Lively, original and highly readable, *An Introduction to Literature, Criticism and Theory* is the essential guide to literary studies. Starting at 'The Beginning' and concluding with 'The End', chapters range from the familiar, such as 'Character', 'Narrative' and 'The Author', to the more unusual, such as 'Secrets', 'Pleasure' and 'Ghosts'. Now in its fifth edition, Bennett and Royle's classic textbook successfully illuminates complex ideas by engaging directly with literary works, so that a reading of *Jane Eyre* opens up ways of thinking about racial difference, for example, while Chaucer, Raymond Chandler and Monty Python are all invoked in a discussion of literature and laughter. The fifth edition has been revised throughout and includes four new chapters - 'Feelings', 'Wounds', 'Body' and 'Love' - to incorporate exciting recent developments in literary studies. In addition to further reading sections at the end of each chapter, the book contains a comprehensive bibliography and a glossary of key literary terms. A breath of fresh air in a field that can often seem dry and dauntingly theoretical, this book will open the reader's eyes to the exhilarating possibilities of reading and studying literature.

Following Peirce in his non-reductive understanding of the theory of signs as a branch of aesthetics, this book reconceptualizes the processes of literary creation, appreciation and reading in semiotic terms. Here is a carefully developed theory of what sort of criteria serve to distinguish apposite from inapposite readings of literary works-of-art. Given Peirce's triadic account of signification, it enlarges Aristotle's view of mimesis as expressive making into an understanding of literary works as deliberately designed sign-systems belonging to Peirce's eighth class of signs. In parallel with Bakhtin's account of the dialogical nature of literary work (and its success in exposing misreadings of Dostoyevsky), this work categorizes in precise theoretical terms what is wrong with the non-dialogical readings which treat Plato's dialogues as doctrinal tractates. As a study in literary theory finally, and on the basis of apt distinctions between exhibitiv, active, and assertive judgments, this book re-demarcates and distinguishes the discipline of literary criticism from that of literary theory, and both of these from the work of literary creation itself.

In it, Aristotle offers an account of what he calls "poetry" (a term which in Greek literally means "making" and in this context includes drama - comedy, tragedy, and the satyr play - as well as lyric poetry and epic poetry). They are similar in the fact that they are all imitations but different in the three ways that Aristotle describes: 1. Differences in music rhythm, harmony, meter and melody. 2.

Difference of goodness in the characters. 3. Difference in how the narrative is presented: telling a story or acting it out. In examining its "first principles," Aristotle finds two: 1) imitation and 2) genres and other concepts by which that of truth is applied/revealed in the poesis. His analysis of tragedy constitutes the core of the discussion. Although Aristotle's *Poetics* is universally acknowledged in the Western critical tradition, "almost every detail about his seminal work has aroused divergent opinions."

Aristotle's *Poetics* has held the attention of scholars and authors through the ages, and Averroes has long been known as "the commentator" on Aristotle. His Middle Commentary on Aristotle's *Poetics* is important because of its striking content. Here, an author steeped in Aristotle's thought and highly familiar with an entirely different poetical tradition shows in careful detail what is commendable about Greek poetics and commendable as well as blameworthy about Arabic poetics.

Initially, Bride's accomplishments are an extension of a superficial "cult of celebrity" which inhabits and undermines the development of meaningful interpersonal relationships until a significant literal and metaphorical journey helps her redefine success by facilitating the building of community and family.

Taking a close look at the forces that affect English education in schools—at the ways literature, cognitive science, the privileging of the STEM disciplines, and current educational policies are connected—this timely book counters with a strong argument for the importance of continuing to teach literature in middle and secondary classrooms. The case is made through critical examination of the ongoing "culture wars" between the humanities and the sciences, recent research in cognitive literary studies demonstrating the power of narrative reading, and an analysis of educational trends that have marginalized literature teaching in the U.S., including standards-based and scripted curricula. The book is distinctive in presenting both a synthesis of arguments for literary study in the middle and high school and sample lesson plans from practicing teachers exemplifying how literature can positively influence adolescents' intellectual, emotional, and social selves.
