- New vision of  
the

mechanisms of a successful viral business strategy - The intelligence of a unique virus translated into any business context - Zoonotic strategy requires Zoonotic leadership Every entrepreneur dreams to find a success formula to quickly go viral with his/her product or service. Carole Lamarque believes that this formula for success exists, in nature. It's called a Zoonotic: a virus that is spreading virally all over the world at lightning speed. In this book, she demonstrates with concrete examples how a zoonotic pandemic such as Covid-19 can inspire a successful viral business strategy. [Freddie Ramos Adds It All Up](#) Springer Science & Business Media Jurisdictional competition is a relatively new, but increasingly important, phenomenon in European and international law. The ongoing proliferation of various international courts and tribunals results in a multiplication of judgments and arbitral awards, which potentially conflict with each other. Moreover, the ever expanding exclusive jurisdiction of the European Court of Justice into international law issues further exacerbates and complicates

the problem by mixing European law principles into international law. The selected cases examined in this book, which cover different areas of international and European law, illustrate the methods applied by various international courts and tribunals to deal with overlapping jurisdictions. Since any formal hierarchy or coordination between the various international courts and

tribunals is lacking, it is argued that only soft law methods, such as the application of comity, in particular the Solange-method, appears to be a useful tool to deal with the negative effects associated with jurisdictional competition.

m and prejudice, turbulent staff romances, ambition and failure collide in this swirling, action-packed drama about an overburdened health service that we all depend on and the dedicated individuals that keep it going. 'Tiger country' is where animal instinct stirs and an irrefutable eye opens. Where we make eye contact with the unknown. Tiger Country was premiered at

Hampstead Theatre in 2011 and, following its sell-out run, was revived there in 2014. Regulation, Re-regulation and Representation Edward Elgar Publishing Kenya is a thriving country in East Africa: its economy is largely based on the natural environment that frames the tourism sector, mainly through safaris and holidays on the coast. The natural environment also underpins

the second largest industry: agriculture. Kenya's social, technological, and industrial developments are a reference for many neighboring countries. Kenya plays a leading role in Africa and attracts huge amounts of investments. Furthermore, the humanitarian community has made Nairobi its base for international headquarters and regional offices. This makes Kenya a possible

<p>model for development and investment in its widest sense. This book aims at updating the holistic view on Kenya's natural environment and resources. It provides a sound scientific introduction to this country's physical and socioeconomic setting and its evolution through time and will appeal to a broad audience of students - in Kenya and abroad - as well as those working in the</p>	<p>development and humanitarian sectors and to international donors looking for a scientific compendium on Kenya's environment. Its structure and references allow the reader to deepen his or her knowledge of every theme touched on in the book. The present survey aims at improving the process of knowledge exchange between European and Chinese experts and decision-makers in Information Society law and policy. The EU-China Information Society Project asked the authors to assess both the EU's and the Chinese status quo, and to bring

together both perspectives together in a joint effort to learn from the EU experiences for the Chinese decision-making process today. Springer Nature Achtung-Panzer!The Development of Armoured Forces, Their Tactics and Operational PotentialArms & Armour What Lessons to be Learned? Lulu.com Sacred sites offer believers the possibility of communing with the divine and achieving deeper insight into their faith. Yet their spiritual and cultural importance can lead to competition as religious groups seek to exclude rivals

<p>from practicing potentially sacrilegious rituals in the hallowed space and wish to assert their own claims. Holy places thus create the potential for military, theological, or political clashes, not only between competing religious groups but also between religious groups and secular actors. In War on Sacred Grounds, Ron E. Hassner investigates the causes and properties</p>	<p>of conflicts over sites that are both venerated and contested; he also proposes potential means for managing these disputes. Hassner illustrates a complex and poorly understood political dilemma with accounts of the failures to reach settlement at Temple Mount/Haram el-Sharif, leading to the clashes of 2000, and the competing claims of Hindus and Muslims at</p>	<p>Ayodhya, which resulted in the destruction of the mosque there in 1992. He also addresses more successful compromises in Jerusalem in 1967 and Mecca in 1979. Sacred sites, he contends, are particularly prone to conflict because they provide valuable resources for both religious and political actors yet cannot be divided. The management of conflicts over sacred</p>
---	--	---

sites requires cooperation, Hassner suggests, between political leaders interested in promoting conflict resolution and religious leaders who can shape the meaning and value that sacred places hold for believers. Because a reconfiguration of sacred space requires a confluence of political will, religious authority, and a window of opportunity, it is relatively rare. Drawing on the study

of religion and the study of politics in equal measure, Hassner's account offers insight into the often-violent dynamics that come into play at the places where religion and politics collide. *Careers 2013* Newnes Updated with an emphasis on current issues, this classic casebook emphasizes developments in international law, with expertly edited cases and problems

for class discussion. Cases and Materials on International Law offers a treatment of the subject for introductory and advanced classes and detailed readings and reference materials for those who wish to pursue topics in depth. The fourth edition enriches every chapter with new information on institutions contributing to the sources and enforcement of international law, including

the World Trade Organization, the International Criminal Tribunals for Yugoslavia and Rwanda, the prospective International Criminal Court, and organizations in the fields of law of the sea and arms control. International criminal law now has a chapter of its own, and the casebook gives expanded treatment to human rights, environmental law, and economic law.

*Constitutional Challenges to the European Arrest Warrant* LIT Verlag Münster Increasingly, European companies in a variety of business sectors as well as professional groups are taking self-regulatory initiatives as a means of gaining competitive. This book examines the legal basis of self-regulation and its function in the process of European legal integration, with particular

reference to European private law. *The Magazine of Health* Haynes Service and Repair Manuals The Canadian Guide to In-service Road Safety Reviews is a practical guide for conducting reviews on existing roads, based on the current experience and expertise in Canada and internationally . A companion guide to TAC's Canadian Road Safety Audit Guide, this publication provides

guidelines to traffic practitioners on how to upgrade the operational and physical characteristics of existing in-service roads to be more compatible with current traffic conditions and safety knowledge.

The debate

of European

Private Law (EPL) has, until now, been mainly concerned with substantive rules. The link between rules and institutions suggests that governance of both the process of harmonisation and its outcome is necessary. This book covers various perspectives on the challenge of designing governance for EPL: the implications of a multi-level system in terms of competences, the interplay between market integration and regulation, the legitimacy of private law making, the importance of self-regulation, the usefulness of conflict of law rules, the role of intergovernmental institutions, and the aftermath of enlargement. In addressing these, the book's achievements are to successfully link two areas of scholarship that have so far remained separate, EPL and new modes of governance, and to address institutional reforms. The contributions offer different proposals to improve governance: the creation of a European Law institute, the improvement of judicial cooperation among national courts, the use of committees for implementation of EPL. Suggesting practical institutional reforms that

<p>can improve the process of Europeanisation of private law, this book will be of great interest to scholars of law, politics, political science, sociology and economics. It will also appeal to policymakers, and members of both European institutions and national institutions dealing with European matters.</p> <p><i>The Development of Armoured Forces, Their Tactics and Operational Potential</i></p>	<p>Hague : Mouton</p> <p>Now in paperback and filled with stunning full-color photographs, Steve Swinburne's concept book introduces children to the basics of shadows.
