 Readers can relive the true golden age of high-performance classic speedboats in this book that covers these mighty wooden-hulled craft from around World War I until just before the second World War. This was an era when speed was still a new plaything, and speedboats and aircraft were raced as passionately as were automobiles; when massive mahogany speedboats powered by engines from suppliers such as Rolls-Royce competed fiercely against rivals from around the world. Classic speedboat enthusiasts will relish the cutaway drawings of these craft, as well as the choice archival photography and the modern color photography of these now-impeccably restored beauties.

 Royal Enfield's famous motor - 'made like a gun' - hints at the factory's origins, but few appreciate that it is the oldest motorcycle manufacturer in existence that can boast of continuous production. In addition, its famous Bullet can claim the longest motorcycle production run of all time. Greg Pullen charts the rise, fall and rise again of Royal Enfield, from the company's pre-motorcycle beginnings in Redditch, through the impact of two World Wars, the importance of exports to India and subsequent establishment of factories there, to changes in ownership, recently launched models and new concept bikes for the future. With 190 colour photographs, this book includes: the V-twins, from the 1930s K and KX range to a glimpse of the concept V-twin shown in 2018; the singles, from 2-strokes to side-valve 4-strokes, and the ohv version that first used the Bullet name, through to the new singles built in India. The British Bullet: its arrival in 1948 and production in the UK, the original orders from India and subsequent setting up of production there are discussed. The 250s, (1958-68), including the Turbo Twins, and the big twins, from the 1948 500 Town to the final interceptor in 1970, including the 800cc prototype and the Clymer Indians are covered. The new twins: the 650cc Royal Enfield interceptor and Continental GT twins and the Bobber concept bike are discussed. Competition success is covered, with notable ISDT achievements, star rider Johnny Brittain and racing the big twins, and Geoff Duke in the GP5. Finally, the British factories and the new opportunities with the Indian factories are remembered.

 The Stone God is building in power.... Defeating an empire takes many weapons, and Rhenna and her band--including shape-shifting panther Cian--must brave unpredictable dangers, crossing vast deserts, trackless jungles and impenetrable swamps to seek the Hammer of the Earth. Yet the Exalted Ge, who holds the Hammer in her stronghold, has set deadly traps that rise out of the Earth itself. Even if Rhenna and her companions can defeat a goddess, do they dare trust each other when the Hammer has done its work? Meanwhile, in Karchedon, their ally Quintus must decide if working from within the Emperor's palace will aid in the downfall of the Stone God or simply betray all he holds dear. Despite every battle won, the power of the Stone God still stands against them. And the ultimate victory may demand the ultimate price....

A concise but thorough look at invaluable applied counseling skills, this book provides detailed information on 35 counseling techniques from varied theoretical approaches to help clients from all backgrounds create changes in their lives and meet their counseling goals. While most introductory counseling skills classes in counselor education programs use a microskills approach supplemented with a theories text that provides a cursory glance at theory-based techniques, most counseling students enter their field without advanced instruction on the application of theory-based techniques to the counseling process. This first edition text strives to provide that missing piece -- it is a succinct text that can be used as a secondary text in a theories, techniques, practicum, internship, or advanced or applied skills course that presents in-depth treatment of the major theory-based techniques that counselors use. The text informs counselors of the theoretical basis underlying each technique and the common variations for implementation. Each technique is accompanied by research that informs the counselor of which techniques are best with which populations and each theoretical approach includes the multicultural implications for applying the approach to counseling clients from diverse cultures. The book also gives readers transcripts that illustrate how to use the techniques in sessions as well as outcomes research that informs counselors of the most effective ways to use these counseling techniques in practice with diverse clients.

"This book, a polished, winding meditation on the theory and fractiousness of motorcycles, celebrates both their eccentric history and the wary pleasures of touring."—The New Yorker In a book that is "a must for anyone who has loved a motorcycle" (Oliver Sacks), Melissa Pierson captures in vivid, writerly prose the mysterious attractions of motorcycling. She sifts through myth and hyperbole: misrepresentations about danger, about the type of people who ride and why they do so. The Perfect Vehicle is not a mere recitation of facts, nor is it a polemic or apologia. Its vivid historical accounts—the beginnings of the machine, the often hidden tradition of women who ride, the tale of the defiant ones who taunt death on the racetrack—are intertwined with Pierson's own story, which, in itself, shows that although you may think you know what kind of person rides a motorcycle, you probably don't.

Zweiradtechnik hat in Deutschland eine lange Tradition. Weitgehend unbekannt ist jedoch, wie viele

Hersteller es seit Ende des 19. Jahrhunderts gab. Es dürften um die 500 gewesen sein, die häufig als

kleine Garagen- und Hinterhof-Firmen begannen. Gerade die Corona-Pandemie, neue Technologien sowie unhaltbare Verkehrsverhältnisse verschafften motorisierten Zweirädern in der jüngeren Vergangenheit erneut mehr Marktanteile. Die in diesem Buch versammelten Kurzgeschichten verschiedener Unternehmen, wie auch diverse Beiträge zur Technikgeschichte und -psychologie sollen ein Bewusstsein dafür schaffen, wie sich die Motorräder vor dem Hintergrund der allgemeinen Verkehrsveränderungen entwickelt haben und wie Technik und Mensch im Verkehr miteinander interagieren.
