## **BRIA CERVANTES**

---

Primary Grade Challenge Math Teacher  
 Created Materials  
 Completely revised in 2019 to reflect  
 grade-level standards, Daily Word  
 Problems is the perfect resource to  
 improve students problem-solving skills.  
 The all-NEW word problems are written to  
 support current math standards and  
 expectations and provide consistent spiral  
 review of math concepts. Students  
 problem-solving skills improve as they  
 participate in meaningful, real-life math  
 practice.

### **Daily Word Problems, Grade 5**

Createspace Independent Pub  
 Now for grades K-8 with a new  
 kindergarten level and newly revised

editions of grades 1 and 2. These new  
 editions of this popular program features: -  
 - lessons that use manipulatives to  
 emphasize hands-on learning at each  
 grade level -- assessment guidelines The  
 program enhances any math text,  
 teaching students to: -- approach  
 problems systematically -- identify various  
 solution strategies -- realize that more  
 than one strategy may be used on a single  
 problem Teacher Sourcebooks feature  
 easy-to-follow strategies, guidelines for  
 multiple uses of the program, extension  
 problems, and evaluation methods. Each  
 Teacher Sourcebook includes blackline  
 masters with problem clusters to  
 reproduce intact or cut into individual  
 problems. Use them as resources for  
 problem-of-the-day, problem-of-the-week,  
 homework activities, or in a problem-  
 solving resource center. Available in

Spanish for grades 1-6.

*Math Rules!* Evan-Moor

Build confident problem solvers with high-  
 interest activities that support NCTM  
 standards. The engaging problems in this  
 book will involve students in the process of  
 problem solving rather than having  
 students focus on just getting the "right"  
 answer. Plus, this book contains a series of  
 engaging two-page lessons on ten  
 different problem-solving strategies.

### **Grade Three Mailbox Books**

The 180 Days of Problem Solving e-Book  
 for Grade 3 offers daily problem solving  
 practice geared towards developing the  
 critical thinking skills needed to approach  
 complex problems. This teacher-friendly e-  
 Book provides thematic units that connect  
 to a standards-based skill that third grade  
 students are expected to know to advance  
 to the next level. Lesson plans offer

guidance and support for every day of the week, outlining strategies and activities that dig deeper than routine word problems. Each week students will use visual representations and analyze different types of word problems (including non-routine, multi-step, higher thinking problems). This comprehensive resource builds critical thinking skills and connects to national and state standards. *180 Days of Problem Solving for Third Grade* Instructional Fair

Support third-grade students with 180 daily practice activities to build their mathematical fluency. Each problem is tied to a specific mathematical concept to help students gain regular practice of key grade-level skills. This book features quick, diagnostic-based activities that are correlated to College and Career Readiness and other state standards, and includes data-driven assessment tips. Digital resources include assessment analysis tools and pdfs of the activity sheets. With these daily practice activities, teachers and parents will be helping third graders improve their math skills in no time!

**Word Problems, Grade 4** Instructional Fair

The 180 Days of Problem Solving for Grade 5 offers daily problem-solving practice geared towards developing the critical thinking skills needed to approach complex problems. This teacher-friendly resource provides thematic units that connect to a standards-based skill that fifth grade students are expected to know to advance to the next level. Lesson plans offer guidance and support for every day of the week, outlining strategies and activities that dig deeper than routine word problems. Each week students will use visual representations and analyze different types of word problems (including non-routine, multi-step, higher thinking problems). This comprehensive resource builds critical thinking skills and connects to national and state standards. *Grade Four* National Council of Teachers of Mathematics, Incorporated

How can we break the cycle of frustrated students who "drop out of math" because the procedures just don't make sense to them? Or who memorize the procedures for the test but don't really understand the mathematics? Max Ray and his colleagues at the Math Forum @ Drexel University say "problem solved," by offering their collective wisdom about how students become proficient problem solvers, through the lens of the CCSS for Mathematical Practices. They unpack the process of problem solving in fresh new ways and turn the Practices into activities

that teachers can use to foster habits of mind required by the Common Core: communicating ideas and listening to the reflections of others estimating and reasoning to see the "big picture" of a problem organizing information to promote problem solving using modeling and representations to visualize abstract concepts reflecting on, revising, justifying, and extending the work. *Powerful Problem Solving* shows what's possible when students become active doers rather than passive consumers of mathematics. Max argues that the process of sense-making truly begins when we create questioning, curious classrooms full of students' own thoughts and ideas. By asking "What do you notice? What do you wonder?" we give students opportunities to see problems in big-picture ways, and discover multiple strategies for tackling a problem. Self-confidence, reflective skills, and engagement soar, and students discover that the goal is not to be "over and done," but to realize the many different ways to approach problems. Read a sample chapter. Save 15% when you purchase 15 copies with a Book Study Bundle!

Open Middle Math Remedia Publications

The 180 Days of Problem Solving e-Book for Grade 2 offers daily problem solving practice geared towards developing the critical thinking skills needed to approach complex problems. This teacher-friendly e-Book provides thematic units that connect to a standards-based skill that second grade students are expected to know to advance to the next level. Lesson plans offer guidance and support for every day of the week, outlining strategies and activities that dig deeper than routine word problems. Each week students will use visual representations and analyze different types of word problems (including non-routine, multi-step, higher thinking problems). This comprehensive resource builds critical thinking skills and connects to national and state standards.

