A Manual of Spherical and Practical Astronomy, Embracing the General Problems of Spherical Astronomy Library of Alexandria

THE analogy existing between the vegetable and animal worlds, and the resemblances between human and tree life, have been observed by man from the most remote periods of which we have any records. Primitive man, watching the marvellous changes in trees and plants, which accurately marked not only the seasons of the year, but even the periods of time in a day, could not fail to be struck with a feeling of awe at the mysterious invisible power which silently guided such wondrous and incomprehensible operations. Hence it is not astonishing that the early inhabitants of the earth should have invested with supernatural attributes the tree, which in the gloom and chill of Winter stood gaunt, bare, and sterile, but in the early Spring hastened to greet the welcome warmth-giving Sun by investing itself with a brilliant canopy of verdure, and in the scorching heat of Summer afforded a refreshing shade beneath its leafy boughs. So we find these men of old, who had learnt to reverence the mysteries of vegetation, forming conceptions of vast cosmogonic

world- or cloud-trees overshadowing the universe; mystically typifying creation and regeneration, and yielding the divine ambrosia or food of immortality, the refreshing and life-inspiring rain, and the mystic fruit which imparted knowledge and wisdom to those who partook of it. So, again, we find these nebulous overspreading world-trees connected with the mysteries of death, and giving shelter to the souls of the departed in the solemn shade of their dense foliage. Looking upon vegetation as symbolical of life and generation, man, in course of time, connected the origin of his species with these shadowy cloud-trees, and hence arose the belief that humankind first sprang from Ash and Oak-trees, or derived their being from Holda, the cloud-goddess who combined in her person the form of a lovely woman and the trunk of a mighty tree. In after years trees were almost universally regarded either as sentient beings or as constituting the abiding places of spirits whose existence was bound up in the lives of the trees they inhabited. Hence arose the conceptions of Hamadryads, Dryads, Sylvans, Tree-nymphs, Elves, Fairies, and other beneficent spirits who peopled forests and dwelt in individual trees—not only in the Old World, but in the dense woods of North America, where the Mik-amwes, like Puck, has from time immemorial frolicked by moonlight in the forest openings. Hence, also, sprang up the morbid notion of trees being haunted by demons, mischievous imps, ghosts, nats, and evil spirits, whom it was deemed by the ignorant and

superstitious necessary to propitiate by sacrifices, offerings, and mysterious rites and dances. Remnants of this superstitious tree-worship are still extant in some European countries. The Irminsul of the Germans and the Central Oak of the Druids were of the same family as the Asherah of the Semitic nations. In England, this primeval superstition has its descendants in the village maypole bedizened with ribbons and flowers, and the Jack-in-the-Green with its attendant devotees and whirling dancers. The modern Christmas-tree, too, although but slightly known in Germany at the beginning of the present century, is evidently a remnant of the pagan tree-worship; and it is somewhat remarkable that a similar tree is common among the Burmese, who call it the Padaytha-bin. This Turanian Christmas-tree is made by the inhabitants of towns, who deck its Bamboo twigs with all sorts of presents, and pile its roots with blankets, cloth, earthenware, and other useful articles.

A heartfelt novel of shedding secrets, facing the past, and embracing the magic of love and family by the Amazon Charts and Wall Street Journal bestselling author of Where the Forest Meets the Stars. After the untimely deaths of her aunt and mother, young Riley Mays moved from Chicago to

her cousins' Wisconsin farm. Here she found solace in caring for her extraordinary adoptive brother, exploring the surrounding wild nature, and gazing at the mystical moon--a private refuge in which she hides from her most painful memories. But ten years later, now twenty-one, Riley feels too confined by the protective walls she's erected around herself. When a stranger enters her family's remote world, Riley senses something he's hiding, a desire to escape that she understands well. Suffering from writer's block, bestselling novelist Vaughn Orr has taken to the country roads when he happens upon the accommodating, if somewhat unusual, Mays family. He's soon captivated by their eccentricities--and especially by Riley and her quiet tenacity. In her, he recognizes a shared need to keep heartbreaking secrets buried. As the worst moments of their lives threaten to surface, Riley and Vaughn must find the courage to confront them if they're to have any hope of a happy future. With the help of Riley's supportive family, a dash of everyday magic, and the healing power of nature, can the pair let go of the troubled pasts they've clung to so tightly for so long?

For Sergeant Whiskeyjack and his squad of Bridgeburners, and for Tattersail, surviving cadre mage of the Second Legion, the aftermath of the siege of Pale should have been a time to mourn the many dead. However, it would appear that the Empire is not alone in this great game. Sinister, shadowbound forces are gathering as the gods themselves prepare to play their hand... Be Fearless is researched-based call to action for those seeking to live extraordinary lives and bring about transformational change. LOS ANGELES TIMES BESTSELLER * NATIONAL BESTSELLER Weaving together storytelling, practical tips and inspiration, the book will teach you how to put the five fearless principles to work so that you too can spark the sorts of remarkable breakthroughs that can impact the world. Philanthropist, investor, and technology pioneer Jean Case brings to life the five Be Fearless principles common to the people and organizations that bring about transformational change. When National Geographic Chairman Jean Case set out to investigate the core qualities of great change makers, past and present, from inventors to revolutionaries, she found five surprising traits they all had in common. These weren't wealth, privilege, or even genius. What all of these exceptional men and women shared was that they had chosen to make a "big bet," take bold risks, learn from their failures, reach beyond their bubbles, and let urgency conquer fear. Throughout Be Fearless, Jean vividly illustrates these principles through storytelling--from her own transformational life experiences, to Jane Goodall's remarkable breakthroughs in understanding and protecting chimpanzees, to celebrity chef José Andrés' decision to be a "first responder" and take his kitchen to the sites of devastating hurricanes to feed the hungry, to Madame C.J. Walker's vision to build a hair care empire that would employ thousands across the country, and more. She shares new insights to stories you might think you know--like Airbnb's tale of starting from scratch to transform the hospitality industry, to John F. Kennedy's history-making moonshot--and gems from changemakers you've never heard of. Be Fearless features a compelling foreword from Jane Goodall saying "there is no time in history when it has been more important to Be Fearless" and a new afterword with stories of people inspired to take action after reading the book.
