Playing for Keeps in Stocks and Futures

offers traders three winning strategies for trading stocks and futures under any market condition and within any timeframe—from one minute to one month. Tom Bierovic details his newly developed trading strategies—First Prize, R2D2, and Triple Play—and shows you how to integrate them with various technical indicators and analytical techniques to create low-risk, high-reward trading opportunities. Bierovic clearly explains the development of each system, lists the rules, and provides real-world examples from a wide variety of stocks and futures in several timeframes to illustrate how and why each strategy works so well. With these lessons, you'll quickly learn how to use Bierovic's original strategies to enter, manage, and exit your trades profitably. This complete

guide to stock and futures trading opens with a brief introduction to price swings, impulse waves, corrective waves, and critical points and explains how the extreme and continuous variation in the duration and magnitude of price swings makes it possible for traders to speculate profitably. It also reveals the three components of a complete trading strategy—setups, entries, and exits—and how you should use them when trading with First Prize, R2D2, or Triple Play. Before entering into an in-depth discussion of these three winning trading strategies, *Playing for Keeps in Stocks and Futures* explains the tools used in them including: breakouts to new highs and lows, directional movement index spread (DMI spread), exponential moving averages (EMAs), Fibonacci

retracement zones, Japanese candlestick charts, moving average convergence-divergence (MACD), parabolic stops, trendlines, true range and average true range (ATR). In explaining his three new trading strategies-First Prize, R2D2, and Triple Play-Bierovic breaks down each strategy into its setup, entry, and exit components and illustrates how to implement each strategy through charts, graphs, and vivid examples from both the stock and futures markets. Most importantly, you'll learn the unique qualities of each strategy and understand how the three strategies taken together can profit in any market conditions.(First Prize trades first pullbacks; R2D2 trades subsequent pullbacks; Triple Play trades trend reversals.)Take advantage of the

tremendous opportunities offered to you by trading with First Prize, R2D2, and Triple Play. With these three strategies in your trading arsenal, you too will soon be playing for keeps in stocks and futures. Tom Bierovic, President of the Synergy Trading Group, has been trading stocks and futures successfully since 1971. Tom is also a popular and respected speaker: he has presented highly rated seminars on technical analysis and trading at major conferences throughout the United States and in more than 40 countries on six continents. Futures magazine, Futures World News, and Technical Analysis of Stock & Commodities magazine have all published in-depth interviews with Tom, and he is featured in the book Real People, Real Traders by

Ruggiero and Toghraie. For information on products and services offered by the Synergy Trading Group, you can contact Tom by e-mail at tbierovic@aol.com.

With recent advances in natural language understanding techniques and far-field microphone arrays, natural language interfaces, such as voice assistants and chatbots, are emerging as a popular new way to interact with computers. They have made their way out of the industry research labs and into the pockets, desktops, cars and living rooms of the general public. But although such interfaces recognize bits of natural language, and even voice input, they generally lack conversational competence, or the ability to engage in

natural conversation. Today's platforms provide sophisticated tools for analyzing language and retrieving knowledge, but they fail to provide adequate support for modeling interaction. The user experience (UX) designer or software developer must figure out how a human conversation is organized, usually relying on commonsense rather than on formal knowledge. Fortunately, practitioners can rely on conversation science. This book adapts formal knowledge from the field of Conversation Analysis (CA) to the design of natural language interfaces. It outlines the Natural Conversation Framework (NCF), developed at IBM Research, a systematic framework for designing interfaces that work like natural conversation. The NCF consists of four main components: 1) an

interaction model of “expandable sequences,” 2) a corresponding content format, 3) a pattern language with 100 generic UX patterns and 4) a navigation method of six basic user actions. The authors introduce UX designers to a new way of thinking about user experience design in the context of conversational interfaces, including a new vocabulary, new principles and new interaction patterns. User experience designers and graduate students in the HCI field as well as developers and conversation analysis students should find this book of interest.

