The #1 New York Times bestselling memoir of U.S. Navy Seal Chris Kyle, and the source for Clint Eastwood's blockbuster movie which was nominated for six academy awards, including best picture. From 1999 to 2009, U.S. Navy SEAL Chris Kyle recorded the most career sniper kills in United States military history. His fellow American warriors, whom he protected with deadly precision from rooftops and stealth positions during the Iraq War, called him

"The Legend"; meanwhile, the enemy feared him so much they named him al-Shaitan ("the devil") and placed a bounty on his head. Kyle, who was tragically killed in 2013, writes honestly about the pain of war—including the deaths of two close SEAL teammates—and in moving first-person passages throughout, his wife, Taya, speaks openly about the strains of war on their family, as well as on Chris. Gripping and unforgettable, Kyle's masterful account of his extraordinary battlefield experiences ranks as one of the great war memoirs of all time. *A User Guide for Observation Class Remotely Operated Vehicles* John Wiley

Paco Sullivan is the only man in Alpha Company to survive a cataclysmic Viet Cong attack on Fire Base Harriette in Vietnam. Everyone else is annihilated. When a medic finally rescues Paco almost two days later, he is waiting to die, flies and maggots covering his burnt, shattered body. He winds up back in the US with his legs full of pins, daily rations of Librium and Valium, and no sense of what to do next. One evening, on the tail of a rainstorm, he limps off the bus and into the small town of Boone, determined to find a real job and

a real bed—but no matter how hard he works, nothing muffles the anguish in his mind and body. Brilliantly and vividly written, Paco's Story—winner of a National Book Award—plunges you into the violence and casual cruelty of the Vietnam War, and the ghostly aftermath that often dealt the harshest blows.

"Like Bastard Out of Carolina, ffitch's electrifying debut novel is a paean to independence and a protest against the materialism of our age." —O: The Oprah Magazine "Delightfully raucous." —Sam Sacks, The Wall Street Journal Helen arrives in Appalachian Ohio full of love and her boyfriend's ideas for living off the land. Too soon, with winter coming,

he calls it quits. Helped by Rudy—her government-questioning, wisdom-spouting, seasonal-affective-disordered boss—and a neighbor couple, Helen makes it to spring. Those neighbors, Karen and Lily, are awaiting the arrival of their first child, a boy, which means their time at the Women’s Land Trust must end. So Helen invites the new family to throw in with her—they’ll split the work and the food, build a house, and make a life that sustains them, if barely, for years. Then young Perley decides he wants to go to school. And Rudy sets up a fruit-tree nursery on the pipeline easement edging their land. The outside world is brought clamoring into their makeshift family. Set in a region known for its independent spirit, *Stay and Fight* shakes up what it means to be a family,

to live well, to make peace with nature and make deals with the system. It is a protest novel that challenges our notions of effective action. It is a family novel that refuses to limit the term. And it is a marvel of storytelling that both breaks with tradition and celebrates it. Best of all, it is full of flawed, cantankerous, flesh-and-blood characters who remind us that conflict isn't the end of love, but the real beginning. Absorbingly spun, perfectly voiced, and disruptively political, Madeline ffitch's *Stay and Fight* forces us to reimagine an Appalachia—and an America—we think we know. And it takes us, laughing and fighting, into a new understanding of what it means to love and to be free.

"Thrilling, tender, utterly absorbing . . . Every chapter shimmered with truth. It's an unforgettable debut." --Cheryl Strayed

From travel writer Jedidiah Jenkins comes a long-awaited memoir of adventure, struggle, and lessons learned while bicycling the 14,000 miles from Oregon to Patagonia. On the eve of turning thirty, terrified of being funneled into a life he didn't choose, Jedidiah Jenkins quit his dream job and spent the next sixteen months cycling from Oregon to Patagonia. He chronicled the trip on Instagram, where his photos and profound reflections on life soon attracted hundreds of thousands of followers and got him featured by National Geographic and The Paris Review. In this unflinchingly honest memoir, Jed narrates the adventure that

started it all: the people and places he encountered on his way to the bottom of the world, and the internal journey that prompted it. As he traverses cities, mountains, and inner boundaries, Jenkins grapples with the questions of what it means to be an adult, his struggle to reconcile his sexual identity with his conservative Christian upbringing, and his belief in travel as a way to "wake us up" to life back home. A soul-stirring read for the wanderer in each of us, *To Shake the Sleeping Self* is an unforgettable reflection on adventure, identity, and a life lived without regret.

