## ERIN RODRIGO

### **Interpreting Projective Drawings** Routledge

Now available in paper for the first time, this volume brings together leading contributors to provide a comprehensive review of theory, research, and practice in child and adolescent personality assessment. Organized for easy reference, the book is divided into four parts. Part I summarizes basic theories, issues, and concepts, setting forth a framework for assessment as a hypothesis-generating, problem-solving process. Part II describes and evaluates a wide range of relevant approaches, tests, and techniques, marshaling the available data and reviewing administration procedures, scoring, and interpretation. In Part III, the process by which personality assessment is translated into effective intervention strategies and programs for children is examined in depth. A summary of major perspectives and recommended practices is presented in Part IV, which also considers future needs and directions for the field.

*Encyclopedia of Special Education* Allyn & Bacon

This book is concerned with the interdisciplinary studies applying computer technologies to the theory and practice of art therapy. The contents consist of the author's sixteen papers published, twelve patents in Korea, Japan, and the U.S.A., and other relevant materials, all organized in a logical sequence. This book is intended for art therapy courses at upper undergraduate and graduate levels. No prior computer knowledge is assumed. Interpretation of drawings no longer needs to be done manually by the therapists themselves because, as this book argues, computerized systems can perform the steps of evaluation and interpretation. The difficult concept of computer science is explained in a simple and concrete way with illustrations, sample drawings, and case studies. This book explains statistical methods, various functions of a computer, technologies in digital image processing, computer algorithms, methodologies in expert systems, and the Bayesian network. All these elements can be used to improve the practice and theory in the evaluation of art and the interpretation of art. Readers do not need to worry about unfamiliar terms such as digital image, algorithm, expert system, and Bayesian network which appear here. Neither should they be concerned about pixel, cluster, edge, blurring, convex hull, regression, etc., the terms which appear later in the book. These terms will be explained with illustrations and drawings for easy understanding. Computational Art Therapy will not only promote the use of various art therapy tools but also provide a foundation for new methodologies through which art therapy researchers can develop their own methodologies to improve the practice and theory of art therapy. It will be of special interest to those studying art therapy, psychology, psychiatry, art, computer science and applied statistics.

*Clinical Assessment of Child and Adolescent Personality and Behavior* Routledge

Comprehensive Handbook of Psychological Assessment, Volume 2 presents the most up-to-date coverage on personality assessment from leading experts. Contains contributions from leading researchers in this area. Provides the most comprehensive, up-to-date information on personality assessment. Presents conceptual information about the tests.

*Psychological Experts in Divorce Actions* Cambridge University Press

The objective of this book is to provide readers with a comprehensive account of the childOCOs personality. The book examines in detail significant personality dimensions from developmental, clinical and cross-cultural perspectives. The intricacies of personality are exposed by means of the Fairy Tale Test, an instrument that attempts to track the preconscious and unconscious processes that OC conspireOCO beneath the behavioral and overt manifestations of personality. ChildrenOCOs responses to the FTT questions are assessed both from a quantitative and a qualitative perspective. Twenty-nine personality variables are used to rate the broad range of personality characteristics. No

other personality test assesses such a large number of personality parameters. The qualitative evaluation of responses includes the analysis of 14 defense mechanisms, the study of the nature of anxiety, family dynamics, and the examination of ego integration and ego strength. The unique quality of this book is the use of the FTT in the exploration of the childOCOs personality, using large samples of children derived from diverse cultures. Additional advantages of this book are the chapters which focus on the research into two significant personality traits: aggression and ambivalence and the chapter on the analysis of idiosyncratic responses; the latter offers valuable information in the classification of original responses into levels of psychopathology. While the FTT has taken significant steps towards becoming a valid and reliable instrument, studies of its psychometric properties are an ongoing process. The book also includes examples, case studies and appendices for further study and review."

*Children Draw And Tell* Charles C Thomas Publisher

This resourceful guide presents art therapy techniques for difficult clients where the typical therapist-client interaction can often be distant, demanding, and frustrating. Offering practical and theoretical information from a wide variety of treatment populations and diagnostic categories; and incorporating individual, group, and family therapy case studies, the text is filled with examples and over 150 illustrations taken from the author's sixteen years of experience working with hundreds of clients. The author is a licensed Marriage and Family Therapist with a Master's degree in Clinical Art Therapy. The text comes with an accompanying CD-ROM which includes full-color pictures and additional material not found in the book.

