Framed around the concept of culture, Nanda and Warms's concise book makes students aware of the fact that culture matters in driving and shaping human behavior, and that culture is a dynamic concept that interrelates various cultural systems in adaptive (or maladaptive) ways. The text focuses on how culture helps direct and explain peoples' behavior; why this is important for understanding what is going on in the world today, and how we can solve

problems and effect positive change. Via ethnographic storytelling and a writing style that is both authoritative and conversational, the authors present the key concepts of anthropology in a way that draws students into the topics. The authors emphasize contemporary issues, issues of globalization, and American culture, while continuing to emphasize equalities and inequalities around gender, class, race and ethnicity, as well as the effects of globalization. Mount Allegro Cengage Learning Mount Allegro is an extraordinary memoir, a celebration of Sicilian life, an engaging sociological portrait, a moving reminiscence of a fledgling writer's escape from the restrictive culture in which he grew up. Jerre Mangione's autobiographical chronicle of his youth in a Sicilian community in Rochester is one of the truly enduring books about the

immigrant experience in this country. Family squabbles, soul-nourishing food, and the casting of evil eyes are only some of the ingredients of this richly textured book, although they must all take second place to its unforgettable characters. As Eugene Paul Nassar writes in the book's Foreword, "Mount Allegro . . . gave a literary visibility and identity, amiable and appealing, to a poorly understood ethnic group in America, and did so at a very high level of artistry."

The history of human society, as Carl Couch recounts it in his speculative final

book, is a history of successive, sometimes overlapping information technologies used to process the varied symbolic representations that inform particular social contexts. Couch departs from earlier "media" theorists who ignored these contexts in order to concentrate on the technologies themselves. Here, instead, he adopts a consistent theory of interpersonal and intergroup relations to depict the essential interface between the technologies and the social contexts. He emphasizes the dynamic and formative capacities of such technologies, and places them within the major institutional relations of societies of any size. Social orders are viewed in these pages as inherently and reflexively shaped by the information technologies

that participants in the institutions use to carry out their work. The manuscript was nearly complete in draft at the time of Couch's death. He has left a bold, synthetic statement, reclaiming the common ground of sociology and communication studies and articulating the indispensability of each for the other. With admirable scope, across historical epochs and cultures, he shows in detail the transformative power of information technologies. While the author hopes that a humane vision comes with each technological advance, he nonetheless describes the numerous instances of mass brutality and oppression that have resulted from the oligarchic control of those technologies. Couch's theory and substantive analysis speak directly to the interests of historians, sociologists,

and communication scholars.
