"As in the first edition,
the author has done a
magnificent job
compiling these
instruments and
providing important
information that the
reader can use to

evaluate their usefulness." --Ora Lea Strickland, RN, PhD, FAAN (From the Foreword) This book provides all the essential research tools for assessing and measuring caring for those in the caring professions. Watson's text is the only comprehensive and accessible collection of instruments for care measurement in clinical and educational nursing research. The measurements address quality of care, patient, client, and nurse perceptions of caring, and caring behaviors, abilities, and efficacy. Newly updated, this edition also contains three new chapters, which document the most effective caring language and provide innovative methods of selecting appropriate

tools for measurement based on validity and reliability. Key features of new edition: A chapter providing a comprehensive literature review of the research and measurement of caring A chapter entitled "Caring Factor Survey," which presents a new scale based on Watson's original theory of human caring Chapters outlining instruments for care measurement, including Holistic Caring Inventory, Peer Group Caring Interaction Scale, and many more New instruments focused on assessing caring at the administrative-relational caring level An updated section dedicated to challenges and future directions of the measurement of caring

Evidence Based

Midwifery CRC Press
Listed as the #1
reference book for
hypertension by the
American Society for
Hypertension in 2006,
this new edition
presents up-to-date,
practical, evidence-
based
recommendations for
treatment and
prevention of all forms
of hypertension.

Midwives E-Book* EGC
Designed to meet the
needs of today's
students, Lowdermilk's
Maternity Nursing, 8th
Edition - Revised
Reprint addresses the
fundamentals of
maternity nursing with
a concise, focused
presentation of the
care of women during
the childbearing years.
Integrating
considerations for
family, culture, and

health promotion into
the continuum of care,
it also addresses
community-based care
to emphasize that
nursing care takes
place in many settings.
Maternity Nursing
focuses on childbearing
issues and concerns,
including care of the
newborn, as well as
wellness promotion
and management of
common women's
health problems.
Critical thinking
exercises present case
studies of real-life
situations and
corresponding critical
thinking questions to
help you develop your
analytical skills. NEW!
A helpful appendix
identifies text content
that reflects the QSEN
competencies -
patient-centered care,
teamwork and
collaboration,
evidence-based

practice, quality improvement, safety, and informatics - to assist you in developing competencies to provide safe and effective nursing care. NEW! Focus on the family recognizes the nurse's need to integrate the family in the care of the mother and newborn and the importance of the role of the mother to the wellbeing of the family. NEW! Content updates throughout, including information on the late preterm infant and associated concerns such as feeding; guidelines on prioritization and delegation where relevant; and centering pregnancy, a new model of health care that brings women together in groups for their care. NEW!

Evidence-based practice content focuses your attention on how to use current research to improve patient outcomes. NEW! Improved readability helps you learn more efficiently with shorter, more focused content discussions. NEW! 21st Century Maternity Nursing: Culturally Competent, Community Focused chapter combines introductory material, culture, and community into one chapter to help you focus on key content and concepts. NEW! Streamlined content highlights the most essential, need-to-know information. The Fetus and Mother John Wiley & Sons Penelitian adalah hal penting dalam berbagai bidang

kehidupan manusia di bumi ini. Perkembangan ilmu pengetahuan dan teknologi tidak terlepas dari aktivitas dunia penelitian, demikian juga di bidang pendidikan dan kesehatan. Perkembangan ataupun kemajuan di berbagai hal di kedua bidang tersebut sangat dipengaruhi oleh aktivitas atau keberhasilan penelitian di bidangnya masing-masing. Kehadiran buku ini adalah ingin menjawab semua permasalahan di atas, baik yang dihadapi oleh peneliti, terutama penelitipemula maupun kesulitan yang dihadapi oleh mahasiswa baik sarjana maupun pasca sarjana dalam membuat proposal penelitian bidang

kesehatan (keperawatan, kebidanan, kesehatan masyarakat, dan lain-lain).