**Grades 2-4** Routledge

The 180 Days of Problem Solving for Grade 4 offers daily problem-solving practice geared towards developing the critical thinking skills needed to approach complex problems. This teacher-friendly resource provides thematic units that connect to a standards-based skill that fourth grade students are expected to know to advance to the next level. Lesson plans offer guidance and support for every day of the week, outlining strategies and activities that dig deeper than routine word problems. Each week students will use visual representations and analyze different types of word problems (including non-routine, multi-step, higher

thinking problems). This comprehensive resource builds critical thinking skills and connects to national and state standards. *Daily Word Problems, Grade 6* Heinemann Educational Books

The 180 Days of Problem Solving for Grade 6 offers daily problem-solving practice geared towards developing the critical thinking skills needed to approach complex problems. This teacher-friendly resource provides thematic units that connect to a standards-based skill that sixth grade students are expected to know to advance to the next level. Lesson plans offer guidance and support for every day of the week, outlining strategies and activities that dig deeper than routine word problems. Each week students will use visual representations and analyze different types of word problems (including non-routine, multi-step, higher thinking problems). This comprehensive resource builds critical thinking skills and connects to national and state standards. Explorations in Algebra Teacher Created Materials

**Problem Solving 4 Today: Daily Skill**

Practice for fifth grade contains reproducible activities designed to help students learn critical math word problem-solving skills with strategies such as drawing and using a tape diagram, working backward, finding a pattern, and more. The 4 Today series offers comprehensive, quick, and easy-to-use math workbooks. The reproducible activities review essential skills during a four-day period. On the fifth day, an assessment with related skills is provided. Each week begins with a Fluency Blast section to provide students with repeated, daily practice for essential skills. The format and style of the 4 Today books provide excellent practice for standardized tests. The series also includes a progress-tracking reproducible, a standards alignment chart, tips for fostering a school-to-home connection, and an answer key.

Practice, Assess, Diagnose Little, Brown Books for Young Readers

*Problem of the Week, Grade 6* provides 36 motivation, challenging, and entertaining problems to engage your students in the process of becoming skillful, successful problem solvers. Assigning a challenging math problem each week is a great way to get your students to think creatively, use logic and reason, and work successfully in small group settings.

**Problem Solving 4 Today, Grade 5**

Evan Moor Educational Publishers

Scientifically proven: Daily Word Problems frequent, focused practice leads to mastery and retention of the math skills

practiced.

**Principles to Actions** Teacher Created Materials

This book is a collection of 57 very challenging math problems with detailed solutions. It is written for anyone who enjoys pondering difficult problems for great lengths of time. The problems are mostly classics that have been around for ages. They are divided into four categories: General, Geometry, Probability, and Foundational, with the Probability section constituting roughly half the book. Many of the solutions contain extensions/variations of the given problems. In addition to the full solution, each problem comes with a hint. For the most part, algebra is the only formal prerequisite, although a few problems require calculus. Are you eager to tackle the Birthday Problem, Simpson's Paradox, the Game-Show Problem, the Boy/Girl Problem, the Hotel Problem, and of course the Green-Eyed Dragons? If so, this book is for you! You are encouraged to peruse the problems via either the Look Inside feature on Amazon, or the author's Harvard webpage (where all of the problems are posted), to gauge whether the level of difficulty is right for you.

Problem of the Week Teacher Created Materials

This text offers guidance to teachers, mathematics coaches, administrators, parents, and policymakers. This book: provides a research-based description of eight essential mathematics teaching practices ; describes the conditions, structures, and policies that must support the teaching practices ; builds on NCTM's Principles and Standards for School Mathematics and supports implementation of the Common Core State Standards for Mathematics to attain much higher levels

of mathematics achievement for all students ; identifies obstacles, unproductive and productive beliefs, and key actions that must be understood, acknowledged, and addressed by all stakeholders ; encourages teachers of mathematics to engage students in mathematical thinking, reasoning, and sense making to significantly strengthen teaching and learning.

Ready-to-Use Activities Based on Real-Life Situations, Grades 6-12 Problem of the Week A Fresh Approach to Problem-Solving 36 weeks of instruction that addresses grade-level, standards-correlated math concepts, including addition, fractions, logic, algebra and more. Monday & Thursday activities present students with a one- or two-step word problem, while Friday's format is more extensive and requires multiple steps. The set contains 5 Student Books.

*Problems That Unlock Student Thinking, 6-12* Createspace Independent Pub The 180 Days of Problem Solving e-Book for Grade 6 offers daily problem solving practice geared towards developing the critical thinking skills needed to approach complex problems. This teacher-friendly e-Book provides thematic units that connect to a standards-based skill that sixth grade students are expected to know to advance to the next level. Lesson plans offer guidance and support for every day of the week, outlining strategies and activities that dig deeper than routine word problems. Each week students will use visual representations and analyze different types of word problems (including non-routine, multi-step, higher thinking problems). This comprehensive resource builds critical thinking skills and connects to national and state standards. Practice, Assess, Diagnose Lawrence Erlbaum Associates

Offers a higher level of material that goes beyond calculation skills for children in the primary grades.

Powerful Problem Solving Daily Word Problems

This second edition of the popular math teaching resource book Math Stories for Problem Solving Success offers updated true-to-life situations designed to motivate teenagers to use math skills for solving everyday problems. The book features intriguing short stories followed by sets of problems related to the stories that are correlated to the standards of the National Council of Teachers of Mathematics. Each of the easy-to-read stories is followed by three increasingly difficult groups of problem sets. This makes it simple for teachers to select the appropriate problem set for students of different abilities and at different grade levels. To further enhance student involvement, the stories feature recurring characters and can be used either sequentially or out of order. The problems in the book cover many basic math topics, including decimals, fractions, and percents; measurement; geometry; data, statistics, and probability; algebra; and problem solving. In addition to having all the answers, an Answer Key at the end of the book offers explanations and background information about the problems that can be helpful to both teachers and students. Math Stories for Problem Solving Success will help you show students that math is something they are already using every day.
