Atheist, born in 1965 in the town of Kalgoorlie 300 miles east of the lovely although very insular city of Perth in the great nepotic, 'crony's only', 'British, Christian & loyal to the Queen & Mining forever' state of Western Australia. "Books that are sooo bad, -they good!!" And many do love reading them just too damned ashamed to admit it lol! A short novella situated in and around the rather disrupted working life of one Cal.Tennyson. Laced with many diverse stories both amusing and dramatic related to Cal's life as a member of the working class. "Well told if not a little Wild & Reckless, but still an unrivalled working class story/memoir at its very core. That is undeniable" -Alan Stone book reviewer for The London Times Review

The success of Asian economies (first Japan, then Taiwan, South Korea, Singapore, Hong Kong and, more recently, China and India) has made it tempting to look for an Asian model of development. However, the strength of Asian development lies less in strategies that reproduce successful national systems of innovation and more in the capacity for institutional change to open up new development trajectories with greater emphasis on knowledge and learning. The select group of contributors demonstrate that although there are important differences among Asian countries in terms of institutional set.

Hey kids, do you want to know how to make all-stars for your baseball league? Or parents, do you feel like the coaches keep passing your child up? Well no more! Or coaches, want drills and ways to motivate your players to get better? Coach Andy Collins is going to tell you everything he knows from his 35 years of youth and adult coaching and watching what works and what doesn't work. It's chock-full of ideas in 86 pages. He'll cover: \* How your league chooses all-stars \* What all-star

selectors are really looking for \* 7 tried and true methods of getting better at baseball \* But more importantly, little known ways to get the people picking the team to notice you \* And how to beat the "politics" that seem to get in the way Year after year kids sit in the stands crying after the all-star teams are announced and they weren't one of the players that were chosen. At the same time the students I've trained do make these same all-star teams. It was then I realized I had the information that the kids in the stands and their parents and coaches were looking for. Wherever there are kids around the world that play youth baseball, there are kids that long to make the league's all-star team. Every year it's the same, kids that desperately want to have their name called out (or see it announced on the list) don't make it, and a little bit of them is hurting deep inside; and they don't know why they were not picked. Little did they know that they could have fairly accurately predicted their chances almost from day one of when the season started. And if they knew what you're about the find out, they could improve enough in skill in the eyes of the all-star selectors as to be a better player or even make the all-star team. The good news is that in this book, there is a way to learn how to make the all-star team for the next upcoming season; and if not then, the following year (if you're willing to listen and follow the advice I give). While I have written this for parents and coaches to learn how this process works and how they can help these youngsters achieve their dreams, this is mostly a book written for the kid who wants to make all-stars, not a book for the parent who wants their kid to make all-stars (there is a difference). And it will be in that voice that this book will be written.
