*Critical Thinking* John Wiley & Sons

This report of the President's Commission on Law Enforcement and Administration of

Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police,

the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has

eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

By studying the work of hundreds of the most original and effective business minds, the authors present a common architecture that illuminates exceptional analysis and creative performance. 2 x 2 Thinking is characterized by a fundamental appreciation for the dynamic and complex nature of business. The best strategists go out of their way to tackle dilemmas rather than merely solve problems. They use opposition, creative tension, iteration and transcendence to get to the heart of issues and involve critical others in finding the best solutions. The authors demonstrate how to apply the 2 x 2 approach to a wide range of important business challenges.

General Adams reflects on his experiences in the cold war, during which he served in both manned bombers and missile silos.

He tells stories of famous and not-so-famous cold warriors, including some from the US Navy. Some stories are humorous; some stories are tragic. Having traveled extensively in Russia and some former Soviet Union states after retirement, General Adams tells us about his former adversaries, the Soviet cold warriors. In the process, he leaves no doubt about his respect for all who served so valiantly in the "strategic triad"-- the strategic command, the ICBM force, and the submarine Navy.

"Plain Dealing" is a book of essays by 25 accomplished Cleveland-area journalists. It's a book of stories, many never told

before. It's a first-person account of journalism in Cleveland, life in the newsroom, the issues and events these journalists covered, and the characters they worked with and met. The stories begin in the 1950s and go up to 2013, covering the post-World War II era through the days when Cleveland was a three daily newspaper city, then two, then one. The book ends with the mass layoffs and resulting decline that ushered in "digital-first" age.

The saga of the Freedom Rides is an improbable, almost unbelievable story. In the course of six months in 1961, four hundred and fifty Freedom Riders expanded the realm of the possible in American politics, redefining the limits of dissent and setting the stage for the civil rights movement. In this new version of his encyclopedic Freedom Riders, Raymond Arsenault offers a significantly condensed and tautly written account. With characters and plot lines rivaling those of the most imaginative fiction, this is a tale of heroic sacrifice and unexpected triumph. Arsenault recounts how a group of volunteers--blacks and whites--came together to travel from Washington DC through the Deep South, defying Jim Crow laws in buses and terminals and putting their lives on the line for racial justice. News photographers captured the violence in Montgomery, shocking the nation and

sparking a crisis in the Kennedy administration. Here are the key players--their fears and courage, their determination and second thoughts, and the agonizing choices they faced as they took on Jim Crow--and triumphed. Winner of the Owsley Prize Publication is timed to coincide with the airing of the American Experience miniseries documenting the Freedom Rides "Arsenault brings vividly to life a defining moment in modern American history." --Eric Foner, *The New York Times Book Review* "Authoritative, compelling history." --William Grimes, *The New York Times* "For those interested in understanding 20th-century America, this is an essential book." --Roger Wilkins, *Washington Post Book World* "Arsenault's record of strategy sessions, church vigils, bloody assaults, mass arrests, political maneuverings and personal anguish captures the mood and the turmoil, the excitement and the confusion of the movement and the time." --Michael Kenney, *The Boston Globe*

When William Shockley invented the transistor, the world was changed forever and he was awarded the Nobel Prize. But today Shockley is often remembered only for his incendiary campaigning about race, intelligence, and genetics. His dubious research led him to donate to the Nobel Prize sperm bank and preach his inflammatory ideas widely, making shocking pronouncements on the uselessness of remedial education and the sterilization of individuals with IQs below 100. Ultimately his crusade destroyed his reputation and saw him vilified on national television, yet he died proclaiming his work on race as his greatest accomplishment. Now, Pulitzer Prize-winning journalist Joel N. Shurkin offers the first biography of this contradictory and controversial man. With unique access to the private Shockley archives, Shurkin gives an unflinching account of how such promise ended in such ignominy.

The development of crime policy in the United States for many generations has been hampered by a drastic shortage of knowledge and data, an excess of partisanship and instinctual responses, and a one-way tendency to expand the criminal justice system. Even if a three-decade pattern of prison growth came to a full stop in the early 2000s, the current decade will be by far the most punitive in U.S. history, hitting some minority communities particularly hard. The book examines the history, scope, and effects of the revolution in America's response to

crime since 1970. Henry Ruth and Kevin Reitz offer a comprehensive, long-term, pragmatic approach to increase public understanding of and find improvements in the nation's response to crime. Concentrating on meaningful areas for change in policing, sentencing, guns, drugs, and juvenile crime, they discuss such topics as new priorities for the use of

incarceration; aggressive policing; the war on drugs; the need to switch the gun control debate to a focus on crime gun regulation; a new focus on offenders' transition from confinement to freedom; and the role of private enterprise. A book that rejects traditional liberal and conservative outlooks, *The Challenge of Crime* takes a major step in offering new

approaches for the nation's responses to crime.
