Circulatory, Digestive & Reproductive Systems: Kidneys & Large Intestine Gr. 5-8 Jones &

Bartlett Learning

This is the chapter slice "The Excretory System - Kidneys & Large Intestine" from the full lesson plan "Circulatory, Digestive & Reproductive Systems"
How can you tell the difference between an artery and a vein? Our resource tells you how! Learn the major organs of four body systems and how they work to keep us alive and healthy. We begin with blood, blood vessels and the heart. Next, we follow the path food takes from the mouth to the large intestine, and find out how food is turned into fuel. Then it's on to how the liver, lungs and skin all help rid our body of toxins. We look inside the kidneys and intestines, and finish with how a tiny sperm and egg cell can grow into a baby. Reading passages, student activities, test prep, and color mini

posters all included. All of our content is aligned to your State Standards and are written to Bloom's Taxonomy and STEM initiatives.

This is the chapter slice "The Excretory System - Skin, Liver & Lungs" from the full lesson plan "Circulatory, Digestive & Reproductive Systems" How can you tell the difference between an artery and a vein? Our resource tells you how! Learn the major organs of four body systems and how they work to keep us alive and healthy. We begin with blood, blood vessels and the heart. Next, we follow the path food takes from the mouth to the large intestine, and find out how food is turned into fuel. Then it's on to how the liver, lungs and skin all help rid our body of toxins. We look inside the kidneys and intestines, and finish with how a tiny sperm and egg cell can grow into a baby. Reading passages, student

activities, test prep, and color mini posters all included. All of our content is aligned to your State Standards and are written to Bloom's Taxonomy and STEM initiatives.