Ilmu kedokteran
Obstetri dan Ginekologi merupakan ilmu yang dinamis dan senantiasa berkembang pesat. Untuk itu, adalah kewajiban bagi para klinisi untuk terus mengikuti perkembangan tersebut dan meningkatkan pengetahuan. Peran dokter dan bidan memberikan pelayanan kesehatan yang menyeluruh dan paripurna bagi seorang wanita yang berkaitan dengan kesehatan reproduksinya saat tidak hamil ataupun di masa hamil, bersalin

atau nifas. Baik yang bersifat preventif (pencegahan terhadap penyakit), kuratif (penyembuhan penyakit) dan rehabilitatif (perbaikan kelainan yang timbul) pada alat reproduksinya. Taraf kesehatan perempuan Indonesia masih memprihatinkan seperti tercermin dari tingginya angka kesakitan dan angka kematian ibu maupun perinatal. Disadari bahwa kesehatan perempuan merupakan kondisi yang mutlak harus diperhatikan, karena dari perempuan yang sehat akan lahir generasi mendatang yang sehat sehingga mampu menjadi tumpuan harapan bangsa Indonesia untuk bersaing di antara bangsa di dunia terutama dalam era

globalisasi. Buku ini membahas tuntas tentang: Bab 1: Lingkup Komplikasi Kebidanan Bab 2: Komplikasi Kehamilan Bab 3: Komplikasi Persalinan Bab 4: Komplikasi Nifas Bab 5: Kedaruratan Obstetric Bab 6: Gangguan Psikologis dalam Kebidanan Bab 7: Ruang lingkup Ginekologi dan Jenis Kelainan dalam Sistem Reproduksi Bab 8: Jenis Penyakit Kandungan Bab 9: Gangguan dan masalah dalam Sistem Reproduksi Wanita Bab 10: Gangguan Sistem Reproduksi Wanita Bab 11: Penyakit Menular Seksual dan Imunologi Bab 12: Sistem Rujukan Ginekologi
Counselling for Maternal and Newborn Health Care Springer Publishing Company

Decades of research have demonstrated that the parent-child dyad and the environment of the family "which includes all primary caregivers" are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being

during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being

shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of

stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States. Kesehatan Ibu Hamil CV Jejak (Jejak Publisher)
The main aim of this practical Handbook is to strengthen counselling and communication skills of skilled attendants (SAs) and other health providers, helping them to effectively discuss with women, families and communities the key issues surrounding pregnancy, childbirth, postpartum, postnatal

and post-abortion care. The MNH Counselling Handbook is chiefly designed to be used by groups of SAs with the help of a facilitator. It can also be used by individual SAs who can get together with colleagues for discussions and activities where needed. It relies on a self-directed learning approach, allowing SAs to work at their own pace, drawing on their past counselling experience. The way it is used will be determined by each country's context, and the SAs preference. The MNH Counselling Handbook is divided into three main sections. Part 1 is an introduction which describes the aims and objectives and the general layout of the Handbook. Part 2

describes the counselling process and outlines the six key steps to effective counselling. It explores the counselling context and factors that influence this context including the socio-economic, gender, and cultural environment. A series of guiding principles is introduced and specific counselling skills are outlined. Part 3 focuses on different maternal and newborn health topics, including general care in the home during pregnancy; birth and emergency planning; danger signs in pregnancy; post-abortion care; support during labour; postnatal care of the mother and newborn; family planning counselling; breastfeeding; women

with HIV/AIDS; death and bereavement; women and violence; linking with the community. Each Session contains specific aims and objectives, clearly outlining the skills that will be developed and corresponding learning outcomes. Practical activities have been designed to encourage reflection, provoke discussions, build skills and ensure the local relevance of information. There is a review at the end of each session to ensure the SAs have understood the key points before they progress to subsequent sessions.

Essentials of Gynecology Lippincott Williams & Wilkins
The concept of expressing acidity as the negative logarithm

of the hydrogen ion concentration was defined and termed pH in the beginning of the 20th century. The general usefulness of the pH concept for life science was recognized and later gained importance to analytical research. Reports on results of pH measurements from living skin established the term acid mantle - the skin's own protective shield that maintains a naturally acid pH. It is invisible to the eye but crucial to the overall wellbeing of skin. Chronic alkalization can throw this acid mantle out of balance, leading to inflammation, dermatitis, and atopic skin diseases. It is therefore no surprise, that skin pH shifts have been observed in

various skin pathologies. It is also obvious that the pH in topically applied preparations may play an important role. Optimal pH and buffer capacity within topical preparations not only support stability of active ingredients and auxiliary materials, but may also increase absorption of the non-ionized species of an acidic or a basic active ingredient. They may even open up opportunities to modify and "correct" skin pH and hence accelerate barrier recovery and maintain or enhance barrier integrity. Further efforts are needed to standardize and improve pH measurements in biological media or pharmaceutical/cosmetic vehicles to increase and ensure quality,

comparability, and relevance of research data. In this volume, we present a unique collection of papers that address past, present and future issues of the pH of healthy and diseased skin. It is hoped that this collection will foster future efforts in clinical and experimental skin research.