*Tools of the Trade* Routledge

The use of drawings to discover emotions, attitudes, and personality traits not verbally stated by a client is a valuable and widely used technique in psychoanalysis and psychotherapy. In this book, the author offers a highly practical introduction to the use and interpretation of projective drawings. Grounding his approach in self psychology, Dr. Leibowitz provides detailed information on how to interpret house, tree, man, woman, and animal drawings. By pairing clinical case examples with general interpretation guidelines, the book offers a thorough examination of projective drawings, making it a valuable text for beginners and an important reference source for the seasoned clinician. Interpreting Projective Drawings contains an impressive array of drawings, with over 175 total illustrations. Almost half of these drawings are from comprehensive case studies that follow adult patients from the beginning phase of treatment to their one-year (or more) status. These include over 30 chromatic illustrations that clearly demonstrate the importance of color in projective drawing interpretation. In addition to detailed information on how to interpret these five types of achromatic and chromatic drawings, the book also contains an appendix that offers examiner instructions, instructions for self-administration, and adjective lists to aid in interpretation. Together, these components make Interpreting Projective Drawings an essential resource for any mental health professional interested in using drawings to their fullest effect in their practice.

*Computational Art Therapy* Routledge

This book contains the first documentation of combining house, tree, and person into a single drawing. It helps enrich clinician's test batteries and aids psychologists and physicians in understanding the emotions and self-awareness of their clients. It is richly illustrated and teaches the important skill of using visual metaphors in clinical settings to understand and assist clients. The author covers all aspects of drawing interpretation, including size, placement, stroke or line characteristics, and the possible individual characteristics of each element within the house, tree, and person drawings.

*Family Assessment* John Wiley & Sons

First published in 1988. Child therapists have long been fascinated by children's human figure drawings and what they reveal about self-image, feelings, and family relationships. Now this

comprehensively researched volume provides a valuable introduction to using children's human figure drawings as projective measures in a variety of settings. The principles for interpreting drawings, as well as general and specific indicators, are illustrated in 85 children's drawings. Part I on The Theory deals with the background of projective psychology, discussing art as a projective technique and emphasizing that all behavior, including drawings, reflects personality, attitudes and values. The authors examine the major methods of obtaining diagnostic information and recommend the use of several methods for best results. Part II on The Application examines in detail the projective use of children's human figure drawings to evaluate personality, relationships (particularly in families), group values, and attitudes. In each area, research is presented, directions for administration of various tests are given, and guidelines for interpretation are offered. Significant factors are revealed in numerous children's drawings, accompanied by clinical comments. Of special interest is the presentation of original research on group values among Canadian Indian (Saskatchewan Cree) children and on attitudes of young children toward teachers, doctors and other authority figures as revealed in human figure drawings. For psychologists, social workers, teachers and other child-care professionals, as well as students in these fields, this is an indispensable basic guide to interpreting human figure drawings.

**The Assessment of Child and Adolescent Personality** W W Norton & Company Incorporated  
First published in 1988. Child therapists have long been fascinated by children's human figure drawings and what they reveal about self-image, feelings, and family relationships. Now this comprehensively researched volume provides a valuable introduction to using children's human figure drawings as projective measures in a variety of settings. The principles for interpreting drawings, as well as general and specific indicators, are illustrated in 85 children's drawings. **Casualties Of Childhood** Wolters Kluwer

Ethnic minority children now comprise over 75 percent of students in 100 of the largest cities in the United States. However, these students have not been given equal access to, nor benefited from, the contemporary mental health system as have their non-minority peers. *TEMAS (Tell-Me-A-Story) Assessment in Multicultural Societies* examines the health/mental care system in which professional service providers, including psychologists, labor to offer quality care for youth in the United States. The authors ardently support the use of the TEMAS assessment instrument as a useful tool for diagnosis of all youngsters, particularly its use on the growing population of minority children and adolescents. Part I presents a rationale and context for employing TEMAS. Introductory chapters describe the mental health status of the population at-risk, as well as systems of care for youth where assessment and intervention are components. Topics to follow highlight a history of positive TEMAS test reviews with the detail required by instructors for preparing dedicated TEMAS courses. The volume thoroughly outlines cross-cultural studies and illustrates case examples of European-American, Hispanic/Latino, Asian-American, and forensic studies. *TEMAS (Tell-Me-A-Story) Assessment in Multicultural Societies* brings practical insight to instructors who teach standard assessment courses; clinicians, counselors, and school psychologists; assessment specialists; and administrators concerned with mental health services designed for children and adolescents.

