Set your pulse racing with this stunning visual guide to over 1000 pin-up machines - iconic symbols of wanderlust, speed, and the open road. From Gottlieb Daimler's gas-powered "engine on a bicycle" which set fire to the seat on its first outing, to superbikes such as the Ducati 916, Motorcycle: The Definitive Visual History takes you on an enthralling tour of the bike's history. It shows you bikes that appeal to the head - practical forms of transport - and to the heart - a parade of classic pin-ups including cult machines such as the Honda RC30, the Triumph Bonneville, and the Harley-Davidson XR750. Motorcycle: The Definitive Visual History shows the brilliance and impracticality of different designs and features detailed cross-sections of engines such as the air-cooled two-stroke. It explains how the great marques such as the Royal Enfield, the "legendary" Indian Scout, Vespa, and Norton all became household names. Whether you are a hardcore enthusiast or looking forward to your first machine, this is one title you cannot be without.

Whether it's a big-bore, high-end custom sportbike you're after, or a naked, bare knuckles streetfighting drag racer, this book has the goods for getting you there. In three different scenarios, the nation's top builders give blow-by-blow instructions for completely rebuilding three popular streetbikes -- from performance modifications and exhaust systems to flawless finishes and detail work. Focusing on highly customized Hayabusa drag bikes, including a slammed and lowered Suzuki GSX1300R Hayabusa, John Dantzer of the Charlotte, North Carolina, shop Two Wheel Customs outlines the suspension and engine modifications that the serious street and quarter-mile racer can make. He takes a salvaged, late-model four-cylinder street machine and transforms it into the kind of machine that both professional stunt riders and corner-carving enthusiasts favor. Next, author Mike Seate covers the details on constructing and installing popular modifications -- everything from engine crash guards and wheelie bars to motocross-style handlebars and bikini fairings -- while stunt riders and streetfighter builders from the United States and Europe weigh in with tips and advice. Last but not least, the builders at Wisconsin's Performance and South Carolina's Coastal Motorcycles provide a step-by-step account of the construction of two high-end custom sportbikes -- transforming a Yamaha YZF R-1 and a Suzuki GSX-R 1000 into the kind of machines that are eye-popping everywhere-on the streets or on the motorcycle show circuit.

From Orson Scott Card, the bestselling author of Ender's Game, and his daughter Emily Janice Card, comes a 384-page omnibus edition containing the first two books of an all-ages manga series! Out of deep space, a mysterious alien race known as "The Givers" came to Earth. They gave the human race the greatest technology ever seen—four giant towers known as Ladders that rose 36,000 miles into space. Each tower culminated in a space station that harnessed the energy of the Sun to power the entire planet. As suddenly as the Givers arrived, they vanished, leaving the human race with one solemn instruction: maintain and preserve the Ladders at all costs. Due to the unique alien construction of the Laddertop space stations, however, only a skilled crew of children could perform the maintenance necessary to keep the stations running. Twenty-five years later, back on Earth, competition is fierce to enter Laddertop Academy. Robbi and Azure, two eleven-year-old girls who are best friends, are among those vying for a spot at the prestigious academy. While one is rejected, the other takes off into space for the adventure of a lifetime. Yet soon, their destinies will

The suspension expert's illustrated, comprehensive troubleshooting guide for dirt, street, and supermoto—with a solution to virtually any problem. Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance.

Bonjour - Is This Italy? offers a unique and often hilarious insight into the challenges and excitement afforded by a lone motorcycle journey though Europe. In his quest to escape the frantic nature of London life, Kevin Turner heads south across France, crossing the Alps into Italy, and onto Rome, before returning via Germany - and the treacherous Nürburgring. Throughout, the author provides valuable advice to those considering a similar journey, noting the best and most scenic routes, where to stay, and what to see. This is interspersed with a raft of comic anecdotes that demonstrate exactly what NOT to do when lost on a motorbike in Europe.
