The Memory Book New Page Books

A Page A Minute spells a lifetime of achievement--at home, in school, . and on the job. Harry Lorayne shows how to make every minute count, dramatically increasing performance, productivity, and profits. "Ingenious".--The New York Times. Copyright © Libri GmbH. All rights reserved.

How to Develop a Super-Power Memory The Memory Book

Martin Gardner's Mathematical Games columns in Scientific American inspired and entertained several generations of mathematicians and scientists. Gardner in his crystal-clear prose illuminated corners of mathematics, especially recreational mathematics, that most people had no idea existed. His playful spirit and inquisitive nature invite the reader into an exploration of beautiful mathematical ideas along with him. These columns were both a revelation and a gift when he wrote them; no one--before Gardner--had written about mathematics like this. They continue to be a marvel. This volume, originally published in 1959, contains the first sixteen columns published in the magazine from 1956-1958. They were reviewed and briefly updated by Gardner for this 1988 edition.

How to Raise Your Grades in 30 Days Ballantine Books

DIVSimple-to-use book gives versatile repertoire of first rate card tricks. The authors, both expert magicians, present clear explanations of basic techniques and over 100 complete tricks. 121 figures. /div

How to Organize and Develop the Hidden Powers of Your Mind Createspace Independent Publishing Platform

An exploration of the world of magic that teaches the reader many tricks--including how better to understand the real world. Alex Stone--journalist and part-time conjurer--is here to amaze you. But first he had to amaze his fellow magicians. Fooling Houdini is his fascinating, revealing, and nailbiting account of his attempt to win the 23rd World Championships of Magic, the "Magic Olympics," the largest and most prestigious competition of its kind. Alex Stone managed to qualify for entry and began preparing to astonish people who astonish others for a living. It didn't help his nerves that he was placed on the bill straight after Canadian magician Shawn Farquhar, winner of more magic competitions than anyone in history. Stone's preparations and participation provide his readers with in-depth exploration of the world of magic, and magic's meaning. He spills many professional secrets, arguing that what is important is to ask questions about what lies behind the tricks: how the mind perceives the world and parses everyday experience, about how the mind works--and why sometimes it doesn't, about why people need to believe. As we become more attuned to the limits of our own perception, we become better at distinguishing reality from illusion, at reading the angles and decoding the fine print, he says. We gain intuition and understanding into how people behave. We even learn ways to influence this behavior. This makes us less susceptible to all manner of deception. It is to gain and maintain this sixth sense that Alex Stone--a schoolboy prestidigitator--has continued performing magic well into adulthood. In Fooling Houdini he takes us into that other world, populated by truly astounding characters, and leaves us with a heightened sense of awareness about the supposedly real world.

You Can Have an Amazing Memory Clay Bridges Press

A four-time National Memory Champion traces his rise from an average student to the subject of a Wake Forest Medical Center scientific study, sharing step-by-step instructions and memory-bolstering exercises that he used to overcome memory problems and combat the memory-loss side effects of radiation therapy. Reprint. 20,000 first printing.
