behavior change in chapters authored by leading theorists, researchers, and practitioners from multiple disciplines, including psychology, sociology, behavioral science, economics, philosophy, and implementation science. It is the go-to resource for researchers, students, practitioners, and policy makers looking for current knowledge on behavior

change and guidance on how to develop effective interventions to change behavior. Lower Extremity Amputation Penguin From the best-selling author of *Why We Get Fat*, a groundbreaking, eye-opening exposé that makes the convincing case that sugar is the tobacco of the new millennium: backed by powerful lobbies, entrenched in our lives, and

making us very sick. Among Americans, diabetes is more prevalent today than ever; obesity is at epidemic proportions; nearly 10% of children are thought to have nonalcoholic fatty liver disease. And sugar is at the root of these, and other, critical society-wide, health-related problems. With his signature command of both science and straight talk, Gary Taubes delves

into Americans' history with sugar: its uses as a preservative, as an additive in cigarettes, the contemporary overuse of high-fructose corn syrup. He explains what research has shown about our addiction to sweets. He clarifies the arguments against sugar, corrects misconceptions about the relationship between sugar and weight loss; and provides the perspective necessary to

make informed decisions about sugar as individuals and as a society. *Community Psychology* BRILL Political and civil discourse in the United States is characterized by "Truth Decay," defined as increasing disagreement about facts, a blurring of the line between opinion and fact, an increase in the relative volume of opinion compared with fact, and lowered trust

in formerly respected sources of factual information. This report explores the causes and wide-ranging consequences of Truth Decay and proposes strategies for further action. Chronic Illness Cambridge University Press e emperor Nero is etched into the Western imagination as one of ancient Rome's most infamous villains, and Tacitus' Annals have played a central role in shaping the

mainstream historiographical understanding of this flamboyant autocrat. This section of the text plunges us straight into the moral cesspool that Rome had apparently become in the later years of Nero's reign, chronicling the emperor's fledgling stage career including his plans for a grand tour of Greece; his participation in a city-wide orgy climaxing in his publicly consummated 'marriage' to his toy boy

Pythagoras; the great fire of AD 64, during which large parts of central Rome went up in flames; and the rising of Nero's 'grotesque' new palace, the so-called 'Golden House', from the ashes of the city. This building project stoked the rumours that the emperor himself was behind the conflagration, and Tacitus goes on to present us with Nero's gruesome efforts to quell these

mutterings by scapegoating and executing members of an unpopular new cult then starting to spread through the Roman empire: Christianity. All this contrasts starkly with four chapters focusing on one of Nero's most principled opponents, the Stoic senator Thrasea Paetus, an audacious figure of moral fibre, who courageously refuses to bend to the forces of

imperial corruption and hypocrisy. This course book offers a portion of the original Latin text, study aids with vocabulary, and a commentary. Designed to stretch and stimulate readers, Owen's and Gildenhard's incisive commentary will be of particular interest to students of Latin at both A2 and undergraduate level. It extends beyond detailed linguistic

analysis and historical background to encourage critical engagement with Tacitus' prose and discussion of the most recent scholarly thought. Together Apart National Academies Press In their later years, Americans of different racial and ethnic backgrounds are not in equally good--or equally poor--health. There is wide variation, but on average older Whites are healthier

than older Blacks and tend to outlive them. But Whites tend to be in poorer health than Hispanics and Asian Americans. This volume documents the differentials and considers possible explanations. Selection processes play a role: selective migration, for instance, or selective survival to advanced ages. Health differentials originate early in life, possibly even before birth,

and are affected by events and experiences throughout the life course. Differences in socioeconomic status, risk behavior, social relations, and health care all play a role. Separate chapters consider the contribution of such factors and the biopsychosocial mechanisms that link them to health. This volume provides the empirical evidence for the research agenda

provided in the separate report of the Panel on Race, Ethnicity, and Health in Later Life. *Public Sector Accounting* Edward Elgar Publishing Diet and Health examines the many complex issues concerning diet and its role in increasing or decreasing the risk of chronic disease. It proposes dietary recommendations for reducing the risk of the major diseases and

causes of death today: atherosclerotic cardiovascular diseases (including heart attack and stroke), cancer, high blood pressure, obesity, osteoporosis, diabetes mellitus, liver disease, and dental caries. *Impact and Intervention* BRILL Bringing together literature from diverse sources to cover budgeting, financial accounting and reporting, auditing and

