Diving, scientific diving,
and diver safety are
specialized subject areas
not generally well-
represented in even the
largest of academic

libraries, largely because
of difficulties in locating
appropriate items to
include in the collection.
However, in order to
adequately fulfill his/her
responsibilities, the Diving
Safety Officer of a
scientific diving program
needs easy access to a
broad range of books,
reports, and journals
covering all aspects of
diving. This bibliography
outlines a comprehensive

collection appropriate to
the needs of a scientific
diving program in a
research or academic
institution. Items are
grouped in broad subject
areas corresponding to
various aspects of the
diving program. Both title
and author indexes are
also included.

Dive ranks with such adventure classics as *The Perfect Storm* and *Into Thin Air*.”—Tampa Tribune
Spurred on by a fatal combination of obsession and ambition, Chris and Chrisy Rouse, an experienced father-son scuba diving team, hoped to achieve wide-spread recognition for their outstanding and controversial diving skills by solving the secrets of a mysterious, undocumented, World War II German U-boat that lay only a half day’s mission from New York

Harbor. The Rouses found the ultimate cost of chasing their personal challenge: death from what divers dread the most—decompression sickness, or “the bends.” In this gripping recounting of their tragedy, author Bernie Chowdhury, himself an expert diver, explores the thrill-seeking, high-risk world of deep sea diving, its legendary figures, most celebrated triumphs, and notorious tragedies.
Diver Down Jones & Bartlett Learning
Written by two experts in

diving physiology and medicine, this comprehensive resource will help you manage each stage of a dive more safely and successfully. Whether you're on the surface or bottom, in the descent or ascent, you'll know exactly what to do and when to do it. With information on everything from on-gassing and off-gassing to first response interventions for medical problems, *Diving Science* is as essential as a wetsuit for your next dive.

Hiding on the Bottom

UNESCO Publishing

This full-color, extensively illustrated revision of a highly respected dive manual includes the information necessary to learn open water diving. Timely discussion include ecology and scuba techniques, equipment and safety materials, women's diving issues and concerns, expanded CPR information, air

sharing and hand signals. *Scuba Confidential* Simon Pridmore
One diver, after a seemingly brief period below the surface, discovers that his gas supply has run perilously low. Another, paralyzed, bobs helplessly on the surface, and when a poorly trained divemaster attempts rescue, things go from bad to worse. Two other divers, fascinated by the bountiful undersea life of the Caribbean, fail to notice that a powerful current is sweeping them

rapidly away from their unattended boat. These are just a few of the true stories you'll find in *Diver Down*, most of them involving diver error and resulting in serious injury or death. Each of these tales is accompanied by an in-depth analysis of what went wrong and how you can recognize, avoid, and respond to similar underwater calamities. This unique survival guide explores the gamut of diving situations, including cave and wreck diving, deep-water dives, river and drift diving,

decompression sickness, and much more. It shows you how to prevent tragic mishaps through:
Inspection and maintenance of primary and secondary diving gear
Learning and following established safety protocols
Confirming the training and credentials of diving professionals
Practicing emergency responses under real-world conditions
A True Story of Obsession and Survival Among America's Great White Sharks Human Kinetics

An illustrated journey into the world of undersea diving captures humankind's fascination with the wonders of the undersea world and the dramatic growth of recreational sport diving, discussing the history of the sport and offering fascinating accounts of the author's own adventures around the world. What Lies at the Bottom of Cenote X? Cenote X. The Mayans called it K'uxulch'en, the "Well of Sorrows." Since the days of the Conquistadors, its exact location was known only to local forest tribes—until its discovery by Mike Bryant and Pete Wiley, cofounders of the Yucatan Deep Project. When their joint attempt

to set a deep-diving record four years ago met with disaster, the Well of Sorrows lived up to its name. Now, Mike is returning to the world's deepest sinkhole to finish what he and his late partner began. Not everyone wants Mike to make the attempt. Bridget Marceau—Mike's team physician, fellow diver, and soul mate—fears losing the man she loves to the same cave that claimed Pete Wiley. She is determined to keep Mike out of Cenote X. And she's not the only one.

Someone else is keenly interested in what lies more than 1,300 feet beneath the surface. That person already knows exactly what to look for—and why he must at all costs prevent Mike from discovering the secret hidden in those lightless depths. Punctuating high-risk adventure with inside glimpses into the world of technical diving, author Tom Morrisey plumbs the depths of the human soul. Yucatan Deep is a taut tale of loyalty, greed, and the wellsprings of faith

and life.

The Last Dive Jeff Bauer Maverick, innovator, entrepreneur, environmentalist and sheer force of nature, Francis Toribiong would have been a unique and significant individual no matter where in the world he was born. As it turned out, he was born in the island nation of Palau in the Western Pacific at just the right time to apply his special set of skills and attributes to the task of helping his country find its place in the world. In the 1980s and 1990s, he

arguably did more than anyone to build Palau's economy and help it develop into an independent, forward-looking nation. And, improbably, he achieved this via the sport of scuba diving. Francis Toribiong is a Pacific Islander like no other. He is the father of Palau tourism, a scuba diving pioneer, and an effective, tireless ambassador for both his country and its abundant marine and land resources. He was born poor and had no academic leanings. Yet he

was driven to succeed by a combination of duty, faith, a deep-seated determination to do the right thing and an absolute refusal ever to compromise his values. For his whole life, he has been a devoted friend to strangers and an implacable opponent to anybody who, through malevolence or negligence, threatens Palau's considerable natural treasures. He has also been the perfect host to generations of scuba divers from all over the world, who have visited

Palau to see those treasures for themselves. And, as well as all that, he was Palau's first ever parachutist - known throughout the islands as the Palauan who fell from the sky. They were speaking both literally and figuratively. He was so completely different from all of his contemporaries in terms of his demeanor, his ambitions and his vision, that it was as if he had come from outer space. Palau had never seen anybody quite like him and there was no historical precedent for

what Francis Toribiong did. He had no operations manual to consult and no examples to follow. He wrote his own life. Francis Toribiong was the first Palauan ever to seek and seize the international narrative. No Palauan, in any context or field, had previously thought to go out into the world and say: "This is Palau - what we have is wonderful. Come and see!" This is his astonishing story.

Scuba Confidential is a

unique book packed full of valuable tips and expert advice, giving you unprecedented access to the secrets of dive professionals and technical divers. With Scuba Confidential, you will learn how to master skills and techniques that will make you a more confident, capable and safe diver. It offers an informed, balanced view on some of scuba diving's most contentious issues like going solo, deep diving and rebreathers and includes a comprehensive analysis of

how diving accidents happen and how to make sure you do not become a statistic. Scuba Confidential also gives you valuable insights on a vast range of topics such as what it is like to do a cave diving course, how to make sure you buy the right equipment, what to consider when choosing an instructor, things even the pros get wrong and where to find the best diving in the world. This is candid, no-nonsense practical advice from a professional who has been involved over the last

three decades with virtually every aspect of the sport. Have you ever wondered? How to look as comfortable in the water as the professionals do? What it is like to dive inside shipwrecks? Which training courses are most worthwhile? If you would make a good technical diver? If you should be considering a rebreather? How you can improve your diving skills? How you can reduce your air consumption? Why diving accidents happen and how to prevent them? Whether you might

sometimes actually be safer solo diving? How to dive deep safely? Or How muck diving can possibly be any fun? Scuba Confidential has the answers to these questions and many more.
