ADC-4B1 ESCO PDF Guide to Biosafety and Biological Safety Cabinets This booklet was developed as a guide to biological safety cabinets that provides basic knowledge of biosafety and biological safety cabinets. The information presented is unbiased and generic in nature compiled with help from experienced microbiologists, engineers and safety enclosure users.

Esco | Guide to Biosafety and Biological Safety Cabinets Guide to Ductless Fume Cabinets A ductless fume hood is a device which recirculates filtered air from a hood or enclosure directly back into the working environment. These hoods are unique in that the contaminated air is not vented to the outside through a system of ducts, unlike conventional fume hoods.
