MORSE EFRAIN

Undiversified Random House
 From a renowned financial journalist who has written for Time, Fortune, Forbes, and The New Yorker, a fresh and unexpectedly profound book that draws on hundreds of hours of exclusive interviews with many of the world's super-investors to demonstrate that the keys for building wealth hold other life lessons as well. Billionaire investors. If we think of them, it's with a mixture of awe and suspicion. Clearly, they possess a kind of genius—the proverbial Midas Touch. But are the skills they possess transferable? And do they have anything to teach us besides making money? In *Richer, Wiser, Happier*, William Green draws on interviews that he's

conducted over twenty-five years with many of the world's greatest investors. As he discovered, their talents extend well beyond the financial realm. The most successful investors are mavericks and iconoclasts who question conventional wisdom and profit vastly from their ability to think more rationally, rigorously, and objectively. They are master game players who consciously maximize their odds of long-term success in markets and life, while also minimizing any risk of catastrophe. They draw powerful insights from many different fields, are remarkably intuitive about trends, practice fanatical discipline, and have developed a high tolerance for pain. As Green explains, the best investors can teach us not only how to become rich, but how to improve the way we think, reach decisions, assess risk, avoid costly errors, build resilience, and

turn uncertainty to our advantage. Green ushers us into the lives of more than forty super-investors, visiting them in their offices, homes, and even their places of worship—all to share what they have to teach us. *Richer, Wiser, Happier* brings together the thinking of many of the greatest investment minds, from Sir John Templeton to Charlie Munger, Jack Bogle to Ed Thorp, Will Danoff to Mohnish Pabrai, Bill Miller to Laura Geritz, Joel Greenblatt to Howard Marks. In explaining how they think and why they win, this landmark book provides gems of insight that will enrich you not only financially but also professionally and personally. The Most Important Thing McGill-Queen's Press - MQUP
 A Business Week, New York Times Business, and USA Today Bestseller
 "Ambitious and readable . . . an engaging

introduction to the oddsmakers, whom Bernstein regards as true humanists helping to release mankind from the choke holds of superstition and fatalism." —The New York Times "An extraordinarily entertaining and informative book." —The Wall Street Journal "A lively panoramic book . . . Against the Gods sets up an ambitious premise and then delivers on it." —Business Week "Deserves to be, and surely will be, widely read." —The Economist "[A] challenging book, one that may change forever the way people think about the world." —Worth "No one else could have written a book of such central importance with so much charm and excitement." —Robert Heilbroner author, *The Worldly Philosophers* "With his wonderful knowledge of the history and current manifestations of risk, Peter Bernstein brings us *Against the Gods*. Nothing like it will come out of the financial world this year or ever. I speak carefully: no one should miss it." —John Kenneth Galbraith Professor of Economics Emeritus, Harvard University In this unique exploration of the role of risk in our society, Peter Bernstein argues that the notion of bringing risk under control is one of the central ideas that distinguishes modern times from the distant past. *Against the Gods* chronicles the remarkable intellectual adventure that liberated humanity from oracles and soothsayers by means of the powerful tools of risk management that are available to us today. "An extremely readable history of risk." —Barron's "Fascinating . . . this challenging volume will help you understand the uncertainties that every investor must face." —Money "A singular achievement." —Times Literary Supplement "There's a growing market for savants who can render the recondite intelligibly-witness Stephen Jay Gould (natural history), Oliver Sacks (disease), Richard Dawkins (heredity), James Gleick (physics), Paul Krugman (economics)-and Bernstein would mingle well in their company." —The Australian
Mastering The Market Cycle Columbia University Press
 When Detective Catrin Price returns to Cardiff after a self-imposed exile she is determined to lay to rest the ghosts of her past. Then Rhys, once a promising young policeman, is found dead on one of her first nights on patrol. The official verdict is an accidental overdose, but Cat is convinced that there is something else.

