This book is unique in its coverage of all the main areas required to plan and implement a community program, but it goes a step further by including important information on sustaining the program, budgeting, funding, community resource development, and fully implementing the program. In addition, the author has developed a number of tools that aid the student in developing a community program (usually a required class project) including exercises to help with needs assessment and planning, as well as exercises and quizzes, which will be included in a cd with the book. The book presents the author's 13-step model that guides a student through the entire process of planning and developing a mental health community program.

It also includes questions for review and discussion in the classroom. It provides the most comprehensive and essential resource for courses on group dynamics and behavior.
