[PDF] Active Learning for Hierarchical Text Classification ... Active Learning For Hierarchical Text Active learning has been shown to reduce the training examples significantly, but it has not been applied to hierarchical text classification due to several technical challenges. In this paper, we study active learning for hierarchical text classification. Active Learning for Hierarchical Text Classification ... Title: Cost-Effective Active Learning for Hierarchical Multi-Label Classification Author: Yi-Fan Yan, Sheng-Jun Huang Subject: Proceedings of the Twenty-Sixth International Joint Conference on Artificial Intelligence Cost-Effective Active Learning for Hierarchical Multi ... Active learning has been shown to reduce the training examples significantly, but it has not been applied to hierarchical text classification due to several technical

challenges. In this paper, we study active learning for hierarchical text classification. CiteSeerX — Active Learning for Hierarchical Text ... Hierarchical text classification plays an important role in many real-world applications, such as webpage topic classification, product categorization and user feedback classification. Usually a large number of training examples are needed to build an accurate hierarchical classification system. Active learning has been shown to reduce the training examples significantly, but it has not been ... [PDF] Active Learning for Hierarchical Text Classification ... In this paper, we consider the problem of active learning when the categories are represented as a tree. Our goal is to exploit the structure information of the label tree in active learning to select the most informative samples to be labeled. We propose an algorithm that estimates the semantic space, embedding the category hierarchy. On active learning in hierarchical classification ... Active Learning, Hierarchical Classification, Label Tree Embedding 1.

INTRODUCTION Obtaining labels is an expensive or time-consuming process, especially for large scale multi-class classification problems. Active learning is proposed to make the learning task more efficient [12], by intelligently choosing specific unlabeled examples. On active learning in hierarchical classification Active learning has been shown to reduce the training examples significantly, but it has not been applied to hierarchical text classification due to several technical challenges. In this paper, we study active learning for hierarchical text classification. We propose a realistic multi-oracle setting as well as a novel active learning ... Active Learning for Hierarchical Text Classification Hierarchical Sampling for Active Learning class labels. We describe an active learning strategy with good statistical properties, that will discover and exploit any informative pruning of the cluster tree. For instance, suppose it is possible to prune the cluster tree to  $m$  leaves ( $m$  unknown) that are fairly pure in the labels of their ... Hierarchical Sampling for

Active Learning We investigate active learning by pairwise similarity over the leaves of trees originating from hierarchical clustering procedures. In the realizable setting, we provide a full characterization of the number of queries needed to achieve perfect reconstruction of the tree cut. In the non-realizable setting, we rely on known important-sampling procedures to obtain regret and query complexity ... Flattening a Hierarchical Clustering through Active Learning Active Learning For Hierarchical Text Classification Author: www.ariabnb.com-2020-10-17T00:00:00+00:01 Subject: Active Learning For Hierarchical Text Classification Keywords: active, learning, for, hierarchical, text, classification Created Date: 10/17/2020 9:27:07 AM Active Learning For Hierarchical Text Classification Download Citation | Hierarchical sampling for active learning | We present an active learning scheme that exploits cluster structure in data. | Find, read and cite all the research you need on ... Hierarchical sampling for active learning - ResearchGate An Active Learning Framework for Hyperspectral Image Classification Using Hierarchical Segmentation Abstract: Augmenting spectral data with spatial information for image classification has recently gained significant attention, as classification accuracy can often be improved by extracting spatial information from neighboring pixels. An Active Learning Framework for Hyperspectral Image ... HDLTex: Hierarchical Deep Learning for Text Classification. Flattening a Hierarchical Clustering through Active Learning Reinforcement active learning hierarchical loops. ... and list of authors), clicks on a figure, or views or downloads the full-text. Learn more. DOI: 10.1109/IJCNN.2011.6033617 ... (PDF) Reinforcement active learning hierarchical loops In 2014 the 28,100 active, scholarly, peer-reviewed, ... This architecture is particularly important for learning time-dependent structures to include words or characters in text . Deep learning for hierarchical

classification is not new with this paper, although the specific architectures, ... HDLTex: Hierarchical Deep Learning for Text Classification Active learning (AL) is a subfield of machine learning which addresses methods to build models with fewer, but more representative instances. Even though AL has been vastly studied, it has not been thoroughly investigated in hierarchical multi-label classification, a learning task where multiple class labels can be assigned to an instance and these labels are hierarchically structured. Active learning for hierarchical multi-label ... In many multi-label tasks, the labels are organized into hierarchies from coarse to fine. The labels at different levels of the hierarchy contribute differently to the model training, and also have diverse annotation costs. In this paper, we propose a multi-label active learning approach to exploit the label hierarchies for cost-effective queries. Cost-Effective Active Learning for Hierarchical Multi ... active-learning-for-hierarchical-text-classification 1/1 Downloaded from www.vhvideorecord.cz on October 2, 2020 by guest Kindle File Format Active Learning For Hierarchical Text Classification This is likewise one of the factors by obtaining the soft documents of this Active Learning For Hierarchical Text Classification Text classification is probably not the first thing that comes to mind when you think of machine learning, but as far as solid practical real-world applications go, it's arguably at the top of the pile. Before we get started on hierarchical classification, let's get a bit of jargon out of the way first. Active learning (AL) is a subfield of machine learning which addresses methods to build models with fewer, but more representative instances. Even though AL has been vastly studied, it has not been thoroughly investigated in hierarchical multi-label classification, a learning task where multiple class labels can be assigned to an instance and these labels are hierarchically structured. Active Learning For Hierarchical Text Classification Hierarchical Sampling for Active Learning class labels. We describe an active learning strategy with good statistical properties, that will discover and exploit any informative pruning of the cluster tree.