Metodologi Penelitian Kesehatan [Edisi Revisi] Elsevier

For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care Child Health Nursing: Partnering with Children & Families promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses

on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery—such as electronic health

records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020. Also available with MyLab Nursing MyLab(tm) Nursing is an online self-study and class preparation program designed to engage students and improve results. Its personalized learning path helps students think like nurses as they move beyond memorization to true understanding through application. Learn

MyNursingLab with Pearson etext -- Access Code -- for Child Health Nursing Asuhan Kebidanan Kehamilan Jaypee Brothers, Medical Publishers Pvt. Limited The most-popular midwifery textbook in the world! The sixteenth edition of this seminal textbook, Myles Textbook for Midwives, has been extensively revised and restructured to ensure that it reflects current midwifery practice, with an increased focus on topics that are fundamental to midwifery practice today. Well illustrated to assist visual learning Boxes highlighting significant information to aid study Introduction, Aims of the chapter and Conclusion for each

chapter References, Further Reading and Useful websites to promote further learning Glossary of terms and acronyms provide simple definition of more complex terminologies Additional online resources Over 500 multiple-choice questions enable students to test their knowledge Unlabelled illustrations help reinforce learning Full image bank of illustrations to make study more visual and assist with projects. Up-to-date guidance on professional regulation, midwifery supervision, legal and ethical issues, risk management and clinical governance Recognises that midwives increasingly care for women with complex health needs,

in a multicultural society Increases confidence in empowering women to make appropriate choices Looks at the dilemmas involved in caring for women with a raised body mass index Chapter on optimising care of the perineum for women with perineal trauma, including those who have experienced female genital mutilation Additional coverage of basic neonatal resuscitation, to reflect the trend for midwives to carry out the neonatal physiological examination Streamlined chapters with similar themes and content, to facilitate learning Full colour illustrations now used throughout the book, in response to student feedback.

Farmakologi Jones & Bartlett Learning
Clearly and concisely provides guidelines for appropriate and careful documentation of care. Accurate documentation shows managed care companies that patients receive adequate care and that health care providers are controlling costs and resources. In addition, it plays a large role in how third party payors make payment or denial decisions. This new edition includes the latest changes and trends in nursing documentation as related to the newly restructured healthcare environment. Special attention focuses on the latest documentation issues specific to specialty

settings, such as acute care, home care, and long-term care, and a variety of clinical specialties, such as obstetrics, pediatrics, and critical care.-- Amazon.com.

Pengantar Psikologi untuk Kebidanan

Elsevier Health Sciences
Kesehatan ibu hamil harus senantiasa dijaga demi kesehatan ibu dan anaknya. Sistem imun ibu hamil juga dapat naik turun serta dipengaruhi oleh keadaan lingkungan. Oleh karena itu, pengetahuan dan sikap ibu hamil dapat menjadi tanggung jawab kita bersama dan tenaga kesehatan. Pengetahuan ibu hamil yang sebenarnya bisa dimulai dari saat berencana hamil, seperti remaja akhir atau dewasa muda,

remaja harus tahu mengenai risiko kehamilan dan persalinan. Pada saat pandemic seperti sekarang juga ibu hamil sebaiknya tidak melupakan selain risiko penyakit menular, tetapi juga komplikasi kehamilan dan persalinan serta riwayat kesehatan yang dimilikinya. Jadi, dengan melihat fenomena tersebut, tim penulis menyusun buku ini., semoga bermanfaat.