*Encyclopedia of Child Behavior and Development* Routledge

This lavishly illustrated book gives a comprehensive and scholarly account of children's understanding and appreciation of art and their developing ability to produce their own pictures. It discusses the main influences on children's picture-making, and considers the intriguing question, does children's art follow the same pattern of development as the history of art? As well as discussing the artistic development of typically developing children, the book also includes a discussion of children with intellectual disabilities and those with a talent for art, some of whom are children with autism.

**Handbook of Personality Assessment** John Wiley & Sons

The fourth edition of this textbook offers a scientific and practical context within which to understand and conduct clinical assessments of children's and adolescent's personality and behavior. The new edition ensures that the content is relevant to diagnostic criteria for major forms of child and adolescent psychopathology in the 5th edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM-5). It provides updated information on specific tests and discusses advances in research that have occurred since the last edition that are relevant for assessing the most common forms of psychopathology shown by children and adolescents. The volume is unique in providing both the scientific and ethical basis to guide psychological testing, as well as providing practical advice for using specific tests and assessing specific forms of psychopathology. This new edition: Highlights how current trends in psychological classification, such as the DSM-5 and the Research Domain Criteria, should influence the clinical assessment of children and adolescents. Provides updates to professional standards that should guide test users. Discusses practical considerations in planning and conducting clinical assessments. Evaluates the most recent editions of common tests used in the clinical assessment of child and adolescent personality and behavior. Provides an overview of how to screen for early signs of emotional and behavioral risk for mental problems in children and adolescents. Discusses practical methods for integrating assessment information collecting as part of a clinical assessment. Uses current research to guide clinical assessments of children with Attention-deficit/Hyperactivity Disorder, conduct problems, depression, anxiety, and autism spectrum disorder. *Clinical Assessment of Child and Adolescent Personality and Behavior* is a valuable updated resource for graduate students as well as veteran and beginning clinicians across disciplines, including school, clinical child, developmental, and educational psychology; psychiatry; counseling; and social work; as well as related disciplines that provide mental health and educational services to children and adolescents.

*Teaching and Learning Personality Assessment* Guilford Publications

The Third Edition of the highly acclaimed *Encyclopedia of Special Education* has been thoroughly

updated to include the latest information about new legislation and guidelines. In addition, this comprehensive resource features school psychology, neuropsychology, reviews of new tests and curricula that have been developed since publication of the second edition in 1999, and new biographies of important figures in special education. Unique in focus, the *Encyclopedia of Special Education, Third Edition* addresses issues of importance ranging from theory to practice and is a critical reference for researchers as well as those working in the special education field.

**Action, Styles, And Symbols In Kinetic Family Drawings** Kfd John Wiley & Sons

Drawing is a language, projected by children and adults, reflecting their joy and pain. It is used extensively by clinical psychologists, art therapists, social workers, and other mental health professionals in the assessment and treatment of children, adolescents, adults, and couples. This book brings together a renowned group of professionals to analyze the research and application of the most popular assessment and treatment tools. Tests discussed include the Draw-a-Person Test, the House-Tree-Person Test, the Kinetic Family Drawing Test, the Art Therapy-Projective Imagery Assessment, and the Wartegg Drawing Completion Test. Working with sexually and physically abused children, assessing clients with anorexia nervosa, and the influence of osteopathic treatment on drawings are some of the special topics considered. Numerous case studies are also included.

*Drawings in Assessment and Psychotherapy* Routledge

Drawing from Within is an introductory guide for those wanting to explore the use of art with clients with eating disorders. Art therapy is a particularly effective therapeutic intervention for this group, as it allows them to express uncomfortable thoughts and feelings through artistic media rather than having to explain them verbally. Lisa D. Hinz outlines the areas around which the therapist can design effective treatment programmes, covering family influences, body image, self-acceptance, problem solving and spirituality. Each area is discussed in a separate chapter and is accompanied by suggestions for exercises, with advice on materials to use and how to implement them. Case examples show how a therapy programme can be tailored to the individual client and photographs of client artwork illustrate the text throughout. Practical and accessible to practitioners at all levels of experience, this book gives new hope to therapists and other mental health professionals who want to explore the potential of using art with clients with eating disorders.

