Global Competition Enforcement New Players, New Challenges Edited by Paulo Burnier da Silveira & William Evan Kovacic In a short span of years, the landscape of global competition has changed significantly. In particular, international cooperation in competition law enforcement has greatly strengthened the battle against abuse of dominance, cartels, anticompetitive mergers and related political corruption. This thoroughly researched book explains the current situation regarding joint investigations, identifies common problems and considers possible solutions and future developments. In addition to covering issues of competition policy, its authors look in detail at practice in both merger and conduct investigations in a variety of countries. The following aspects of the subject and more are examined in depth: the interface between antitrust and anti-corruption; the digital economy's challenges to competition authorities; convergent aims and rules among different competition authorities; regional organizations with competition mandates; competition neutrality and state-owned enterprises; and leniency programmes. Although necessarily there is considerable information on major antitrust regimes like those of the United States and the European Union, chapters by local experts highlight lessons to be learned from the work of

competition authorities in five continents including Argentina, Australia, Brazil, China, Colombia, India, Japan, Mauritius, Mexico, Peru and South Africa. The contributors include competition enforcers, regulators, academics, practitioners and leading commentators from a range of jurisdictions. Adding up to an authoritative analysis from the enforcer's perspective, the studies presented in the book clarify the approaches and priorities of competition enforcement authorities - including those of major emerging economies - and provide expert guidance on dealing with transnational investigations. Antitrust lawyers, corporate counsel and interested academics as well as policymakers will benefit immeasurably from this book's wealth of informative detail.

This book examines the challenges posed to Australian copyright law by streaming, from the end-user perspective. It compares the Australian position with the European Union and United States to draw lessons from them, regarding how they have dealt with streaming and copyright. By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses, it argues for strengthening end-user rights. The rising popularity of streaming has resulted in a revolutionary change to how digital content, such as sound recordings, cinematographic films, and radio and television broadcasts, is used on the internet. Superseding the conventional method of downloading, using streaming to access digital content has challenged copyright law, because it is not clear whether end-user acts of streaming constitute copyright infringement. These prevailing grey areas between copyright and streaming often make end-users feel doubtful about accessing digital content through streaming. It is uncertain whether exercising the right of reproduction is appropriately suited for streaming, given the ambiguities of "embodiment" and scope of "substantial part". Conversely, the fair dealing defence in Australia cannot be used aptly to defend end-users' acts of streaming digital content, because end-users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review, news reporting, parody or satire, or research or study. When considering a temporary copy exception, end-users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content, even if they lack any knowledge about the content's infringing nature. Moreover, the grey areas in circumventing geo-blocking have made end-users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo-blocking. End-users have a severe lack of knowledge about whether they can use circumvention methods, such as virtual private networks, to access streaming websites without being held liable for copyright infringement. Despite the intricacies between copyright and access to digital content, the recently implemented website-blocking laws have emboldened copyright owners while suppressing end-users' access to digital content. This is because the principles of proportionality and public interest have been given less attention when determining website-blocking injunctions.

Following the implementation of the Human Rights Act 1998, awareness has increased that we live in a rights-based culture and that children constitute an important group of rights holders. Now in its third edition, *Children's Rights and the Developing Law* explores the way developing law and policies in England and Wales are simultaneously promoting and undermining the rights of children. It reflects on how far these developments take account of children's interests, using current research on children's needs as a template against which to assess their effectiveness and considering a broad range of topics, including medical law, education and youth justice. A critical approach is maintained throughout, particularly when assessing the extent to which the concept of children's rights is being acknowledged by the courts and policy makers and the degree to which the UK fulfils its obligations under, for example, the UN Convention on the Rights of the Child.
