The economic success achieved in the last decade in East Asia has brought about a fundamental reorientation in the Western view of the region. In order to contribute to a better understanding of present events and future developments in the area, leading East Asia economists and men of experience in Asian business from Asia, America, and East and West Europe have written papers on their research or business fields for this volume. The individual articles deal with problems common to the East Asian region and the Pacific area as well as with specific economic problems of Japan, China and South Korea. The volume is divided into four parts: East Asia and the Pacific Basin includes articles on supra-national issues, for example on the international economic relations of Japan, China, Taiwan and Korea. Japan includes articles on Japanese industrial and business structure, technological policy, exports and other issues. China includes articles on structural change, economic reforms, fiscal policy, agriculture and other issues. Korea includes articles on economic and industrial policy, restructuring, protectionism and other issues. The occasion of the publication of this volume is the 70th birthday of Willy Kraus, who for many years has been actively concerned with the questions of development in the East Asian region.

What do Eastern Europe's booming sex trade, America's subprime mortgage lending scandal, China's fake goods industry, and celebrity philanthropy in Africa have in common? With biopirates trolling the blood industry, fish-farming bandits ravaging the high seas, pornography developing virtually in Second Life, and games like World of Warcraft spawning online sweatshops, how are rogue industries transmuting into global empires? And will the entire system be transformed by the advent of sharia economics? With the precision of an economist and the narrative deftness of a storyteller, syndicated journalist Loretta Napoleoni examines how the world is being reshaped by dark economic forces, creating victims out of millions of ordinary people whose lives have become trapped inside a fantasy world of consumerism. Napoleoni reveals the architecture of our world, and in doing so provides fresh insight into many of the most insoluble problems of our era. [Theory and Policy](#) Springer Science & Business Media

There is a powerful and enduring economic tradition which holds that a paramount concern for economists should be the promotion of social justice. This book collects essays by many of the best known contemporary economists, in memory of Fausto Vicarelli, a leading figure in Keynesian economics. The contributors discuss the role of economic theory in tackling poverty and unemployment in both the developed and developing world and in promoting a new international economic order. The outstanding international team of contributors includes Anthony. B. Atkinson, Paul Davidson, Jan Kregel, James Tobin and Hyman P. Mynsky.

The objective of this study is to provide an in-depth analysis of the exchange rate pass-through relationship, using Australian imports of manufactures as a case study. The study begins by piecing together the theoretical literature on exchange rate pass-through, to provide the basis for the development of models for the empirical analysis. To place the empirical analysis in comparative context, a critical survey of the existing empirical literature on exchange rate pass-through is then undertaken. This is followed by a review of aspects of the structure and performance of Australian manufacturing that relate to the theme of the study. Next, the data and methodology are discussed. The analysis of exchange rate pass-through is conducted in two stages. First, it seeks to establish the degree to which Australian dollar (AUD) import prices of total manufactures and 50 product categories contained therein have responded to the massive fluctuations in the AUD during the 1980s. This is done by applying an econometric procedure which avoids the pit-falls in previous studies to a carefully assembled data set. Second, the study investigates the determinants of inter-product differences in the degree of exchange rate pass-through. This is done by relating the pass-through coefficients to a series of variables representing foreign control, quantitative restrictions (QRs), product characteristics and market structure within a cross section regression framework.

Interregionalism, the institutionalized relations between world regions, is a new phenomenon in international relations. It also a new layer of development in an increasingly differentiated global order. This volume examines the structure of this phenomenon and the scholarly discourse it is generating. It takes stock of empirical facts and theoretical explanations, bringing together with clarity and concision the latest research on this key area. This essential new book: * traces the emergence of interregionalism and reviews the latest literature * provides a conceptual and theoretical framework for study * includes case studies of inter-regional relations between: Asia and America; Asia and Europe; Europe and America; and Europe and Africa. * delivers comparative analyses and special cases such as continental summits and interregional relationships beyond the Triad. * summarizes and evaluates the findings of each chapter, providing a basis for further research. This is a key reference book for students and researchers of regionalism, global governance and international relations.

Fondamenti di economia internazionale Hoover Press

Recent developments in public economics have largely been in the direction of reaffirming the limits of the market and of establishing new ones. The possible existence of fundamental non-convexities, imperfect and asymmetric information, incentive compatibility, imperfect competition, strategic complementarity, and scale economies led to the conclusion that a large set of market failures exist; such situations also imply government failure. Acocella, considers this complicated picture and provides a discussion of the different approaches to establishing social 'rankings' of the possible situations and the underlying principles. The arguments for and against different institutions are then analysed at a micro and macroeconomic level. The market and the government are recognised as imperfect, and thus complementary, institutions. Specific policy targets and instruments are considered in the areas of micro and macro-economic policy. Special attention is devoted to questions of policy management in an open economy. Finally, problems of domestic and international policy co-ordination are considered.

This book shows how such individual arrangements can be made fair and acceptable to coworkers, and beneficial to both the employee and the employer.

Paul Krugman chronicles how the boom economy unravelled: how exuberance gave way to pessimism, how the age of corporate heroes gave way to corporate scandals, how fiscal responsibility collapsed.

Joan Robinson and the Americans Routledge

La nuova edizione di questo testo ormai classico di Paul Krugman e Maurice Obstfeld ha costituito per gli autori l'occasione per apportare cambiamenti rilevanti che riflettono gli importanti sviluppi che riguardano l'economia internazionale sia sul piano teorico che su quello operativo. Tra le diverse novità, gli autori hanno dedicato un nuovo capitolo al commercio internazionale, introducendo anche il modello gravitazionale. L'edizione italiana contiene alcune novità rispetto a quella americana: per meglio adattarsi alla didattica accademica italiana, l'opera è stata suddivisa in due volumi: il primo dedicato alla teoria e politica del commercio internazionale e il secondo alle politiche macroeconomiche internazionali; le figure e tabelle sono state aggiornate per riflettere meglio la realtà economica dell'Italia e dell'Europa; sono stati introdotti dei nuovi riquadri dedicati ad approfondire alcune tematiche; alla fine di ciascun capitolo è stata inserita una nuova sezione con gli indirizzi internet utili per approfondire ulteriormente alcuni argomenti.