**Exploring the Child's Personality** Routledge

The two volumes of the *Handbook of Psychological and Educational Assessment of Children, Second Edition*, cover all aspects of child and adolescent assessment. Leading clinical scientists summarize the state of the science of assessment paradigms, instruments, and methods. With an emphasis on practical clinical considerations, chapters also delve into issues related to test development, psychometrics, and bias. Conveniently designed for reference or text use, this vast knowledge base has been synthesized into two volumes which may be purchased separately or together.

*INTELLIGENCE, APTITUDE, AND ACHIEVEMENT* surveys assessment of intelligence, learning styles, and academic achievement; covers historical issues and psychometric methods; and addresses diversity issues, ethical concerns, and special topics in mental testing. *PERSONALITY, BEHAVIOR, AND CONTEXT* reviews the use of projective methods, interviewing and observation, and objective methods of assessing personality and behavior; discusses the assessment of specific syndromes and symptoms; and presents tools for assessing adaptive skills and the family context.

*TEMAS (Tell-Me-A-Story) Assessment in Multicultural Societies* Taylor & Francis

How do we move from an understanding of the administration, scoring, and interpretation of responses on various personality assessment instruments to the ability to put our understanding into words and communicate it effectively to referral agents and to patients themselves? And how do we transmit that ability to students? Teaching and Learning Personality Assessment strives to fill a gap in the literature and in many training programs. The editors have assembled a group of renowned clinicians, noted not only for their own acumen in personality assessment but also for their teaching talent, who present in detail time-tested techniques for teaching assessment. Readers have the opportunity to "sit beside" these seasoned mentors and learn their special skills. Numerous examples illustrate the key concepts. For every instructor of personality assessment who has ever pondered ways to organize a course or to convey difficult material, and for every student who has worried about how to translate theory into practice, in the context of a course or on his or her own, this book will offer enlightenment and provide uniquely practical assistance. It will be important reading for psychologists and trainees at every level of experience. Its clear style, vivid anecdotes, frank discussion of disagreements in the field, and innovative ideas make it an excellent text for both introductory and advanced courses.

**Counseling Assessment and Evaluation** Routledge

This new edition with its revised title provides critical reviews of art therapy tests along with some new reviews of assessments and updated research in the field. It is comprehensive in its approach to considering reliability and validity evidence provided by test authors. Additionally, it reviews research on art therapy assessments with a variety of patient populations. The book contains helpful suggestions regarding the application of art therapy assessments. Specific areas covered include individual, group, family, and multicultural assessment techniques. The desirable and undesirable features of a variety of art therapy assessments are deliberated. The book critiques a series of art therapy assessments - from traditional art therapy approaches to current releases. The goal of this work is to assist mental health professionals in selecting assessments that yield reliable and valid clinical information regarding their clients. Of special interest is the author's approach to writing the results of a series of art therapy assessments in an effort to provide a more complete indication of client dynamics and issues. It will be a valuable resource for practitioners who use art therapy as an adjunct or primary therapy, and it will serve to enhance clinical skills, making therapy more effective for each patient who participates in the assessment process.

**Interpreting Projective Drawings** Springer Science & Business Media

This comprehensive, balanced guide to personality assessment, written by two of the foremost experts in the field, is sure to become the gold standard of texts on this topic. The *Handbook of Personality Assessment* covers everything from the basics, including a historic overview and detailed discussion of the assessment process and its psychometric foundations, to valuable sections on conducting the assessment interview and the nature, interpretation, and applications of the most popular self-report (objective) and performance-based (projective) measures. A concluding section of special topics such as computerized assessment, ethical and legal issues, and report writing are unique to this text.

**Handbook of Psychological and Educational Assessment of Children** Guilford Press

The authors have developed a simple, one-page art screening form for use with the "human figure drawing" (HFD) and the "kinetic family drawing" (KFD), which has brought a standardization to the interview of these children and the interpretation of their art. This is invaluable to front-line clinicians, private practitioners, trauma centers, child protective services, and the legal system.
