(Percussion). Mark presents a complete system to answer these questions. The book follows a system entitled D.R.O.P.: Dynamics, Rate, Orchestration and Phrasing. Mark pulls apart and addresses each of these building blocks individually, presenting rhythmic concepts that will expand your ability to call on different rhythmic rates and subdivisions on command, move them around the kit freely, and ultimately be able to phrase them in exciting and sometimes complex ways that sound like "polyrhythms" and "metric modulations" but are actually constructed upon a solid foundation of drumming basics. This material will give you the confidence to make a personal statement on the drumset. Adding to this package is live footage of Mark playing with two of his longtime collaborators, Tim Lefebvre (bass) and Jason Lindner (keys). Having played together for years, these three musicians most recently formed the rhythm section for David Bowie's final album, *Blackstar*. Watch Mark interact with these world-class musicians in electric and acoustic settings as they apply Mark's concepts in inspiring performances. The book comes packaged with a full-length DVD, and the video is also available for download using a code contained in the book.

It all starts with the release of fidgety, suspicious Percy Talbott from state prison after serving a five-year sentence. We don't know why, only that she's released and on her way to Gilead and its "colors of paradise." But when she arrives it is February and bitter cold, and the only one around to meet her is restless Sheriff Joe Turner, who takes her to the Spitfire Grill to help the aging Hannah Ferguson run the diner. All is gray, dismal and listless around them, and the characters are in the "winter of their lives" emotionally and spiritually.

Contributors to the volume look not only to changes brought by digital innovations, but to the complex social and technological past that informs, and is transformed by, new media. This collection is conceived as a series of dialogues and inquiries by leading scholars from both image- and sound-based disciplines. Chapters explore the history and the future of moving-image media across a range of formats including blockbuster films, video games, music videos, social media, digital visualization technologies, experimental film, documentaries, video art, pornography, immersive theater, and electronic music. Sound, music, and noise emerge within these studies as integral forces within shifting networks of representation. Thematic sections and direct exchanges among authors facilitate further engagement with the debates invoked by the text.
