 Follow an epic story of the Viking Age that traces the historical trail of an ancient piece of jewelry found in a Viking grave in England to its origins thousands of miles east in India. An acclaimed bioarchaeologist, Catrine Jarman has used cutting-edge forensic techniques to spark her investigation into the history of the Vikings who came to rest in British soil. By examining teeth that are now over one thousand years old, she can determine childhood diet—and thereby where a person was likely born. With radiocarbon dating, she can ascertain a death-

date down to the range of a few years. And her research offers enlightening new visions of the roles of women and children in Viking culture. Three years ago, a Carnelian bead came into her temporary possession. River Kings sees her trace the path of this ancient piece of jewelry back to eighth-century Baghdad and India, discovering along the way that the Vikings' route was far more varied than we might think—that with them came people from the Middle East, not just Scandinavia, and that the reason for this unexpected integration between the Eastern and Western worlds may well have been a slave trade running through the Silk Road, all the way to Britain. Told as a riveting history of the Vikings and the methods we use to understand them, this is a major reassessment of the fierce, often-mythologized voyagers of the North—and of the global medieval world as we know it.

A collection of stories—some well known, some more obscure—capturing some of the best storytelling of this golden age of nonfiction. An anthology of the best new masters of nonfiction storytelling, personally chosen and introduced by Ira Glass, the producer and host of the award-winning public radio program *This American Life*. These pieces—on teenage white collar criminals, buying a cow, Saddam Hussein, drunken British soccer culture, and how we know everyone in our Rolodex—are meant to mesmerize and inspire.

The book of 1 Kings outlines the rise and fall of ancient Israel through the stories of fourteen kings. It is a book of great victories and devastating failures. In its pages are violence, betrayal, power, and politics. But no matter how great the accomplishments or evil the deeds, none of these kingdoms built by human kings could last. John Woodhouse walks us through this book passage by passage as it reveals how God's purpose for the kings reaches far beyond what they could accomplish in their lifetimes. Their lives are part of a greater story, bearing witness about the King of kings, Jesus Christ, the Savior of the world—building and strengthening our faith as we set our eyes on the kingdom that will last forever.

This book looks into the life of each king in Jerusalem, and those in Samaria in the most logical manner. In the way they were recorded in scripture. Each king fulfilled one little part in God's prophetic timing. A timing and pattern this world is repeating today. The lives of those kings and the symbols involved either established or called attention to that pattern. Unlike other books of this nature, this book sticks to scripture for the answers. This book shows the world how God recorded answers in other books of the Bible generations before the questions were asked. In short, this book shows how God was in control every step of the way, and knew the outcome of every event long before details began to unfold. If only those kings knew how to go back to scripture for the answers they needed. Think of how the course of this world could have been changed. But human nature has always depended too much on itself, and not enough on the God who created this world.

In the Middle Ages, England had to contend with a string of usurpers who disrupted the British monarchy and ultimately changed the course of European history by deposing England's reigning kings and seizing power for themselves. Some of the most infamous usurper kings to come out of medieval England include William the Conqueror, Stephen of Blois, Henry Bolingbroke, Edward IV, Richard III, and Henry Tudor. Did these kings really deserve the title of usurper or were they unfairly vilified by royal propaganda and biased chroniclers? In this book we examine the lives of these six medieval kings, the circumstances which brought each of them to power, and

whether or not they deserve the title of usurper. Along the way readers will hear stories of some of the most fascinating people from medieval Europe, including Empress Matilda, the woman who nearly succeeded at becoming the first ruling Queen of England; Eleanor of Aquitaine, the queen of both France and England who stirred her own sons to rebel against their father, Henry II; the cruel and vengeful reign of Richard II which caused his own family to overthrow him; the epic struggle for power between Henry VI, Margaret of Anjou, Richard of York, and Edward IV during the Wars of the Roses; the notorious Richard III and his monstrous reputation as a child-killer; and Henry VII who rose from relative obscurity to establish the most famous royal family of all time: the Tudors.

This collaborative commentary on, or dictionary of, Kings, explores cross-cutting aspects of Kings ranging from the analysis of its composition, historically regarded, to its transmission and reception. Ample attention is accorded sources, figures and peoples who play a part in the book. The commentary deals with Kings treatment in translation and role in later ancient literature. While our comments do not proceed verse by verse, the volume furnishes guidance, from contributors highly qualified to advance contemporary discussion, on the book's historical background, its literary intentions and characteristics, and on themes and motifs central to its understanding, both of itself and of the world from which it arose. This volume functions as a meta-commentary, offering windows into the secondary literature, but assembling data more fully than is the case in individual commentaries.

A stimulating collection of studies by leading feminist scholars offering radical readings of the Old Testament books of Samuel and Kings. Although gender ideology may have been only a 'side issue' for the writers of these texts, the articles in this collection show that it is definitely a constituent of the general ideological framework of this section of Israel's historiography, and they explore the texts for women's lives, female voices, gendered types, and the presence of women in the written history. As Athalya Brenner states in her introduction to the volume, in

looking at the presentation of women and femaleness in Samuel and Kings we 'encounter chiefly relational images': women are seen as daughters, mothers, queen mothers, and in their relations to kings and prophets.

**NUBIAN PHARAOHS AND MEROITIC KINGS: THE KINGDOM OF KUSH** Necia Desiree Harkless has completed her odyssey of 24 years initiated by a poem that emerged in the odd moments of early morning and her studies as a Donovan Scholar at the University of Kentucky with Dr. William Y. Adams, the leading Nubiologist of the world. The awesome result is her attempt to map the cultural, social, political history of Nubia as a single people as actors on the world stage as they act out their destinies in the cradle of civilization. The underlying purpose of her book is to reconstruct the collective efforts of the past and present Nubian campaigns and their collaborative scholarship so that the African American as well as all Americans can begin to understand the contributions of the civilization of Africa and Asia as a continuous historical entity. The history of the Kingdom of Kush begins with its earliest kingdom of Kerma in 2500 BC. It continues with the conquest of Egypt by the Nubian Pharaohs in 750 BC, reluctantly recognized as the Twenty-fifth Dynasty of

Egyptian Pharaohs. They ruled as black pharaohs from their Kingdom at Napatan until they were forced one hundred years later to retreat to Napata by the Assyrians who assumed control of the Egyptians. It was at Meroe, the last empire of the Kush, that forty generations of Meroitic kings and queens continued the Kingdom of Kush reaching monumental and dynastic heights. Their symbiotic relationship with Egypt was over, allowing them to develop their own indigenous culture with a language and script of their own. Their architecture, arts, politics, material and spiritual culture in the minds of many scholars surpassed that of Egypt. Over two hundred pyramids have been investigated. It is an epic that will be long remembered. The dawn of Christianity in the Kingdom of Kush has been found in the treasure cove of the Frescoes of Faras.
