Global  
Education in  
the Digital

cutting-edge  
research  
publication  
that explores  
the complex  
discourse of

trends, shifts, and changes happening in the field of education and to understand the implications for teaching, learning, and professional development. The book helps educators understand how to make their pedagogy and andragogy relevant in the framework of constant technological shifts and changes in order to help students thrive in a global economy. Featuring a

wide range of topics such as gamification, pedagogy, and intercultural learning, this book is ideal for curriculum designers, academicians, education professionals, researchers, policymakers, and students. *Cambridge Global English Stage 2 Teacher's Resource A&C* Black This edited book uses the concept of diversity in child foreign language education as a major organizing principle.

Since a foreign language, most typically English, is taught globally to an increasing number of children, the variability in the process and varied learning outcomes are inescapable phenomena. This book has been constructed on the premise that heterogeneity, first, concerns young language learners, who due to the disparity in the pace of development need

appropriately tailored educational solutions, and, second, it refers to a diversity of contexts in which learning takes place. The contexts can be defined on a macroscale (e.g. different countries), mesoscale (e.g. different institutions), and microscale (e.g. specific learner groups). The book consists of four thematic strands. In Part One the learner-internal causes of

heterogeneity of young language learners are clarified. Part Two presents a sample of classroom studies in which learner variables, such as gender, learner preferences, and special needs are taken into account. Part Three looks at teaching materials and how they meet learners' needs. Finally, Part Four highlights diversity issues that teachers should be prepared to

face.

It's true that some people spend years studying Spanish before they finally get around to speaking the language. But here's a better idea. Skip the years of study and jump right to the

speaking part. Sound crazy? No, it's language hacking. Unlike most traditional language courses that try to teach you the rules of Spanish, #LanguageHacking shows you how to learn and speak Italian through proven memory techniques, unconventional shortcuts and conversation strategies perfected by one of the world's greatest language learners, Benny Lewis, aka the Irish Polyglot. Using the language hacks - shortcuts that make learning simple - that Benny mastered while learning his 11 languages and his 'speak from the start' method, you will crack the language code and exponentially increase your language abilities so that you can get fluent faster. It's not magic. It's not a language gene. It's not something only "other people" can do. It's about being smart with how you learn, learning what's indispensable, skipping what's not, and using what you've learned to have real conversations in Spanish from day one. The Method #LanguageHacking takes a modern approach to language learning, blending the power of online social collaboration with traditional methods. It focuses on the conversations that learners

need to master right away, rather than presenting language in order of difficulty like most courses. This means that you can have conversations immediately, not after years of study. Each of the 10 units culminates with a speaking 'mission' that prepares you to use the language you've learned to talk about yourself. Through the language hacker online learner community,

you can share your personalized speaking 'missions' with other learners - getting and giving feedback and extending your learning beyond the pages of the book . You don't need to go abroad to learn a language any more.

Multilingual Matters Local Language Testing: Design, Implementation, and Development describes the language testing practice that exists in the intermediate space between large-scale standardized testing and classroom assessment,

an area that is rarely addressed in the language testing and assessment literature. Covering both theory and practice, the book focuses on the advantages of local tests, fosters and encourages their use, and provides suggested ideas for their development and maintenance. The authors include examples of operational tests with well-proven track records and discuss: the ability of

local tests to represent local contexts and values, explicitly and purposefully embed test results within instructional practice, and provide data for program evaluation and research; local testing practices grounded in the theoretical principles of language testing, drawing from experiences with local testing and providing practical examples of local language tests, illustrating how they can be designed to effectively function within and across different institutional contexts; examples of how local language tests and assessments are developed for use within a specific context and how they serve a variety of purposes (e.g., entry-level proficiency testing, placement testing, international teaching assistant testing, writing assessment, and program evaluation). Aimed at language program directors, graduate students, and researchers involved in language program development and evaluation, this is a timely book in that it focuses on the advantages of local tests, fosters and encourages their use, and outlines their development and maintenance. It constitutes essential reading for language program

directors, graduate students, and researchers involved in language program development and evaluation. Cambridge Global English Stage 1 Teacher's Resource Routledge This proceedings book captures a wide range of timely themes for readers to be able to foresee the digital era's impact on English teaching in non-English speaking countries.

English used in the global environment, the frequent mobile communication, and the use of AI-based translators are bringing about dramatic changes in our English language learning and teaching. Who can provide us the wisdom to know what to do? Those scholars going through these complex environmental changes! A collection of puzzle pieces may bring us a better contour for the future than a

perfectly edited book. It's indeed a pleasure reading these insightful pieces to gain wisdom for the future of ELT practices in global contexts. *Cross-National Perspectives on Integration Regimes* Routledge This edited collection examines a range of English Language Teaching (ELT) research in the Middle East and North Africa (MENA). While the MENA context has witnessed

considerable change in recent years, it has so far been under-represented in ELT research at both the regional and the international level. This book aims to fill that gap by surveying the current state of the field, examining in detail a range of issues and concepts, and suggesting future directions for further research. It will be of interest to ELT researchers and practitioners in general -

