 SOLUTION | meaning in the Cambridge English Dictionary  
 A buffer solution (more precisely, pH buffer or hydrogen ion buffer) is an aqueous solution consisting of a mixture of a weak acid and its conjugate base, or vice versa. Its pH changes very little when a small amount of strong acid or base is added to it. Buffer solutions are used as a means of keeping pH at a nearly constant value in a wide variety of chemical applications.

An aqueous solution is a solution in which the solvent is water. It is mostly shown in chemical equations by appending (aq) to the relevant chemical formula. For example, a solution of table salt, or

sodium chloride (NaCl), in water would be represented as  $\text{Na}^+ (\text{aq}) + \text{Cl}^- (\text{aq})$ . The word aqueous (which comes from aqua) means pertaining to, related to, similar to, or dissolved in, water.
