Volume 2 of the two-volume set Advanced direct injection combustion engine technologies and development investigates diesel DI combustion

engines, which despite their commercial success are facing ever more stringent emission legislation worldwide. Direct injection diesel engines are generally more efficient and cleaner than indirect injection engines and as fuel prices continue to rise DI engines are expected to gain in popularity for automotive applications. Two exclusive sections examine light-duty and heavy-duty diesel engines. Fuel injection systems and after treatment systems for DI diesel engines are discussed. The final section addresses exhaust emission control strategies, including combustion diagnostics and modelling, drawing on reputable diesel combustion system research and development. Investigates how HSDI and DI engines can meet ever more stringent emission legislation

Examines technologies for both light-duty and heavy-duty diesel engines
Discusses exhaust emission control strategies, combustion diagnostics and modelling

Industrial Applications of Batteries looks at both the applications and the batteries and covers the relevant scientific and technological features. Presenting large batteries for stationary applications, e.g. energy storage, and also batteries for hybrid vehicles or different tools. The important aerospace field is covered both in connection with satellites and space missions. Examples of applications include, telecommunications, uninterruptible power supplies, systems for safety/alarms, car accessories, toll collection, asset tracking systems, medical equipment, and oil drilling. The

first chapter on applications deals with electric and hybrid vehicles. Four chapters are devoted to stationary applications, i.e. energy storage (from the electric grid or solar/wind energy), load levelling, telecommunications, uninterruptible power supplies, back-up for safety/alarms. Battery management by intelligent systems and prediction of battery life are dealt with in a dedicated chapter. The topic of used battery collection and recycling, with the description of specific treatments for the different systems, is also extensively treated in view of its environmental relevance. Finally, the world market of these batteries is presented, with detailed figures for the various applications. * Updated and full overview of the power sources for industries *

Written by leading scientists in their fields * Well balanced in terms of scientific and technical information

Bei vielen innovativen Fahrzeugkonzepten sind die Knotenbereiche zentraler Bestandteil der Karosserieentwicklung. Hier liegen häufig Karosserie-Schnittstellen, die die Trennebenen zwischen Rohbaumodulen oder skalierbaren Strukturbauteilen bilden. Da in den Karosserieknoten die Lastpfade umgelenkt und verteilt werden, prägen diese Bereiche auch

massgeblich die Karosserieeigenschaften, speziell die Steifigkeit. Deshalb ist es wichtig, schon früh in der Konzeptphase die Auswirkungen der Knotengestaltung auf die Karosserieeigenschaften abschätzen und beurteilen zu können. Dazu wird auf Grundlage von Untersuchungen anhand einfacher Ersatzsysteme eine Methode entwickelt. Unter Verwendung neu definierter Kennzahlen ist damit eine Bewertung verschiedener Knotenvarianten hinsichtlich der Karosseriesteifigkeit noch vor Erstellung komplexer virtueller Modelle möglich. Diese Methode wird auf verschiedene A-Säulenknoten eines bestehenden Karosseriekonzepts angewandt und mit den Ergebnissen einer Finite-Elemente-Berechnung verglichen. Aus den

theoretischen Betrachtungen sowie aus den konkreten Simulationsrechnungen werden weiterhin Konstruktionsrichtlinien abgeleitet und in einer Übersicht zusammengestellt, die den Wirkzusammenhang zwischen Knotengestaltung und Karosseriesteifigkeit verdeutlicht. Zur Autorin Katrin Wendt studierte zwischen 2000 und 2005 an der Technischen Universität Braunschweig und der University of Glasgow Maschinenbau mit der Vertiefungsrichtung Luft- und Raumfahrttechnik. Das derzeitige Aufgabenfeld von Frau Wendt in der Konzernforschung der Volkswagen AG in Wolfsburg umfasst innovative Karosseriekonzepte, in dem auch die vorliegende Doktorarbeit entstanden ist. *Como Mantener Tu Volkswagen Vivo*

One of the critical questions that Kenyans have continuously asked is what went wrong in January and

February 2008 with the peace they had hitherto enjoyed. There have not been readily available answers to this fundamental question. The collection of papers presented in this book attempt to provide, as a starting point, possible explanations for the events of early 2008 including key background issues in Kenyan history since pre-independence times. Based on a series of public lectures titled (Re)membering Kenya organized by the volume editors together with Twaweza Communications and sponsored by the Goethe-Institut Kenya, the Institute for International Education and The Ford Foundation the lecture series became a way of trying to get scholars to engage meaningfully with the Kenyan public on critical matters pertaining to their nationhood even if this

entailed first calling to question the lie about the very ideas and practices upon which that nationhood is assumed to stand. A key lesson drawn from the unfolding discussions at the Goethe-Institut Kenya was that the 2007 elections debacle was merely the cusp of momentous crises to do with among other issues, governance, law and order, Parliaments abdication of its role in ensuring accountability from the Executive, dilemmas of identity and socio-economic marginality. The book is the first of three volumes under the (Re)membering Kenya series whose overall objective is to cast some new light on the various trajectories that informed the happenings of January 2008. The present volume brings together some of the best interpretative

writing and suggestions on pertinent questions, past and present, ranging from the architecture of Kenyas ethnicity, Kenyanness, generational competition, socialization and violence, iconic representations of identity to the ongoing debate on the efficacy of the Truth, Justice and Reconciliation Commission (TJRC). It is hoped that the issues debated during the public lectures and documented herein will spur further discussions in other spaces within civil society organizations, among activists and in newspapers where the public

might continue to expand their thinking on the complex task of (Re)membering Kenya.
