Publications, Incorporated As night falls in Delhi, a mother spins tales from her past for her sleeping daughter. Now grown up, her child is a puzzle with a million pieces, whom she hopes, through her words

and her love, to somehow make whole again.

Meanwhile, a young man rides the last train from Rajiv Chowk Station and dreams of murder. In another corner of the city, a newborn wrapped in a blood-red towel lies on the steps of an orphanage as his mother walks away.

There are twenty million bodies in this city, but the stories of this woman, man, and child--of a secret love that blossoms in the shadows of grief, of a corrosive guilt that taints the soul, and of a boy who maps his own destiny--weave in and out of the lives of those around them to form a dazzling kaleidoscope of a

novel. Beautiful, beguiling, and audacious, this is the story of a city and its people, of love and horror, of belonging and forgiveness: a powerful and unforgettable tale of modern India.

This highly topical book explores the new technological environment we have created, and our adaptation to it, twenty-five years after the death of John Bowlby. In the

space of just a couple of decades, the world has changed radically, and we are changing too: personal computers and smartphones mediate our lives, work, play, and love. Relationships of all kinds are now conducted through mobile phones, email, Skype and social network sites. Attachment theory is concerned with the impact of the external world on internal reality, where twenty-first century experiences encounter the powerful, primitive, and ancient instinct for attachment and survival. This book is written by psychotherapists whose practice, with individual adults and couples, is informed by attachment theory. It contains theoretical, observational, and clinical material, and will be relevant to all psychotherapists, psychoanalysts, counsellors, and psychologists interested in the profound impact of digital and communication technologies on human relationships.
