This volume documents how the nineteenth-century British publishing industry responded to and helped shape changes in readership and reading markets in the period. Focusing on broad social, economic and cultural changes, it traces the impact of improvements in transport and communication networks, which dramatically affected the production, distribution and retail of books and periodicals, and the implementation of the Education Acts of 1870 and 1871 which forced publishers to direct their attention to new markets and adopt cheaper publishing formats. The growth of circulating libraries, the revolution in serial and part publication, and the spread of railway bookstalls are among the many topics addressed in this volume which concludes with a section that documents the new pressures of censorship that arose as educational reforms provoked anxieties over the spread of cheap 'pernicious' literature.

This book is a result of collaboration between NTLs and SITTE. Framing Research is targeted at individuals or small teams of educational researchers who are interested in conducting high quality research addressing the effects of technology-enhanced instruction on student learning. The book summarizes and unpacks the methodologies of a variety of research studies, each situated in the context of school subject areas, such as science, mathematics, social studies, and English/language

arts, as well as in the contexts of reading education, special education, and early childhood learning. Taken together, the analyses provide guidance on the design of future technology research grounded in student learning of K-12 curriculum. The conclusions also serve as a tool for teacher educators seeking to prepare teachers to integrate technology effectively in their instruction and to motivate reluctant teachers to overcome perceived inconveniences connected with technology use. The contemporary young reader learns from a very early age to read and interpret through a broad range of media. Literacies Across Media explores how a group of boys and girls, aged from ten to fourteen, make sense of narratives in a variety of formats, including print, electronic book, video, DVD, computer game and CD-ROM. This book records these young people over a period of eighteen months as they read, view and play different texts, demonstrating variations and consistencies of interpretative behaviour across different media. Margaret Mackey analyses how the activities of reading, viewing and playing intertwine and affect each other's development. Her in-depth research shows young readers developing strategies for interpreting narratives through encounters with a diverse range of texts and media. The study breaks new ground in its illustration and exploration of the impact of cross-media fertilisation on how young readers come to an understanding of how to make sense of stories. Literacies Across Media offers both a vivid account of a group of young readers coming to terms with texts and a radical perspective on the growth of a generation of young readers. It is thought-provoking, fascinating and highly informative reading not only for theoreticians interested in the reading process, but also teachers, librarians, parents and anybody involved with young people and their texts.

Combining both the theory as well as the practice of the education reform process, this unique breakthrough volume focuses on every aspect of the change process in high school education today. Short- and long-term strategies for each phase of the process—provoking, creating, managing, supporting, and sustaining reform—are covered. Based on the real-life experiences of the author and others, this book recognizes that most high school reform is short-lived. It stresses the ways to create and maintain positive change, making the process a long-lasting, worthwhile mission for the school's leadership and ultimately the students. Short, useful summaries of high school reform provide true-life pictures of what really happens in the midst of changing the way educational institutions operate. These stories cover school-based management, collaborative or shared leadership, school-within-a-school groupings, interdisciplinary instruction, school-based budgeting, new models for professional development, and others. Through these examples, readers can understand how reform strategies work and how to apply and adapt them to their own situations. As an added feature, this book provides the names and locations of schools attempting each reform as well as the names and addresses of school reform networks that readers can contact in their own efforts.

Confederation may have established Canada's nationhood in 1867, but the relationships framing Canada's modern existence go back much further. Employing a unique socio-historical perspective, *Canadian Society in the Twenty-First Century* examines three formative relationships that have shaped the country: Canada and Quebec, Canada and the United States, and Canada and Indigenous nations. Now in its fourth edition, this engaging text offers students an overview of

Canadian society through a series of connections rather than a collection of statistics. Trevor W. Harrison and John W. Friesen weave together complex aspects of the nation's economic, political, and socio-cultural development. They guide readers to use this interdisciplinary framework to consider some of the tough questions that Canada is likely to face in adjusting to demands and challenges in the next few decades. Reflecting the most current scholarship in the field, this revised edition features new discussions on issues such as the current crisis of neo-liberal globalization, Canada's petroleum industry, global warming, the Wet'suwet'en dispute in 2020, and the COVID-19 pandemic. Exploring the unique character of Canada today, this text is a vibrant resource for sociology courses on Canadian society as well as courses in Canadian studies and Canadian history. *Mapping Frontiers Across Medieval Islam* Springer