**pH of the Skin:
Issues and
Challenges** John Wiley
& Sons

Covering the management of critically ill newborns from the first minute of life through the first 72 hours, this practical, evidence-based and clinically-informed guide will provide all

members of the pediatric care team with the essential information to save lives and prevent disability. With chapters on neonatal transport, resuscitation, ventilation and ethical issues, the content is further illustrated with case studies illustrating the real-world aspects of identifying critical signs and symptoms, diagnostics and treatment in multiple settings. As well as including numerous clear diagrams and summary tables, the text includes algorithms based on international guidelines to help navigate the reader through the delivery of care, and a comprehensive listing of drugs and dosages, serving as a quick reference guide when

making treatment decisions. This is essential reading for pediatric residents, fellows and junior faculty, neonatal intensive care nurses, paramedics, obstetricians, midwives, anesthesiologists and emergency medicine physicians.

Obstetrics and Gynecology at a Glance World Health Organization Keperawatan Maternitas Persalinan yang mencakup kesehatan ibu bersalin dan bayinya merupakan kombinasi unik antara tantangan dan kesempatan, untuk mengasimilasikan pengetahuan, mengembangkan keterampilan teknis dan berpikir kritis dalam

mengaplikasikan pengetahuan ini untuk Praktik Keperawatan Maternitas Persalinan bersama tim kesehatan lainnya dalam penanganan ibu bersalin/ pasien secara bersama-sama. Semua tenaga kesehatan yang berkaitan dengan ibu bersalin dan bayinya, di semua tipe program kesehatan yaitu keperawatan, kebidanan, kedokteran, dan profesi lain yang relevan dalam program pendidikannya serta menerapkan ke dalam praktik nyata sesuai kebutuhan tersebut. Termasuk dalam proses pendidikan pun harus disesuaikan, yaitu dari perawat maternitas yang profesional sampai jenjang Sp 1 dan Sp 2 Keperawatan Maternitas, hal ini perlu pemikiran lebih

lanjut yang logis untuk direncanakan pelaksanaannya. Buku persembahan penerbit PrenadaMediaGroup

Kaplan's Clinical Hypertension Media Sains Indonesia

This comprehensively updated new edition provides a thorough and dynamically-illustrated overview of the female reproductive organs, care of the female during pregnancy, childbirth and the postnatal period. It is clinically relevant, with a focus on diagnosing, managing and treating disorders and abnormalities and is fully aligned with medical school curricula. *Obstetrics and Gynecology at a Glance*: • Recaps basic history taking, anatomy and endocrinology and

focuses on clinically relevant information • Covers each topic in a double-page spread, packed with charts, graphs, photographs and visuals • Includes thoroughly updated sections on reproductive endocrinology, infertility and urogynecology The companion website at www.ataglanceseries.com/obgyn features interactive flashcards, case studies and multiple-choice questions (MCQs). *Obstetrics and Gynecology at a Glance* is the perfect guide for medical students, junior doctors and midwives, and is ideal for those embarking on clinical rotations and the clerkship.

Supporting Parents of Children Ages 0-8

Cambridge University Press

The fourth edition of Critical Care Obstetrics has been extensively revised to reflect the advances that have been made in maternal-fetal medicine. This edition contains 14 brand new

chapters written by the field's leading physicians. Critical Care Obstetrics, 4/e, offers expanded coverage in areas vital to intensive care management, including Neonatal Resuscitation, The Organ Transplant Obstetrical Patient, and Ethical Considerations. This practical guide and reference will be of invaluable assistance to obstetricians, and primary care physicians, in both the treatment and referral of high-risk patients.

Evidence based

practice is now widely

accepted as a

fundamental tenet of

midwifery. The

importance of evidence in defining midwifery policy and practice in the UK health system, and others, is acknowledged and enduring. While the development and evaluation of research in midwifery is well charted, the question of how such evidence is incorporated into practice has, to date, received less attention and discussion in the midwifery profession. Answering this need, Evidence Based Midwifery focuses on the dissemination and use of evidence for midwifery practice, and explores midwives' experiences in using the evidence base to inform policy and enhance clinical practice. Written by a highly-regarded and diverse group from the UK and international

midwifery community, Evidence Based Midwifery addresses issues of relevance to all midwives whether clinical practitioners or educators, students or supervisors, researchers or managers. Issues that influence evidence based midwifery are discussed, and topics covered include problem based learning, implementation of evidence based guidelines and the involvement of service users. Edited by founder members of the Evidence Based Midwifery Network International collaboration with contributions from the UK, Greece, Canada and the Netherlands Primary focus on the incorporation of evidence into

midwifery practice