- Adventures with Howard Oldcastle Books
 Wall Street Journal bestseller! Poker champion turned business consultant Annie Duke teaches you how to get comfortable with uncertainty and make better decisions as a result. In Super Bowl XLIX, Seahawks coach Pete Carroll made one of the most controversial calls in football history: With 26 seconds remaining, and trailing by four at the Patriots' one-yard line, he called for a pass instead of a hand off to his star running back. The pass was intercepted and the Seahawks lost. Critics called it the dumbest play in history. But was the call really that bad? Or did Carroll actually make a great move that was ruined by bad luck? Even the best decision doesn't yield the best outcome every time. There's always an element of luck that you can't control, and there is always information that is hidden from view. So the key to long-term success (and avoiding worrying yourself to death) is to think in bets: How sure am I? What are the possible ways things could turn out? What decision has the highest odds of success? Did I land in the unlucky 10% on the strategy that works 90% of the time? Or is my success attributable to dumb luck rather than great decision making? Annie Duke, a former World Series of Poker champion turned business consultant, draws on examples from business, sports, politics, and (of course) poker to share tools anyone can use to embrace uncertainty and make better decisions. For most people, it's difficult to say "I'm not sure" in a world that values and, even, rewards the appearance of certainty. But professional poker players are comfortable with the fact that great decisions don't always lead to great outcomes and bad decisions don't always lead to bad outcomes. By shifting your thinking from a need for certainty to a goal of accurately assessing what you know and what you don't, you'll be less vulnerable to reactive emotions, knee-jerk biases, and destructive habits in your decision making. You'll become more confident, calm, compassionate and successful in the long run.
A Brief Career in the Cocaine Trade Penguin
 Peopled by larger-than-life heroes and villains, charged with towering questions of good and evil, *Atlas Shrugged* is Ayn

Rand's magnum opus: a philosophical revolution told in the form of an action thriller—nominated as one of America's best-loved novels by PBS's *The Great American Read*. Who is John Galt? When he says that he will stop the motor of the world, is he a destroyer or a liberator? Why does he have to fight his battles not against his enemies but against those who need him most? Why does he fight his hardest battle against the woman he loves? You will know the answer to these questions when you discover the reason behind the baffling events that play havoc with the lives of the amazing men and women in this book. You will discover why a productive genius becomes a worthless playboy...why a great steel industrialist is working for his own destruction...why a composer gives up his career on the night of his triumph...why a beautiful woman who runs a transcontinental railroad falls in love with the man she has sworn to kill. *Atlas Shrugged*, a modern classic and Rand's most extensive statement of Objectivism—her groundbreaking philosophy—offers the reader the spectacle of human greatness, depicted with all the poetry and power of one of the twentieth century's leading artists.

The Score Random House
 "This is that rarity, a useful book."--Warren Buffett Howard Marks, the chairman and cofounder of Oaktree Capital Management, is renowned for his insightful assessments of market opportunity and risk. After four decades spent ascending to the top of the investment management profession, he is today sought out by the world's leading value investors, and his client memos brim with insightful commentary and a time-tested, fundamental philosophy. Now for the first time, all readers can benefit from Marks's wisdom, concentrated into a single volume that speaks to both the amateur and seasoned investor. Informed by a lifetime of experience and study, *The Most Important Thing* explains the keys to successful investment and the pitfalls that can destroy capital or ruin a career. Utilizing passages from his memos to illustrate his ideas, Marks teaches by example, detailing the development of an investment philosophy that fully acknowledges the complexities of investing and the perils of the financial world. Brilliantly applying insight to today's volatile markets, Marks offers a volume that is part memoir, part creed, with a number of broad takeaways. Marks expounds on such concepts as "second-level thinking," the price/value relationship, patient opportunism, and defensive investing. Frankly and honestly

assessing his own decisions--and occasional missteps--he provides valuable lessons for critical thinking, risk assessment, and investment strategy. Encouraging investors to be "contrarian," Marks wisely judges market cycles and achieves returns through aggressive yet measured action. Which element is the most essential? Successful investing requires thoughtful attention to many separate aspects, and each of Marks's subjects proves to be the most important thing.

What's Wrong with the World's Leading Media Companies John Wiley & Sons
The world-renowned economist offers "dourly irreverent analyses of financial debacle from the tulip craze of the seventeenth century to the recent plague of junk bonds." —The Atlantic. With incomparable wisdom, skill, and wit, world-renowned economist John Kenneth Galbraith traces the history of the major speculative episodes in our economy over the last three centuries. Exposing the ways in which normally sane people display reckless behavior in pursuit of profit, Galbraith asserts that our "notoriously short" financial memory is what creates the conditions for market collapse. By recognizing these signs and understanding what causes them we can guard against future recessions and have a better hold on our country's (and our own) financial destiny.