In October 1985, at age twenty-seven, Danny Meyer, with a good idea and

scant experience, opened what would become one of New York City's most revered restaurants—Union Square Cafe. Little more than twenty years later, Danny is the CEO of one of the world's most dynamic restaurant organizations, which includes eleven unique dining establishments, each at the top of its game. How has he done it? How has he consistently beaten the odds and set the competitive bar in one of the toughest trades around? In this landmark book, Danny shares the lessons he's learned while developing the winning recipe for doing the business he calls "enlightened hospitality." This innovative philosophy emphasizes putting the power of hospitality to work in a new and counterintuitive way: The first and most important application of hospitality is to

the people who work for you, and then, in descending order of priority, to the guests, the community, the suppliers, and the investors. This way of prioritizing stands the more traditional business models on their heads, but Danny considers it the foundation of every success that he and his restaurants have achieved. Some of Danny's other insights: Hospitality is present when something happens for you. It is absent when something happens to you. These two simple concepts—for and to—express it all. Context, context, context, trumps the outdated location, location, location. Shared ownership develops when guests talk about a restaurant as if it's theirs. That sense of affiliation builds trust and invariably leads to repeat business. Err on the side

of generosity: You get more by first giving more. Wherever your center lies, know it, name it, believe in it. When you cede your core values to someone else, it's time to quit. Full of behind-the-scenes history on the creation of Danny's most famous restaurants and the anecdotes, advice, and lessons he has accumulated on his long and ecstatic journey to the top of the American restaurant scene, *Setting the Table* is a treasure trove of innovative insights that are applicable to any business or organization.

By his early thirties, Paul Allen was a world-famous billionaire-and that was just the beginning. In 2007 and 2008, Time named Paul Allen, the cofounder of Microsoft, one of the hundred most influential people in the world. Since he made his fortune, his impact has been felt in science, technology, business, medicine, sports, music, and philanthropy. His passion, curiosity, and intellectual rigor-combined with the resources to launch and support new

initiatives-have literally changed the world. In 2009 Allen discovered that he had lymphoma, lending urgency to his desire to share his story for the first time. In this classic memoir, Allen explains how he solved problems, what he learned from his many endeavors-both the triumphs and the failures-and his compelling vision for the future. He reflects candidly on an extraordinary life. The book also features previously untold stories about everything from the true origins of Microsoft to Allen's role in the dawn of private space travel (with SpaceShipOne) and in discoveries at the frontiers of brain science. With honesty, humor, and insight, Allen tells the story of a life of ideas made real.

The ROV Manual: A User Guide for Observation-Class Remotely Operated Vehicles is the first manual to provide a basic "How To" for using small observation-class ROVs for surveying, inspection and research procedures. It serves as a user guide that offers complete training and information about ROV operations for technicians, underwater activities enthusiasts, and engineers working offshore. The book focuses on the observation-class ROV and underwater uses for industrial, recreational, commercial, and scientific studies. It provides information about marine robotics and navigation tools used to obtain mission results and data faster and more efficiently. This manual also covers two common denominators: the technology and its application. It

introduces the basic technologies needed and their relationship to specific requirements; and it helps identify the equipment essential for a cost-effective and efficient operation. This user guide can be invaluable in marine research and surveying, crime investigations, harbor security, military and coast guarding, commercial boating, diving and fishing, nuclear energy and hydroelectric inspection, and ROV courses in marine and petroleum engineering. \* The first book to focus on observation class ROV (Remotely Operated Vehicle) underwater deployment in real conditions for industrial, commercial, scientific and recreational tasks \* A complete user guide to ROV operation with basic information on underwater robotics and

For the most part quite independently, many philosophers and logicians have recently been applying formal semantic methods to structures increasingly like natural languages. While differences in training, method and vocabulary tend to veil the fact,

philosophers and linguists are converging, it seems, on a common set of interrelated problems. " Davidson and Harman called for an interdisciplinary dialogue of linguists, philosophers and logicians on the semantics of natural language, and during the last ten years such an enterprise has proved extremely fruitful. Thanks to the cooperative effort in these several fields, the last decade has brought about striking progress in our understanding of the semantics of natural language. This work on semantics has typically paid little attention to psychological aspects of meaning. Thus, psychologists or computer scientists working on artificial intelligence were not invited to join the forces in the influential introduction of Semantics of Natural Language. No

doubt it was felt that while psychological aspects of language are important in their own right, they are not relevant to our immediate semantic concerns. In the last few years, several linguists and logicians have come to question the fundamental anti-psychological assumptions underlying their theorizing.