Finally, a fresh and unique approach to reading the Bible for the millions of Catholics who don't know where to begin . . . Joe Paprocki, a veteran catechist and Bible authority, guides readers into a basic understanding of "God's Library"- the collection of seventy-three books that Catholics regard as the definitive written revelation of God. In easy-to-understand language, he explains the organization of the Bible, the different genres of biblical writing, key figures in

biblical history, and the methods Catholics have developed to interpret the Bible properly. He shows beginners how to use commentaries, concordances, footnotes and cross-references, and other valuable tools of Bible study. Eight bookmarks are included to help readers locate the primary sections of the Bible. " [A] fine, accessible, and useful first introduction into Holy Scripture." - Walter Brueggemann, emeritus professor of Old Testament, Columbia Theological Seminary " Paprocki has contributed a valuable and welcome addition to the repertoire of materials available to the lay reader who is just beginning to explore the Bible. God's Library is a sure and trustworthy guide." -Rev. Donald Senior, CP President, Catholic

This book might well have carried the subtitle *Or 44 Years in the Copy Department* instead of its present one. Even a copywriter, whose breed is not noteworthy for arithmetical prowess, could not escape arriving at the conclusion that the number of years from 1917 to 1961 totals forty-four. And, Heaven help me!, for that seeming aeon of time the major interest of the author has been advertising copy—good, bad, and indifferent. That a large measure of this past experience has been associated with a particularly demanding kind of advertising copy may, as will be explained, be an advantageous circumstance for the reader of this book, regardless of what type of copywriting

job confronts him. For the subject of the book is not the writing of mail-order copy. Its sole purpose is to lend a hand to any copywriter (or student of copywriting) whose ambition is to create advertisements which are more resultful, no matter what the product is or how and where it is sold. As to why the author's background of experience may represent an advantageous circumstance for such copywriters, I will leave to an infinitely more capable pen than mine—that of no less an authority than Claude G. Hopkins, one of the greatest copywriters of "general" advertising who ever lived: "Mail-order advertising is difficult. But it is educational. It keeps one on his mettle. It fixes one's viewpoint on cost and result. The advertising-writer learns

more from mail-order advertising than from any other.” Therefore, if you are looking for guidance specifically concerned with the writing of mail-order advertising, this is not your book. On the other hand, if in the writing of any type of advertising you want more of your copy to achieve the selling effectiveness imperative for any mail-order man who wants to continue eating heartily, this book may prove helpful to you. At any rate, you are the person for whom it was written. Much of its information will probably recall to your mind the aphorism, “We need not so much to be instructed as to be reminded.” And that’s all to the good. Finally, and appertaining to the passages which are reminiscent in nature, the author has tried to avoid any necessity for later

having to admit, like Mark Twain, that “When I was very young I could remember anything, whether it happened or not. But now I am older and I can only remember the latter.” Victor O. Schwab

A highly informative yet fun approach to understanding the world's all-time best-selling book It's pretty hard to build a house if you don't know how to read a blueprint. In the same way, it's difficult to develop your faith if you don't know how to read the Bible—or are reluctant even to open it. In *The Bible Blueprint*, best-selling author and popular speaker Joe Paprocki cleverly uses a blueprint metaphor to help Catholics gain a solid understanding of the structure and organization of the Bible, and to help them build confidence in navigating its pages. Among other topics, Paprocki covers the different genres of biblical writing, key figures in biblical history,

and the methods Catholics rely on to interpret the Bible. Readers are also shown how to consult commentaries, concordances, and other valuable tools of Bible study to deepen their understanding of God's Word. Witty cartoons, sidebars, and quizzes throughout the book keep the tone fun and engaging; eight perforated Bible

bookmarks are bound into the book. For the large number of Catholics who have never felt comfortable with the Scriptures, and for any Catholic new to the faith, The Bible Blueprint serves as an effective, nonthreatening introduction to God's Word, as well as a gateway to a deeper relationship with Christ.