A Short History of Financial Euphoria Y Lolfa

As you have probably noticed, there are quite a few investing books out there. Many of them were written by some of the world's greatest investors. So, why should you read our book? Stock investing is more prevalent than ever, whether directly or indirectly through brokerage accounts, exchange-traded funds, mutual funds, or retirement plans. Despite this, the vast majority of individual investors have no training on how to pick stocks. And, until now, there hasn't been a truly accessible, easy-to-understand resource available to help them. The Little Book of Investing Like the Pros was written to fill this void. We believe the simplicity and accessibility of our stock picking framework is truly unique. Using real-world examples and actual Wall Street models used by the pros, we teach you how to pick stocks in a highly accessible, step-by-step manner. Our goal is straightforward—to impart the skills necessary for finding high-quality stocks while protecting your portfolio with risk management best practices. Our practical approach is designed to help demystify the investing process, which can be

intimidating. This training will help set you apart from others who are largely flying blind. Pilots require extensive training before receiving a license. Doctors must graduate medical school, followed by a multi-year residency. Even those providing professional investment advice require certification. But, anyone can buy a stock without any training whatsoever. While buying stocks on a hunch and a prayer may not endanger your life, it can certainly put your finances at risk.

The Little Book of Investing Like the Pros John Wiley & Sons

'I have long wanted to write a book about my life and the extraordinary years I spent with my husband Howard Marks. I feel now is the time. I want to write it from a woman's perspective and describe what it was like to be married to such a charismatic drug smuggler.' Judy Marks
Howard Marks's story has passed into hippie folklore. At one time, the world's then most wanted man had 43 aliases, 89 phone lines and 25 registered companies. Thanks to the technical brilliance of his networking skills, it was estimated that he was trafficking as much as a tenth of all the marijuana smoked in the world. But this is only half the story. Intimately involved throughout was Marks's wife Judy. From living the high life hobnobbing with movie stars and euro trash to mixing it with the IRA and CIA, then the long, increasingly desperate years on the run, Mr Nice and Mrs Marks is about the exhilaration of their criminal life and the hell of not knowing what's happening when your husband stops telling you the truth. Now, for the first time, Judy tells her own side of the tale.

The Life and Times of Howard Marks John Wiley & Sons

In this fully revised and updated new edition, Ellis explains how you can be successful over the long run. Applying wisdom gained from half a century of working with the leading investment managers and securities firms around the world, he shows how you can easily avoid common traps and get on the right road to investment success. Winning the Loser's Game leads you through the simple steps of setting realistic objectives, deciding on a sensible strategy, and, most importantly, sticking with it.

The Top 50 Questions Wealthy Families Ask Vintage

Warren Buffett is the most famous investor of all time and one of today's most admired business leaders. He became a billionaire and investment sage by looking at companies as businesses rather than prices on a stock screen. The first two editions of The Warren Buffett

Way gave investors their first in-depth look at the innovative investment and business strategies behind Buffett's spectacular success. The new edition updates readers on the latest investments by Buffett. And, more importantly, it draws on the new field of behavioral finance to explain how investors can overcome the common obstacles that prevent them from investing like Buffett. New material includes: How to think like a long-term investor – just like Buffett Why "loss aversion", the tendency of most investors to overweight the pain of losing money, is one of the biggest obstacles that investors must overcome. Why behaving rationally in the face of the ups and downs of the market has been the key to Buffett's investing success Analysis of Buffett's recent acquisition of H.J. Heinz and his investment in IBM stock The greatest challenge to emulating Buffett is not in the selection of the right stocks, Hagstrom writes, but in having the fortitude to stick with sound investments in the face of economic and market uncertainty. The new edition explains the psychological foundations of Buffett's approach, thus giving readers the best roadmap yet for mastering both the principles and behaviors that have made Buffett the greatest investor of our generation.
Howard Marks' Book Of Dope Stories Corgi
The story of the origins and development of Peter Cundill's pioneering investment journey.

The Most Important Thing Illuminated Greenleaf Book Group

Distilling the wisdom of Marks' celebrated client memos into a single volume and, for the first time, making his time-tested investing philosophy available to general readers, this book has been widely acclaimed by professional, casual, aspiring, and armchair investors.

Becoming Mr Nice Tata McGraw-Hill Education

FIASCO is the shocking story of one man's education in the jungles of Wall Street. As a young derivatives salesman at Morgan Stanley, Frank Partnoy learned to buy and sell billions of dollars worth of securities that were so complex many traders themselves didn't understand them. In his behind-the-scenes look at the trading floor and the offices of one of the world's top investment firms, Partnoy recounts the macho attitudes and fiercely competitive ploys of his office mates. And he takes us to the annual drunken skeet-shooting competition, FIASCO, where he and his colleagues sharpen the killer instincts they are encouraged to use against their competitors, their clients, and each other. FIASCO is the first book to take on the

derivatives trading industry, the most highly charged and risky sector of the stock market. More importantly, it is a blistering indictment of the largely unregulated market in derivatives and serves as a warning to unwary investors about real fiascos, which have cost billions of dollars.

