This book is organized into four main sections. The first three sections cover the anatomy, physiology, and diseases of the nose, head and neck, and the ear. The final section deals with pediatric otolaryngology. Several changes were made in this tenth volume. These include the presentation of otology, audiology, and otoneurology as an integrated whole; the rewriting of the section of rhinology; addition of a section on pediatric otolaryngology; and modification and expansion of the section on head and neck surgery. This book will be of interest to senior students, general practitioners, and trainees in otolaryngology.