<p>comparative international studies, this collection covers 40 year of public sector accounting. <i>Implications for Reducing Chronic Disease Risk National Academies Press</i> Music moves through time; it is not static. the book helps us to understand emerging processes related to social (dis)connectiveness, collective behaviour and the societal effects of COVID-19. In this it shows how psychological theory can help us better understand, and respond to, the events shaping the world in 2020. Considering key topics such as: Leadership Communication Risk perception Social isolation Mental health Inequality Misinformation Prejudice and racism Behaviour change Social Disorder This book offers the foundation on which future analysis, intervention and policy can be built. We are proud to support the research into Covid-19. We are delighted that on publication the finalised eBook will be free. For those who prefer print, it will be possible to purchase a paperback version. All Royalties from this book will be donated to the Save the Children charity. have answered the challenge of transforming an abstract, theoretical topic into a lively and understandable subject for students. Through concrete examples and consistent pedagogy, this text helps students understand the concepts and provides opportunities for students to apply the concepts. After introducing community psychology and its history, the authors

describe methods of community research and discuss how to understand communities from the perspectives of sense of community, coping, and social support. The focus then shifts to community programs and actions: preventing problem behavior and promoting social competence, citizen participation, organizing for community and social change, and program evaluation

and development. Opportunities for the Health Care System John Wiley & Sons Described by the TLS as 'a formidable bibliographical achievement ... destined to become a key reference work for Shakespeareans', Shakespeare in Print is now issued in a revised and expanded edition offering a wealth of new material, including a chapter which maps the history of digital editions

from the earliest computer-generated texts to the very latest digital resources. Murphy's narrative offers a masterful overview of the history of Shakespeare publishing and editing, teasing out the greater cultural significance of the ways in which the plays and poems have been disseminated and received over the centuries from Shakespeare's time to our

own. The opening chapters have been completely rewritten to offer close engagement with the careers of the network of publishers and printers who first brought Shakespeare to print, additional material has been added to all chapters, and the chronological appendix has been updated and expanded. The Case Against Sugar Open Book Publishers The bestselling

author of *The How of Happiness* reveals how to find opportunity in life's thorniest moments. Focusing on life's biggest, messiest moments, Sonja Lyubomirsky provides readers with the clear-eyed vision they need to build the healthiest, most satisfying life. Lyubomirsky argues that we have been given false promises—myths that assure us that lifelong happiness will be attained

once we hit the culturally confirmed markers of adult success. This black-and-white vision of happiness works to discourage us from recognizing the upside of any negative and limits our potential for personal growth. A corrective course on happiness and a call to regard life's twists and turns with a more open mind, *The Myths of Happiness* shares practical

lessons that prove we are more adaptable than we think we are. It empowers readers to look beyond their first response, sharing scientific evidence that often it is our mindset—not our circumstances—that matters most. *National Union Catalog* Cengage Learning The world's best-selling textbook on book-keeping and accounting, *Business Accounting*

to welcome women on equal terms with men. From the outset UCL showed a commitment to innovative ideas and new methods of teaching and research. This book charts the history of UCL from 1826 through to the present day, highlighting its many contributions to society in Britain and around the world. It covers the expansion of the university through the growth in student

numbers and institutional mergers. It documents shifts in governance throughout the years and the changing social and economic context in which UCL operated, including challenging periods of reconstruction after two World Wars. Today UCL is one of the powerhouses of research and teaching, and a truly global university. It is currently seventh in the QS World University

Rankings. This completely revised and updated edition features a new chapter based on interviews with key individuals at UCL. It comes at a time of ambitious development for UCL with the establishment of an entirely new campus in East London, UCL East, and Provost Michael Arthur's 'UCL 2034' strategy which aims to secure the university's long-term future and