not just those based in MENA contexts themselves. *Cambridge Global English Stage 6 Teacher's Resource* Routledge Face2face Pre-intermediate is an easy-to-teach General English course that helps adults and young adults to speak and listen with confidence. The DVD-ROM in the Student's Book includes consolidation activities and electronic portfolio for learners to track their

progress with customisable tests and grammar and vocabulary reference sections. Classified English Vocabulary According CEFR (A1, A2, B1, B2, C1, C2 ) Cambridge University Press Benny Lewis, who speaks over ten languages—all self-taught—runs the largest language-learning blog in the world, *Fluent In 3 Months*. Lewis is a full-time "language hacker," someone who

devotes all of his time to finding better, faster, and more efficient ways to learn languages. **Fluent in 3 Months: How Anyone at Any Age Can Learn to Speak Any Language from Anywhere in the World** is a new blueprint for fast language learning. Lewis argues that you don't need a great memory or "the language gene" to learn a language quickly, and debunks a number of long-held beliefs, such

as adults not being as good of language learners as children.

### **From Policy to Practice**

IGI Global **This book** explores the ideologies, policies, and practices of English language education around the world today. It shows the ways in which ideology is a constituent part of the social realities of English language teaching (ELT) and how ELT policies and practices are shaped by ideological

positions that privilege some participants and marginalize others. Each chapter considers the multiple ideologies underlying the thinking and actions of different members of society about ELT and how these inform overt and covert policies at the national level and beyond. They examine the implications of investigating ELT ideologies and policies for advancing socio-political understandings of practical

aspects such as instruction, materials, assessment, and teacher education in the field. Introducing new perspectives on the theory and practice of language teaching today, this book is ideal reading for researchers and postgraduate students interested in applied linguistics and language education, faculty members of higher education institutions, English

language teachers, and policy makers and planners. Ideologies, Policies and Practices Language Smart Drawing on the collective expertise of language scholars and educators in a variety of subdisciplines, the Handbook for Arabic Language Teaching Professionals in the 21st Century, Volume II, provides a comprehensive treatment of teaching and research in Arabic as a second and

foreign language worldwide. Keeping a balance among theory, research and practice, the content is organized around 12 themes: Trends and Recent Issues in Teaching and Learning Arabic Social, Political and Educational Contexts of Arabic Language Teaching and Learning Identifying Core Issues in Practice Language Variation, Communicative Competence and Using

Frames in Arabic Language Teaching and Learning Programs: Goals, Design and Curriculum Teaching and Learning Approaches: Content-Based Instruction and Curriculum Arabic Teaching and Learning: Classroom Language Materials and Language Corpora Assessment, Testing and Evaluation Methodology of Teaching Arabic: Skills and	Components Teacher Education and Professional Development Technology-Mediated Teaching and Learning Future Directions The field faces new challenges since the publication of Volume I, including increasing and diverse demands, motives and needs for learning Arabic across various contexts of use; a need for accountability and academic research given	the growing recognition of the complexity and diverse contexts of teaching Arabic; and an increasing shortage of and need for quality of instruction. Volume II addresses these challenges. It is designed to generate a dialogue—continued from Volume I—among professionals in the field leading to improved practice, and to facilitate interactions, not only among

What is required to achieve civic integration and citizenship in nation states across the world? Should language testing be a part of it? This book addresses the urgent need to develop a fuller conceptual and theoretical basis for language testing than is currently available, to enable widespread discussion of this theme and the concomitant linguistic and

cultural requirements. The policy proposals for civic integration have so far been conducted almost entirely at a national level, and with little regard for the experiences of a countries with long traditions of migration, such as the USA, Canada, the UK or Australia. At the same time, EU enlargement and the ongoing rise in the rate of migration into and across Europe

suggest that these issues will continue to grow in importance. This book raises the level of discussion to take account of international developments and to promote a more coherent and soundly based debate. It will appeal to researchers and academics working in sociolinguistics and language education, as well as those working on language policy.

Routledge  
 This is the third volume of a trilogy on English Language education in Asia within the Routledge Critical Studies in Asian

Education. Put together by editors and contributors selected by Asia TEFL, this book provides a timely and critical review of the current trends in tertiary level English education in Asia. It foregrounds the developments and trends, policies and implementation, as well as research and practice. Written by ELT scholars and educational leaders, this book presents articles on China, Hong Kong, India,

Japan, Korea, Malaysia, the Philippines, Singapore, Thailand, and Vietnam. While the authors focus on their own local issues, providing an overview of the state of tertiary English teaching in their respective territories, they also provide insights from their successes and failures which can help inspire solutions to similar challenges faced internationally

in the field. Chapters in the book include: • Heading toward the global standardization of English education in Korean universities • English in tertiary education in India: A Janus-faced perspective with special reference to University of Delhi • Developing English language skills in the Singapore higher education context • ELT at tertiary institutions in

China: A developmental perspective  
 This book will be valued by administrators, researchers and scholars interested in bilingualism, language policy and planning in higher education.