The Incredible Story of an

Unconventional Life Pan Macmillan
21ST ANNIVERSARY EDITION WITH AN INTRODUCTION BY IRVINE WELSH He was Britain's most wanted man. He spent seven years in America's toughest penitentiary. You'll like him. During the mid 1980s Howard Marks had forty three aliases, eighty nine phone lines and owned twenty five companies throughout the world. At the height of his career he was smuggling consignments of up to thirty tons of marijuana, and had contact with organisations as diverse as MI6, the CIA, the IRA and the Mafia. Following a worldwide operation by the Drug Enforcement Agency, he was arrested and sentenced to twenty-five years in prison at the Terre Haute Penitentiary, Indiana. He was released in April 1995 after serving seven years of his sentence. Told with humour, charm and candour, Mr Nice is his own extraordinary story. 'The story of a remarkable life, lived by the very brilliant and exceptionally wonderful Mr Nice' Irvine Welsh 'Frequently hilarious, occasionally sad, and often surreal' GQ 'A man who makes Peter Pan look like a geriatric' Loaded 'A folk legend' Daily Mail

A Talk-rock Album Penguin

Diversification is a core principle of investing. Yet money managers have not applied it to their own ranks. Only around 10 percent of portfolio managers—the people most directly responsible for investing your money—are female, and the numbers are even worse at the ownership level. What are the causes of this underrepresentation, and what are its consequences—including for firms' and clients' bottom lines? In *Undiversified*,

experienced practitioners Ellen Carr and Katrina Dudley examine the lack of women in investment management and propose solutions to improve the imbalance. They explore the barriers that subtly but effectively discourage women from entering and staying in the industry at each point in the pipeline. At the entry level, the lack of visible role models discourages students from considering the field, and those who do embark on an investment management career face many obstacles to retention and promotion. Carr and Dudley highlight the importance of informal knowledge about how to navigate career tracks, without which women are left at a disadvantage in an industry that lionizes confidence. They showcase a diverse constellation of successful female portfolio managers to demystify the profession. Drawing on wide-ranging research, interviews with prospective, current, and former industry practitioners, and the authors' own experiences, *Undiversified* makes a compelling case that increasing the number of women could help transform active investment management at a time when it is under threat from passive strategies and technological innovation. *The Curse of the Mogul* Random House This book tells the story of Welshman Howard Marks who has recently discovered his true Welsh identity after a notorious few decades. Raised in Kenfig Hill, south Wales, he became one of the most prolific drug smugglers in the world. *Mr Nice & Mrs Marks* Columbia University Press

Fooled by Randomness is a standalone book in Nassim Nicholas Taleb's landmark *Incerto* series, an investigation of opacity, luck, uncertainty, probability, human error, risk, and decision-making in a world we don't understand. The other books in the series are *The Black Swan*, *Antifragile*, *Skin in the Game*, and *The Bed of Procrustes*. *Fooled by Randomness* is the word-of-mouth sensation that will change the way you think about business and the

world. Nassim Nicholas Taleb—veteran trader, renowned risk expert, polymathic scholar, erudite raconteur, and New York Times bestselling author of *The Black Swan*—has written a modern classic that turns on its head what we believe about luck and skill. This book is about luck—or more precisely, about how we perceive and deal with luck in life and business. Set against the backdrop of the most conspicuous forum in which luck is mistaken for skill—the world of trading—*Fooled by Randomness* provides captivating insight into one of the least understood factors in all our lives. Writing in an entertaining narrative style, the author tackles major intellectual issues related to the underestimation of the influence of happenstance on our lives. The book is populated with an array of characters, some of whom have grasped, in their own way, the significance of chance: the baseball legend Yogi Berra; the philosopher of knowledge Karl Popper; the ancient world's wisest man, Solon; the modern financier George Soros; and the Greek voyager Odysseus. We also meet the fictional Nero, who seems to understand the role of randomness in his professional life but falls victim to his own superstitious foolishness. However, the most recognizable character of all remains unnamed—the lucky fool who happens to be in the right place at the right time—he embodies the “survival of the least fit.” Such individuals attract devoted followers who believe in their guru's insights and methods. But no one can replicate what is obtained by chance. Are we capable of distinguishing the fortunate charlatan from the genuine visionary? Must we always try to uncover nonexistent messages in random events? It may be impossible to guard ourselves against the vagaries of the goddess Fortuna, but after reading *Fooled by Randomness* we can be a little better prepared. Named by Fortune One of the Smartest Books of All Time A Financial Times Best Business Book of the Year