From the cofounder of Square, an inspiring and entertaining account of what it means to be a true entrepreneur and what it takes to build a resilient, world-changing company In 2009, a St. Louis glassblowing artist and recovering computer scientist named Jim McKelvey lost a sale because he couldn't accept American Express cards. Frustrated by

the high costs and difficulty of accepting credit card payments, McKelvey joined his friend Jack Dorsey (the cofounder of Twitter) to launch Square, a startup that would enable small merchants to accept credit card payments on their mobile phones. With no expertise or experience in the world of payments, they approached the problem of credit cards with a new perspective, questioning the industry's assumptions, experimenting and innovating their way through early challenges, and achieving widespread adoption from merchants small and large. But just as Square was taking off, Amazon launched a similar product, marketed it aggressively, and undercut Square on price. For most ordinary startups, this would have spelled the end. Instead, less than a year later,

Amazon was in retreat and soon discontinued its service. How did Square beat the most dangerous company on the planet? Was it just luck? These questions motivated McKelvey to study what Square had done differently from all the other companies Amazon had killed. He eventually found the key: a strategy he calls the Innovation Stack. McKelvey's fascinating and humorous stories of Square's early days are blended with historical examples of other world-changing companies built on the Innovation Stack to reveal a pattern of ground-breaking, competition-proof entrepreneurship that is rare but repeatable. The Innovation Stack is a thrilling business narrative that's much bigger than the story of Square. It is an irreverent first-person look inside the

world of entrepreneurship, and a call to action for all of us to find the entrepreneur within ourselves and identify and fix unsolved problems--one crazy idea at a time.

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for

specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

"If people aren't calling you crazy, you aren't thinking big enough." These days taking chances isn't just for college dropouts in hoodies. Whether you work at a Fortune 500 company, a nonprofit, or a mom-and-pop, everybody needs to think and act like an entrepreneur. We all need to be nimble, adaptive, daring—and maybe even a little crazy—or risk being left behind. But how

do you take smart risks without risking it all? That's Linda Rottenberg's expertise. As the cofounder and CEO of Endeavor, the world's leading organization dedicated to supporting fast-growing entrepreneurs, she's spent the last two decades helping innovators think bold and execute smart. Now Rottenberg draws on her unrivaled experience to show you the proven techniques to achieve your dreams: from overcoming fear to facing down critics, from stalking supporters to exploiting chaos. Crazy Is a Compliment combines inspiring stories, original research, and practical advice to create a road map for getting started and going bigger. Rottenberg brings to life iconic entrepreneurs like Walt Disney and Estée Lauder and reveals how companies like MTV, GE, and Burberry

found their best successes by breaking the corporate mold and embracing the entrepreneur mind-set. She also introduces us to some of the one thousand entrepreneurs she's advised, like Leila Velez, who started a hair-care company in her kitchen sink in Rio that now earns \$80 million a year. As Linda writes: Every day I meet people with a dream. Maybe you're serving coffee and fantasizing about launching a microbrewery; maybe you've skipped college and yearn to start your own design firm; maybe you're sitting in your cubicle and brainstorming a new idea that can improve your company. You have a dream, but you don't know how to turn your dream into reality. Or you've already launched your dream but you're unsure how to take it to the next level.

This book can show you the way.

From late 1862 to the spring of 1865, the federal government accepted more than 180,000 black men as soldiers, something it had never done before on such a scale. Known collectively as the United States Colored Troops and organized in segregated regiments led by white officers, some of these soldiers guarded army posts along major rivers; others fought Confederate raiders to protect Union supply trains; and still others took part in major operations like the siege of Petersburg and the battle of Nashville. After the war, many of the black regiments garrisoned the former Confederacy to enforce federal Reconstruction policy. This book tells the story of these soldiers' recruitment, organization, and service.

From New York Times bestselling author and senior economic correspondent at The New York Times, how to survive—and thrive—in this increasingly challenging economy. Every ambitious professional is trying to navigate a perilous global economy to do work that is lucrative and satisfying, but some find success while others struggle to get by. In an era of remarkable economic change, how should you navigate your career to increase your chances of landing not only on your feet, but ahead of those around you? In *How to Win in a Winner-Take-All World*, Neil Irwin, senior economic correspondent at the New York Times, delivers the essential guide to being successful in today's economy when the very notion of the “job” is

shifting and the corporate landscape has become dominated by global firms. He shows that the route to success lies in cultivating the ability to bring multiple specialties together—to become a “glue person” who can ensure people with radically different technical skills work together effectively—and how a winding career path makes you better prepared for today's fast-changing world. Through original data, close analysis, and case studies, Irwin deftly explains the 21st century economic landscape and its implications for ambitious people seeking a lifetime of professional success. Using insights from global giants like Microsoft, Walmart, and Goldman Sachs, and from smaller lesser known organizations like those that make cutting-edge digital effects in

Planet of the Apes movies or Jim Beam bourbon, *How to Win in a Winner-Take-All World* illuminates what it really takes to be on top in this world of technological complexity and global competition.
