's designers and technicians have never been short of creativity. This book tells their story, in their own words, and is a fitting tribute to the spirit and ethos of Land Rover design and engineering.

In May 1958, one of the world's largest motor manufacturers unveiled a diminutive two-seater that would take the world by storm. Small in stature yet able to punch well above its weight, the Austin-Healey Sprite rapidly gained an enthusiastic following among keen drivers, as well as an impressive record in competition. Being neither expensive nor exotic, for many motorists the Sprite opened the door to sports car ownership and, in so doing, its commercial success was almost guaranteed. With