Despite calls for electronic, virtual, digital libraries without walls, the walled variety are still being built, some of them massive. This book explores the reasons for this contradiction by examining several notable new library facilities around the world to see how modern expectations for libraries are being translated into concrete and steel. More and more libraries are looking at change not as a dreaded hazard but as an opportunity that can itself be seized to strengthen the library in the areas of mission, technologies, facilities, funding, and organizational structure. Thirteen libraries are discussed—by a librarian or administrator who worked on the project. Each author writes about the design and building concerns that were particularly relevant to that library: philosophy, political issues, or any other concerns that affected planning, building, and services in the new facility. Introductory and concluding chapters identify underlying values and themes, tying everything together. The unique combinations of issues, constraints, and opportunities show how libraries are planning to fit into the approaching era of virtual information delivery.

Literacies Across Media Routledge

This book presents cutting-edge research findings in areas critical to advancing reading research in the 21st century context, including new literacies, reading motivation, strategy instruction, and reading intervention studies. While students' reading performance is currently receiving unprecedented attention, there is a lack of research that adopts an international perspective and

draws on research expertise from different parts of the world to present a concerted effort, discussing key research models and findings on how to improve reading education. Addressing this gap in the literature, the book also responds to the challenge of promoting higher levels of literacy, and supporting and developing readers who can enjoy and critique texts of every genre.

Educators across subject areas are striving to integrate primary sources into their pedagogy and teaching. Yet, despite their importance to authentic disciplined inquiry, the implementation of primary source activities in the pre-K-12 classroom has been limited. This lack of utilization can largely be attributed to the perception that these activities are too complex to design, implement, and grade. Many teachers also feel that primary source analysis and the construction of evidence-based narratives is too difficult for students to complete in the traditional classroom. Waring argues that this is not the case and, with this handbook, provides teacher candidates and inservice teachers with detailed and specific perspectives, activities, approaches, and resources to help them effectively and authentically use primary sources in their classrooms. Book Features: Introduces teaching with primary sources, including detailed examples of authentic and tested instructional ideas and approaches. Designed to meet the needs of classroom teachers and teacher candidates in social studies, English and language arts, mathematics, science, and other fields. Offers dozens of primary sources and links to resources throughout the book. Aligns to national standards, frameworks, and the C3 framework for social studies. Can be used to meet the needs of emerging English learners and students with special needs. Focuses on ways in which educators are utilizing a variety of emerging technologies to engage students in deeper and more authentic ways of learning. Strengthening Service in America Through Continuous Learning Taylor & Francis
During the twentieth century, black Greek-Letter organizations (BGLOs) united college students dedicated to excellence, fostered kinship, and uplifted African Americans. Members of these organizations include remarkable and influential individuals such as Martin Luther King Jr., Congresswoman Barbara Jordan, novelist Toni Morrison, and Wall Street pioneer Reginald F. Lewis. Despite the profound influence of these groups, many now question the continuing relevance of BGLOs, arguing that their golden age has passed. Partly because of their perceived link to hip-hop culture, black fraternities and sororities have been unfairly reduced to a media stereotype—a world of hazing without any real substance. The general public knows very little about BGLOs, and surprisingly the members themselves often do not have a thorough understanding of their history and culture or of the issues currently facing their organizations. To foster a greater engagement with the history and contributions of BGLOs, *Black Greek-Letter Organizations in the Twenty-first Century: Our Fight Has Just Begun* brings together an impressive group of authors to explore the contributions and continuing possibilities of BGLOs and their members. Editor Gregory S. Parks and

the contributing authors provide historical context for the development of BGLOs, exploring their service activities as well as their relationships with other prominent African American institutions. The book examines BGLOs' responses to a number of contemporary issues, including non-black membership, homosexuality within BGLOs, and the perception of BGLOs as educated gangs. As illustrated by the organized response of BGLO members to the racial injustice they observed in Jena, Louisiana, these organizations still have a vital mission. Both internally and externally, BGLOs struggle to forge a relevant identity for the new century. Internally, these groups wrestle with many issues, including hazing, homophobia, petty intergroup competition, and the difficulty of bridging the divide between college and alumni members. Externally, BGLOs face the challenge of rededicating themselves to their communities and leading an aggressive campaign against modern forms of racism, sexism, and other types of fear-driven behavior. By embracing the history of these organizations and exploring their continuing viability and relevance, *Black Greek-Letter Organizations in the Twenty-first Century* demonstrates that BGLOs can create a positive and enduring future and that their most important work lies ahead.
